

## ENDOCRINE/REPRODUCTIVE BLOCK

### ONE MINUTE LEARNER HUDDLE – STUDENT

Have this brief discussion with your preceptor before the session starts

- Prepare by thinking about your learning goals before your huddle with your preceptor
- Preview the schedule and charts

“Can I touch base with you quickly about the plan for this clinical session?”

---

#### 1. GOALS:           Remember to be specific!

##### PICK 2-3 GOALS FOR EACH SESSION

- Respectfully communicate with patients, staff, and other team members.
- Practice taking a family and social history
  
- Identify how the office conducts referrals to obtain imaging or consultation with subspecialists
  
- Work with office to preapprove an insurance claim for procedure or identify the charges for one visit and one procedure
  
- Work with office staff that take patient calls to schedule timely appointments to provide continuity of care.
  
- Use the USPTF website introduced in Longitudinal Group to develop a health prevention or health maintenance plan for a patient
  
- **Direct observation of obtaining family history and social history, WITH feedback**

#### 2. GETTING GOING: When, how and who should I see?

- Which session should I do my direct observation?
  
- Select a patient with your preceptor to directly observe you obtaining CC/ HPI and past medical history including medication and allergies, WITH feedback from preceptor

#### 3. HOW MUCH AND HOW LONG

- “How much of the visit should I do on my own?”
- “How long should I spend with the patient?”

#### 4. QUESTIONS:

- “When is a good time to ask questions that come up?”
