*Diversity in STEM Networking Event

SACNAS OSU Presents: The 4th Annual Ciencias at Ohio State

Come connect with URM STEM students and professionals at Ohio State. All are welcome: undergraduate, graduate, postdoc, faculty and staff. Meet fellow STEM buckeyes and possibly your future mentor or mentee. We'll network in a relaxed atmosphere over delicious empanadas from a local Latino business.

September 26 | 4-5pm
MBI Lounge - Jennings Hall

RSVP
Please direct questions to SACNAS OSU

Annual Flu Shot Compliance

All faculty and staff must comply with the seasonal flu vaccine policy each year by Saturday, Dec. 1. Compliance with the seasonal flu policy is nondiscretionary and applies to faculty, staff and paid students of The Ohio State Wexner Medical Center, including The Ohio State University Comprehensive Cancer Center - Arthur G. James Cancer Hospital and Richard J. Solove Research Institute and the College of Medicine and Health Sciences.

Flu vaccinations will be available Thursday, Sept. 20 through Thursday, Nov. 27. Read more information about dates/locations/times.

As a faculty or staff member, you have the following flu vaccine options:

- Get vaccinated at an Ohio State Wexner Medical Center flu shot blitz, by your unit's ambassador or at University Health Services (201 McCampbell) during regular business hours. This is the easiest and quickest way to become compliant because no documentation is required.

- Get vaccinated with your provider or at another location. Even if you have an Ohio State provider, you must take the Influenza Vaccination Documentation/Exemption Form for your provider to complete and return it by Thursday, Nov. 15. In addition to the form, you must also provide your receipt as proof of
vaccination.
- Claim a medical or other exemption. Complete and return the Influenza Vaccination Documentation/Exemption Form and this year's influenza CBL by Saturday, Dec. 1 to be in compliance. See step-by-step instructions for being in compliance when you claim medical exemption or other exemption.

Once you have completed your annual requirements, please make sure to check your compliance status online by logging onto your Employee Compliance site. Noncompliance beyond the deadline will result in corrective action and loss of computer access.

**BSGP Authorship Guidelines**

Publication guidelines for OSU (attached here) cover whether an individual should be included as an author for a manuscript. The BSGP graduate faculty recently adopted general guidelines about authorship; these guidelines are intended to be general and may not cover every specific situation. These guidelines are included in the BSGP Handbook as Appendix R.

**OSUN Seminar Series for Fall Semester**

The OSU Nutrition Seminar series calendar is now up on the OSUN website and also attached.

The seminar is held in 252 Campbell Hall on Fridays at 11:45.

**Updated list of Current Lab Rotation Openings**

Click here to see the updated spreadsheet of faculty members who are now taking students.

**Professional School Orchestra**

The professional school orchestra is gearing up for its 2018-2019 season. We are now in the process of recruiting players. Anyone enrolled in a graduate or professional program is eligible to play, regardless of experience level (as long as you play an instrument!). We are a full orchestra, meaning we have parts for brass, woodwinds, strings, and percussion (and occasionally piano).

Our tentative first rehearsal date is Tuesday, September 11th from 6-7:30 in Meiling 160. Rehearsals will occur weekly on Tuesdays from 6-7:30. Concert dates are still being planned, but will likely be in early to mid-December (one evening and one noon concert). We wanted to let you guys know this early in case your instrument is currently not on campus. If you have a friend enrolled in another graduate or professional program (Pharmacy, Dentistry, Vet med, Optometry, Law, etc.) that plays an instrument, we would appreciate you reaching out to them and letting them know of this opportunity.

So that we are better able to plan for the first rehearsal, please fill out this google spreadsheet so we have an idea of the instrumentation and personnel for this coming season.

**Tools of the Trade: Launching Your Biomedical Research Career**

September 25, 2018 | 8 AM to 2 PM
James Conference Center L035

The Center for Clinical and Translational Science presents "Tools of the
Trade: Launching Your Biomedical Research Career. Plenary Sessions will address:

- Strategies for Successful Mentee-Driven Mentorship, by Mark Hall, MD, Nationwide Children's Hospital
- Research services available from the CCTS.

Sessions in the Research track include grant writing, the IRB process, and conducting rigorous, reproducible research.

Sessions in the Management & Leadership track include staffing your research team, project management, and budgeting.

