Graduate School News and Events

Important Dates

**Summer Term (full summer)**
- May 26: Memorial Day, no classes
- May 30: Last day to drop a course using online registration, without receiving a W
- July 4: Independence Day, no classes
- July 11: Last day to drop classes without a petition
- August 1: Last day of classes
- August 4-6: Final Exams

**May Session**
- May 23: Last day to drop classes without a petition
- May 26: Memorial Day, no classes
- May 30: Last Day of classes, Final Exams

**Summer Session**
- May 26: Memorial Day, no classes
- June 20: Last day to add course
- June 27: Last day to add course without a petition, last day to drop course without receiving a W
- July 4: Independence Day, no classes
July 18 - Last day to drop classes without a petition
August 1 - Last day of classes
August 4-6 - Final Exams

Attached is the simplified important dates handout for summer 2014 term as at PDF doc
Please be aware that dates are subject to change, and updates will be made on the Unive
Registrar's website at: http://registrar.osu.edu/registration/index.asp

Revised Policy: Emeritus Faculty and Graduate Students
The policy for Emeritus faculty has been revised. Please see attachment for the revised |

Advancing your Career in Biomedical Research
On June 3, 2014, from 8 AM to Noon, BRT room 115, the Center for Clinical and Translat
Science presents a Tools of the Trade program that will provide early career biomedical
researchers the basic information they need for a successful research career. Featuring
presentations by researchers and research staff who are both knowledgeable and skilled
communicators, topics include: Getting Protocols Approved by the IRB, Grant Writing Do
Don'ts, Managing Grants, Getting Your Manuscript Published.

Questions? Contact: stuart.hobbs@osumc.edu

Please register here: https://redcap.bmi.osumc.edu/redcap/surveys/?s=tgXha435As

See flyer for event here.

Science Communication Workshop
The Life Sciences Network will be hosting a special workshop on June 10 & 11 for gradua
students and postdocs in the life sciences. The Science Communication Workshop: Wri
Make an Impact (https://lsn.osu.edu/writing-workshop) will bring together leading life
scientists and science writers from across campus to teach trainees the strategies for bu
stronger manuscript, what it takes to get published, and tips for writing more effectively.

Space is limited to graduate students and postdocs and is geared specifically toward the
sciences.

See flyer.

MSTP and SUCCESS Program Review & Update

Wednesday, May 21, 2014
1 pm - 2 pm
105 Biomedical Research Tower
Light refreshments will be served

Presented by:
MSTP Director Dr. Larry Schlesinger and MSTP Associate Director and SUCCESS Progr
Director Dr. Lawrence Kirschner

Postdoc Fellowship in Neural Stem Cell and Developmental Neurobiology

The Divisions of Developmental Biology and Pediatric Neurosurgery at Cincinnati Children's Hospital (CCHMC) have an immediate opening in Dr Timothy Vogel's lab for postdoctoral Research Fellows to study developmental neuroscience, focusing on cilia signaling in neural progenitor cells in murine models. The major goals of our research are to understand neural stem cell differentiation and ciliary signaling mechanisms that lead to common neural developmental conditions seen in humans (For details see Nature Medicine 18, 1797-1804 (2012)). Our lab employs a number of ciliopathy mouse genetic models with in vivo and in vitro systems to study the genesis of hydrocephalus. These include novel in vivo cilia subcellular imaging techniques, molecular/cellular neurobiology, protein biochemistry, genetic, and pharmacological methods. Our lab has a strong interest in translational neuroscience research and is focused on developing novel medical therapies in our cilia models. For more information about current projects see: http://www.cincinnatichildrens.org/research/divisions/n/neurosurgery/labs/vogel/c

Highly motivated postdoctoral candidates with a Ph.D. or M.D./Ph.D. in neuroscience, genetic developmental biology, molecular/cellular biology, regenerative biology, or biochemistry are encouraged to apply. A strong background in biochemical, cellular, neuroscience, genetic developmental biology in mouse models is preferred.

Please apply by submitting an on-line application to:
Timothy Vogel
Tim.vogel@cchmc.org
Please upload a brief statement of scientific/research interests, your curriculum vitae, and a list of 3 references.
Questions? E-mail Research@cchmc.org

Cincinnati Children's Hospital Medical Center is an Affirmative Action/Equal Opportunity Employer.
