

Combined Internal Medicine-Pediatrics Residents PGY1

	<p>Suranjana Dey, MD Contact: Suranjana.Dey@osumc.edu Hometown: Mobile, AL Undergrad: Emory University Medical School: University of Alabama at Birmingham School of Medicine Why OSU/NCH for residency: OSU/NCH had everything I was looking for: large, well-balanced IM and Peds, a strong Med-Peds presence, a dedicated Med-Peds Clinic, strong academics, opportunities to explore advocacy, and amazing people I met before and on interview day. Also, I was definitely swayed by ice cream during our interview tour and hearing about all the fun it seemed like the residents had - nowhere else did I hear about cookie decorating and Harry Potter themed parties! Career Plans and Interests: Academic Medicine - I'd love to see my own patients in clinic and teach in the hospital as well; also, very interested in preventive health and advocacy/policy Hobbies: hiking, taking walks, running, exercise dance classes/videos, traveling, reading, exploring breweries and restaurants with friends, spending time with/talking to my family and fiancé Favorite OSU or NCH rotation: I really enjoyed our Acute Care block! I loved getting to know our South High nurses and meeting residents and attendings early on Why choose Columbus? So far, I've loved exploring the metroparks - it's nice to have green spaces to walk, run, and bike. Also, I love living near Scioto and having such a beautiful place nearby to walk and run. I've also really enjoyed the unique diversity Columbus offers and have enjoyed the Mid-Western kindness I've heard so much about.</p>
	<p>Anna Downs, MD Contact: Ana.Downs@osumc.edu Hometown: Lexington, KY Undergrad: Furman University Medical School: University of Louisville Why OSU/NCH for residency: OSU med-peds was my very first interview and I kept comparing other programs to it! Everyone was immediately warm and welcoming. There are two amazing hospitals to train at - OSU and Nationwide Children's. The Med-Peds South High Clinic is an incredible place to go to every week and just soak in the med-peds goodness. There are med-peds trained physicians on both sides that are doing really interesting work, and so it's nice to be able to see all the many options that you have with med-peds training. The med-peds program truly is a family and I have felt so supported through some personal challenges. The med-peds residents are highly valued on both sides and have a reputation for being SMART, HARDWORKING, and</p>

	<p>NICE! Feel free to DM me on Twitter (@Anna_G_Downs) or email me to ask more about the program.</p> <p>Career Plans and Interests: I really like the heart, but not sure from there (classic med-peds)</p> <p>Hobbies: Reading, traveling, hanging out with my family, checking out new restaurants, makeup artistry</p> <p>Favorite OSU or NCH rotation: TBD!</p> <p>Why choose Columbus? Also TBD since I moved here during a pandemic, but the metro parks and thriving ice cream scene are current favorites</p>
	<p>Alan Gambрил, MD</p> <p>Contact: Alan.Gambрил@osumc.edu</p> <p>Hometown: Birmingham, AL</p> <p>Undergrad: University of Alabama</p> <p>Medical School: University of Alabama at Birmingham School of Medicine</p> <p>Why OSU/NCH for residency: OSU/NCH was my very first interview. I left incredibly excited by the fun and energetic residents, high academic caliber, quality facilities, and prioritized education initiatives. Most importantly, Med-Peds was permeated into every facet of the health system. No other program during interview season excited me to the same level.</p> <p>Career Plans and Interests: I plan to pursue a career in academic medicine. I am most interested pulmonology and hospital medicine/pediatrics.</p> <p>Hobbies: Crimson Tide sports and all college football. I know I'm in Buckeye country now, but Roll Tide! I also love reading, chicken wings, and spending time outside. However, my wonderful wife Maggie and I seem to spend most of our free time trying to coral our crazy dog, Bono.</p> <p>Favorite OSU or NCH rotation: Minimal exposure at this point, but Peds Heme/Onc was great. Attendings were outstanding teachers, and both Heme and Onc have great Med-Peds applications.</p> <p>Why choose Columbus? I love that, despite the city's size and numerous options for sports, dining, and entertainment, Columbus retains a relatively small feel and ease of navigation. I have found a lot of similarities with the South. The people are nice, college football is king, comfort food is easy to find, and it only takes a short drive to find yourself in rural or outdoorsy areas.</p>
	<p>Brandon Liebau, MD</p> <p>Contact: Brandon.Liebau@osumc.edu</p> <p>Hometown: Massillon, Ohio</p> <p>Undergrad: The Ohio State University</p> <p>Medical School: The Ohio State University again!</p> <p>Why OSU/NCH for residency: While here as a medical student, I quickly learned that the Med-Peds residents were highly regarded amongst their peers and even nurses and other staff. I knew wanted to be a physician of that caliber and knew that this program</p>