Meeting with Distinguished Speaker Julie Pfeiffer (IDI)

Dear Infectious Diseases Community,

Dr. Julie Pfeiffer, Professor from University of Texas Southwestern Medical Center, will be visiting the OSU campus October 1st-3rd as the distinguished speaker for our Annual Meeting on October 2nd (9am-3pm). Her work focuses on enteric virus pathogens, virus evolution, and the effects of intestinal bacteria on virus replication and transmission.

Please let us know if you would like to meet during the following dates/times:

1. October 3rd for breakfast (8am-9am)
2. October 3rd in the morning (9:30am-12:30pm)

We will let you know if there are other times she becomes available to meet with IDI members.

We will do our best to accommodate your request.

Thanks!
IDI@osu.edu

IDI Annual Meeting

You're Invited!

The IDI Annual Meeting is fast approaching and we want you to be a part of it. We have a full day of programming on October 2nd from 9am-3pm. Lunch will be provided. RSVP here and keep an eye out for the full agenda coming soon.

Course Offerings

Translational NeuroImmunology Seminar/HTHRHSC 7595

1 credit hour (can repeat up to 4 credit hours)
Thursdays 11 am-12 pm | IBMR 109
Instructor: Mireia Guerau (gueraulaboratory.com)

Course description: This seminar course is designed for graduate level students involved in basic or translational research in Immunology and/or Neuroscience. Students develop skills in teaching, analyzing, discussing, synthesizing and presenting immunology and neuroscience research. Students develop a classic and a contemporary (3-minute thesis) research presentation and critically appraise peer research, including a few national level speaker presentations. Successful students are able to: 1. Understand complex Immunology or Neuroscience concepts for interpretation of Translational NeuroImmunology research. 2. Demonstrate understanding of Immunological or Neuroscience concepts 3. Apply research concepts or ideas to their field/research question 4.
Analyze and break down the objectives and essential elements for successful delivery of various research presentation formats, such as keynote and 3-minute thesis. 5. Create and peer-evaluate research presentations of various formats.

**Specific Topics Autumn 2018:** Plans for this semester are focused on the impact of immune (such as T cells or myeloid cells) and neurological (such as microglia or astrocytes) and environmental (such as microbiota or stress) systems on disease. Disease models may include animal models of Multiple Sclerosis, cancer and behavior.

**Grading:** Satisfactory/Unsatisfactory based on attendance, developing a full and a 3-minute thesis research presentation and peer-review of presentations.

---

**Advanced Skeletal Biology: Clinical Perspectives**

HthRhSc 8891: Autumn 2018
Mondays 1-4pm
3 credit hours

The course will examine research-based multidisciplinary concepts with an emphasis on application to students’ clinical areas of interest. Graduate students from all disciplines are welcome, including (but not limited to): Health & Rehabilitation Sciences, Biomedical Engineering, and Anthropology.

For more information contact course instructors: Randee Hunter, PhD  Amanda Agnew, PhD

---

**NEURSGY 8250 Course Offering**

Biology of the Tumor Microenvironment (NEURSGY 8250) graduate course will be offered fall semester and is open to BSGP students. Topics include stem cells, angiogenesis, EMT, metastasis, and tumor immunity. Please see the attached course flyer for more information.

---

**Fellowships**

**Ford Foundation Fellowship Programs**

The National Academies of Sciences, Engineering, and Medicine is accepting applications for the 2019 Ford Foundation Fellowship Programs. Eligibility and online application information are available on the Ford Foundation Fellowship Programs website.

Through its Fellowship Programs, the Ford Foundation seeks to increase the diversity of the nation’s college and university faculties by increasing their ethnic and racial diversity, to maximize the educational benefits of diversity, and to increase the number of professors who can and will use diversity as a resource for enriching the education of all students.

Eligibility Requirements:

- U. S. citizens, U.S. nationals, U.S. permanent residents (holders of a Permanent Resident Card), as well as individuals granted deferred action status under the Deferred Action for Childhood Arrivals Program (DACA) program¹, political asylees, and refugees, regardless of race, national origin, religion, gender, age, disability, or sexual orientation
- Individuals with evidence of superior academic achievement (such as grade point average, class rank, honors or other designations), and
- Individuals committed to a career in teaching and research at the college or university level in a research-based field of science, social science, or humanities

¹Eligibility includes individuals with current status under the Deferred Action for Childhood Arrivals Program (DACA) program.
DACA Program, as well as individuals whose status may have lapsed but who continue to meet all the USCIS guidelines for DACA available [here](#).

