Ohio State’s Wheelchair Seating and Positioning Clinic

Ohio State’s Wheelchair Seating and Positioning Clinic is designed to bring clients and their families together with our trained professionals and accredited wheelchair vendors to provide custom wheelchair and seating solutions. Our goals are to improve mobility, productivity, comfort and quality of life for disabled individuals.

Each client is evaluated by a team that consists of an assistive technology practitioner (ATP), a certified occupational therapist (OT) or physical therapist (PT) and a certified rehabilitation technology supplier (CRTS) wheelchair vendor to ensure the individual receives the most appropriate equipment for his or her needs.

**Specialty-Trained Staff**
Ohio State’s rehabilitation program is the only therapy group in Ohio with five certified ATPs on staff. These professionals have specialty training in the fitting and provision of assistive technology, including wheelchairs. OSU is a leader in the practice of wheelchair positioning and seating, and clinic staff are often requested to present in national and international seminars. Some of these include the International Seating Symposium, RESNA, Clinician Task Force, AOTA and APTA.