would train me to be an excellent physician. I also really enjoyed working with the residents and thought they were a fun group of people. Plus, we have a huge number of faculty who are Med-Peds which creates an incredible opportunity for mentors and role models to help shape your own unique niche. Both hospitals are equipped to handle the most complex and difficult patients, so you'll have an opportunity to "see-it-all" while you're here. We also have a diverse patient population whether it's rich or poor, uneducated or educated, urban or rural, immigrant or native-born, or people from a multitude of races, creeds, ethnicities, and cultures. I've also called Columbus home for the past 8 years. With all the friends and opportunities in Columbus, plus a top Med-Peds program, I couldn't imagine being anywhere else!

Career Plans and Interests: I'm leaning towards primary care with some hospital medicine mixed in, but I'm still keeping my options open. If I pursue fellowship, it would likely be in Adult Pulm/Crit

Hobbies: I really enjoy getting active by playing soccer, volleyball, and golf. I do anything with friends, but I do like concerts, bar trivia, board games, Columbus Crew games, and supporting the Buckeyes.

Favorite OSU or NCH rotation: My favorite clinical activity is actually our half-day in clinic! I feel really at home with my other Med Peds colleagues and working in a primary care setting.

Why choose Columbus? What's not to love about Columbus? Columbus has an eclectic population from all walks of life. Lots of people from different areas of Ohio are moving to Columbus, bringing their urban and rural roots with them. There's also a ton of people moving to Columbus, and the city is building the housing to match the increased demand. Columbus is full of young professionals in and around the city, and there are also several great suburbs that are more family-oriented. There are lots of different backgrounds, cultures, and lifestyles, so you can connect with pretty much any type of person in Columbus. This also means we are a test-market for most chains (I was eating McGriddles for dinner 6 months before the rest of the world knew of all-day breakfast at McDonalds). Of course, we also have a plethora of awesome local restaurants. I also really appreciate being able to drive anywhere in the city in under 30 minutes, including metro parks for hiking, Alum Creek, or Lynd's Fruit farm for apple picking. Columbus has a great music scene. From dive bars to arenas and stadiums, you can see just about any musical act. There's also a strong art scene in the Short North and Franklinton. Once per month, galleries and stores are open late for the Gallery Hop or Franklinton Fridays. Although the Buckeyes are our source of football and

	<p>basketball, Columbus hosts an MLS team, NHL team, and Cleveland Indians AAA affiliate. Tickets are super affordable and it's a great time with friends (can't beat dime-a-dog night at the Clippers!). I also enjoy golfing in my free time, and there are numerous municipal and private courses to play.</p>
	<p>Mariel McGuiness, MD Contact: Mariel.McGuiness@osumc.edu Hometown: Chagrin Falls, OH Undergrad: The Ohio State University Medical School: The Ohio State University (Go Bucks!) Why OSU/NCH for residency: 100% for the fantastic people! OSU and NCH both have excellent reputations in clinical care and provide ample opportunities in any area of medicine you have an interest. I absolutely loved my four years at OSU as a medical student, and the Med-Peds residents and attendings I worked with were hands-down my favorite people. There's a ton of Med-Peds pride and our speciality is very well-regarded at both institutions. Career Plans and Interests: Unsure for now, but I am interested in pulmonology and infectious disease. Hobbies: Hiking, running, exploring Columbus's brewery scene, playing board games Favorite OSU or NCH rotation: So far I have really enjoyed Peds Infectious Disease. Why choose Columbus? Columbus is an incredible city to live in. It has so many great public amenities, but you don't have to deal with the cost or hassle of living in a big city. There is so much Columbus pride, and many people who move here end up putting down roots since it's such an appealing place to live (take it from someone who will happily be here for 12+ years). My favorite thing about Columbus is the abundance of public parks and green spaces, which make it so easy to get outside and enjoy nature even with a hectic resident schedule.</p>
	<p>Temi Olojo, DO Contact: Temi.Olojo@osumc.edu Hometown: Westland, MI Undergrad: Univ of Michigan Medical School: Michigan State Why OSU/NCH for residency: I was initially drawn to this program because of the balanced training on both peds and medicine. It was important to me to be at a program that was strong on both sides. On interview day, I felt that I clicked well with the residents, and loved the camaraderie among them. Lastly, I loved the idea of training at a place with such a large med-peds faculty presence. I thought I could benefit greatly from that level of support and mentorship throughout my training. Career Plans and Interests: Combined hospitalist hopefully!</p>