**Stipends:**
- Predoctoral--$24,000 per year for three years
- Dissertation--$25,000 for one year
- Postdoctoral--$45,000 for one year

Awardees will have expenses paid to attend at least one Conference of Ford Fellows. Approximately 70 predoctoral, 36 dissertation, and 24 postdoctoral fellowships will be awarded.

**Application Deadline Dates:**
- Predoctoral: December 13, 2018 (5:00 PM EST)
- Dissertation: December 6, 2018 (5:00 PM EST)
- Postdoctoral: December 6, 2018 (5:00 PM EST)

**Supplementary Materials receipt deadline for submitted applications is January 8, 2019 (5:00 PM EST)**

**T32 Congenital & Acquired Heart Disease Fellowship Program**

A postdoctoral fellow position is available for the T32 Fellowship Program entitled, "Training in Congenital and Acquired Heart Disease." The program is jointly hosted by the Research Institute at Nationwide Children's Hospital and the Dorothy M. Davis Heart and Lung Research Institute at The Ohio State University (PIs: Dr. Vidu Garg and Dr. Peter Mohler).

See the attached [flyer](#) for more information

**Postdoc Fellow Position | NIH/NIA-Intramural Research Program**

Please see the attached [flyer](#) for more information about this opportunity.

**American Society of Human Genetics Fellowship Opportunities**

**Genetics Education & Engagement Fellowship**
This fellowship program is designed for genetics professionals (or life scientists with substantial experience in genetics or genomics) who: have an advanced degree, are early in their careers, and are interested in developing and implementing genetic and genomic literacy, engagement, diversity, and/or professional development initiatives for audiences comprising K-12, undergraduate, graduate, post-graduate, and professional. The fellow will participate in rotations at the NHGRI and ASHG, and typically a third organization involved in genetic and genomic literacy, engagement, diversity, or professional development.

**Genetics & Public Policy Fellowship**
This is a fellowship program designed for genetics professionals with an advanced degree who are early in their careers and interested in the development and implementation of genetics-related health and research policies at a national level. The fellow will have the opportunity to participate in policy analysis at NHGRI and ASHG, and to work directly within the U.S. Congress.

**Post-Doc Opportunities**

*Postdoc Positions in OSU's Dept of Cancer Biology and Genetics*

Dr. Wang is looking for postdoc students to join her lab. Since her lab
website has not been posted yet, her faculty profile has been attached. Please contact Dr. Wang if you are interested.

Two Post-Doctoral Research Scholar Positions in Bioinformatics

A Statistical Bioinformatics Lab (http://www.healthcare.uiowa.edu/labs/au/) relocated to the Department of Biomedical Informatics at Ohio State University this August and we are seeking candidates for two postdoctoral research scholar positions and graduate research assistants to work on the following areas of genomics and sequencing data analysis:

1) Bioinformatics method development: We are looking for a postdoctoral scholar or graduate research assistant to develop statistical and computational/algorithmic methods for high-throughput sequencing data analyses, such as transcriptome, epigenetics and genome. Background on mathematics, statistics, computer science or degree in a related field is desirable.

2) Computational biology: We are looking for a postdoctoral scholar or graduate research assistant in biology background. Our lab performs world leading science in development process and cancer research. Our team focuses on making meaningful advances to understand development process and cancer, using cutting edge technologies (Third Generation Sequencing technologies, such as PacBio and Oxford Nanopore Technologies) to create authentic models and gain novel biological insights in transcriptome and epigenetics level. A typical candidate would have skills in including but not limited to implementing basic in-house bioinformatics tools, collaborating with statistician and computational biologists to elucidate biological discovery and mining out biological insights. Background in biology, computational biology or bioinformatics is desirable.

The postdoctoral research scholars and graduate research assistants will have the opportunity to collaborate with internationally recognized biomedical scientists at Stanford University and University of Oxford.

Interested candidates are very welcomed to meet Prof. Kin Fai Au at Lincoln Tower to learn more about the science and research that the Statistical Bioinformatics Laboratory is working on. Please email Prof. Kin Fai Au at KinFai.Au@osumc.edu to set up an appointment.

Position Opening- Scientist I at the Center for Immuno-Oncology

Please see the attached link for more information regarding an opening at the Dana-Farber Cancer Institute in Boston, MA.

