### Academic majors

Many Ohio State medical students have undergraduate degrees in biology or one of the other foundational sciences, but a good many major in one or more of the arts and social sciences. While some science is necessary, here at Ohio State we believe that a balanced, diverse class of students enriches the educational experience of all. That’s why we take a holistic approach to selecting our classes, giving balanced consideration to each student’s unique set of experiences, attributes, and academic metrics. In addition to biology, chemistry and the other foundational sciences, members of the entering class of 2016 have degrees ranging from anthropology and psychology to music and dance; from economics and business to linguistics and literature; and from political science and history to classics and film.