Combined Internal Medicine-Pediatrics Residents PGY1

	<p>Hobbies: I'm a big sports fan, love to play and watch basketball, soccer, volleyball, tennis, and pretty much anything else</p> <p>Favorite OSU or NCH rotation: So far I have loved medicine nights the most!</p> <p>Why choose Columbus? I haven't been here very long, but so far I am enjoying the wide array of foods available! I feel like there's a new food truck on every block. Definitely looking forward to finding new things to explore and do in Columbus!</p>
	<p>Nathan Parisi, MD Contact: Nathan.Parisi@osumc.edu Hometown: Naperville, IL Undergrad: The University of Notre Dame Medical School: Rush Medical College Why OSU/NCH for residency: I really liked the strong med peds presence at OSU. Both institutions are well regarded, and the med peds program is highly valued at both locations! You are truly 100% IM and 100% peds and welcomed by each categorical program as such. I also thought the med peds residents at OSU were the best I met on the interview trail; everyone is so kind, down to earth, and it's a very close knit group! I wanted somewhere that the residents truly got along well, and I think OSU med peds embodies the "med peds family" vibe. I also really liked the combined med peds clinic with ancillary services right on site (social work, dietician, etc) to give your patients even more services right at their fingertips. We also get to take care of a unique patient population in clinic that makes the work that much more rewarding. Career Plans and Interests: Undecided, but interested in medical education and academic medicine. Hobbies: Music, playing various sports, Notre Dame football, outdoor activities/hiking, board games, eating Favorite OSU or NCH rotation: I enjoyed spending lots of time at South High Primary Care Center (our combined med peds clinic) on my Acute Care block! Why choose Columbus? I've loved the running/bike paths! They've been a great way to explore the city while being outside.</p>
	<p>Stephen Ream, MD Contact: Stephen.Ream@osumc.edu Hometown: St. Louis, MO Undergrad: Saint Louis University Medical School: Saint Louis University School of Medicine Why OSU/NCH for residency: I really valued the balance between IM and Peds while simultaneously having a very strong Med Peds presence, the great exposure to pediatric and adult congenital heart disease, and ultimately the deciding factor for me was that the residents were genuinely happy and fun to be around.</p>

Combined Internal Medicine-Pediatrics Residents PGY1

	<p>Career Plans and Interests: congenital heart disease, refugee health, healthcare ethics</p> <p>Favorite OSU or NCH rotation: Just getting started, but thoroughly enjoyed my time in the MICU and learned a ton!</p> <p>Why choose Columbus? So far I enjoy having a house not far from the medical centers with easy access to everything in the city. Looking forward to exploring more in the future!</p>
	<p>Jeanette Schnierle, MD</p> <p>Contact: Jeanette.Schnierle@osumc.edu</p> <p>Hometown: Grosse Ile, MI and Hermosillo, Sonora, Mexico</p> <p>Undergrad: Harvard University</p> <p>Medical School: The Ohio State University</p> <p>Why OSU/NCH for residency: I really looked up to the Med Peds residents here during medical school, and loved that we have such a large Med Peds presence among faculty at NCH/OSU. These programs are strong, offer so many resources and opportunities to explore interests, and most of all, have a very tight-knit community that is only growing. Also, NCH is the most beautiful children's hospital!!</p> <p>Career Plans and Interests: Not sure, but I hope to integrate my public health background and interest in addressing racial/ethnic disparities with hospitalist medicine and/or primary care!</p> <p>Hobbies: salsa/bachata dancing, checking out new metroparks, getting food/drinks with friends</p> <p>Favorite OSU or NCH rotation: Pediatric Infectious Diseases!</p> <p>Why choose Columbus? It's affordable, has a city-yet-small-town feel, offers a variety of activities, and you can basically get anywhere you need to be within 10-20 minutes!</p>
	<p>Sarah Sprauer, MD</p> <p>Contact: Sarah.Sprauer@osumc.edu</p> <p>Hometown: Dayton, OH</p> <p>Undergrad: Duquesne University</p> <p>Medical School: The Ohio State University College of Medicine</p> <p>Why OSU/NCH for residency: The people! But I also felt the IM and pediatric residency programs are strong with exposure to wide variety of pathophysiology and Med-Peds has a strong presence at both institutions.</p> <p>Career Plans and Interests: I'm typical med-peds and love everything! We'll see what I end up doing in a couple years.</p> <p>Hobbies: Spending time with family and friends, playing with my dog, running, hiking</p> <p>Favorite OSU or NCH rotation: I haven't done many, but I loved the Acute Coronary Service at OSU.</p>

Combined Internal Medicine-Pediatrics Residents PGY1

	Why choose Columbus? Metro parks, restaurants, being close to family
