

Basic structure for oral case presentations.

- a. Identifying information/chief complaint (ID/CC)
- b. History of present illness (HPI) including relevant ROS only
- c. Other active medical problems
- d. Medications/allergies/substance use (note:
- e. The complete ROS should not be presented in oral presentations
- f. Brief social history (current situation and major issues only)
- g. Physical examination (pertinent findings only)
- h. One line summary
- i. Assessment and plan

Next, review with students the relevant behaviors associated with the STAGE framework as listed in the Doccom module on oral presentations. Write out S-T-A-G-E on the board and have students describe the behaviors tied to each letter in the mnemonic:

- Tell the patient's **S**tory using the organized format and use an engaging **S**tyle
- Confirm your **T**iming
- Identify your **A**udience and Setting then adjust accordingly
- Clarify the **G**oals of your presentation
- **E**licit feedback
