Update on SAMP Global Health Service Learning Course

DPT and MOT students and faculty participated in SAMP's Global Health Service Learning Course in December 2010. The eight DPT students worked in nursing homes, schools, pediatric early intervention settings and volunteered in two homes for children.

Thank you to all the donors this year who provided funds for personal care items and gait belts. This year donations also enabled us to provide each faculty member with a cell phone for local calls, which greatly enhanced communication between teams and added another measure of safety. To learn more about the service learning course and how you can help, please contact Dale Deubler at deubler.1@osu.edu.

If you would like to make a donation to the PT scholarship fund (#480178) or the PT development fund (#307895) visit the Give to OSU web page.
