

DERBY STUDY

...for GA Secondary to AMD

Dry Macular Degeneration

Phase III, multi-center, randomized, double-masked, sham-controlled study to compare the efficacy and safety of intravitreal APL-2 therapy with sham injections in patients with geographic atrophy (GA) secondary to age-related macular degeneration (AMD)

*Principal Investigator
Dr. Matthew Ohr*

INCLUSION CRITERIA:

- At least 60 years of age with clinical diagnosis of GA of the macular secondary to AMD
- GA lesion must be at least 2.5 mm² and no more than 17.5 mm².
- ETDRS score of 24 letters or better (approximately Snellen equivalent of at least 20/320)

EXCLUSION CRITERIA:

- GA secondary to a condition other than AMD in either eye
- Spherical equivalent of the refractive error demonstrating more than six diopters of myopia
- Any history or active choroidal neovascularization
- Prior participation in another interventional clinical study for intravitreal therapies in either eye
- History of prior intravitreal injection in the study eye