Post-Doctoral Associate- Moscat Lab

On the role of inflammation and metabolism in colorectal and liver cancer initiation and progression

One fully funded postdoctoral position is available in the laboratory of Jorge Moscat to study signaling and metabolic pathways in tumorigenesis and the role of the stroma and the tumor microenvironment. The project is based on our recent publications in Cell (2013, 2016), Cancer Cell (2014, 2016, 2017, 2018) Cell Reports (2015, 2016), and Cell Metabolism (2014, 2017), and will use mouse models and cell based studies and the interrogation of human cancer samples.

Requirements: We are looking for highly motivated and enthusiastic individuals who are interested in this very competitive topic, and with expertise in this area and with experience in mouse models. Candidates must have a Ph.D. or M.D. degree. Interested applicants should submit a single PDF file containing CV, a brief description of research
Post Doctoral Scientist - Cardiovascular Research

Please see the [webpage](https://www.nationwidechildrenshospital.org) for more information regarding a job opening at Nationwide Children's Hospital.

Post-Doctoral position - Cancer Metabolism, OSUCCC

**Position Description:**
We are seeking an enthusiastic and motivated postdoctoral fellow to join the group of Dr. Ioanna Papandreou, in the department of Radiation Oncology at the OSUCCC. We use genetically engineered mouse models of solid tumors and in vitro approaches to understand hypoxic tumor physiology, particularly lipid storage mechanisms, and to delineate the mechanisms by which these metabolic adaptations impact malignant progression. The ideal candidate will have a strong background in biochemistry or cell biology and a publication record in peer-reviewed journals. Experience in confocal microscopy, animal handling or metabolic assays is desirable.

**Contact:**
Interested applicants should submit their current curriculum vitae and the names and contact information of two references to [Ioanna.Papandreou@osumc.edu](mailto:Ioanna.Papandreou@osumc.edu). Please indicate postdoc application in the title of the email.

Postdoctoral Opportunity at Yale University

Please see the [attachment](attachment) for more information regarding this position.

Dr. Inan Olmez Lab Opportunities

Dr. Olmez is a new faculty member in the division of Neuro-Oncology at OSU. He is looking for 2 post-doc researchers to work on neural stem cell and brain tumor related projects. Anyone with background in cancer biology or neuroscience is welcomed. Prior experience in cellular reprogramming, proteomics, or immune staining will be favorable.

If you have any interest, please contact [Dr. Olmez](mailto:Dr.Olmez) for more information.

Current Postdoctoral Openings at Cincinnati Children's Hospital

Please see the attached [flyer](attachment) for more information regarding Cincinnati Children's Hospital Medical Center and their current position openings.

Assistant Professor Position Opening

The Department of Biology at Bryn Mawr College invites applications for a full-time, tenure-track Assistant Professor position in the area of Immunology to begin August 1, 2019. We are searching for a broadly trained individual whose immunological expertise will support programs in Biology, Biochemistry & Molecular Biology and Health Studies. The successful candidate will thrive in an environment that combines teaching, research and interdisciplinary collaboration, establishing an externally funded research program that includes involvement of undergraduate students of diverse backgrounds. Teaching responsibilities will include courses in immunology and in the candidate's area of expertise, participation in the team-taught introductory biology sequence, and regular contributions to the Health Studies minor. Candidates who have the potential to contribute to the Neuroscience or Environmental Studies minor and/or other College initiatives are especially encouraged to apply. A Ph.D. and at least one year of post-doctoral research experience are required by the start date.
To apply for this position, candidates must submit a cover letter, curriculum vitae, research statement and teaching philosophy that includes a short description of potential courses to be offered by October 5, 2018 to Biology Search Committee via Interfolio at: [https://apply.interfolio.com/52079](https://apply.interfolio.com/52079). In addition, arrange for three letters of recommendation to be submitted via Interfolio to the Biology Search Committee. Applications received by October 5, 2018 will receive full consideration.

Other News and Events

*Training Opportunities at the NIH*

**Clinical and Translational Research Course for Ph.D. Students**

Two-week intensive introductory course to demonstrate the role of PhD scientists in clinical and translational research, provide an overview and examples of how basic science and clinical observations lead to translational research, and increase awareness and access to Ph.D. role models, research resources, and potential career opportunities at the NIH. [https://cc.nih.gov/training/phdcourse/index.html](https://cc.nih.gov/training/phdcourse/index.html)

**Postdoctoral Research Training Awards**

Provides the opportunity for recent doctoral degree recipients to enhance their research skills in the resource-rich National Institutes of Health (NIH) environment, which consists of more than 1200 laboratories/research projects. [https://www.training.nih.gov/programs/postdoc_irp](https://www.training.nih.gov/programs/postdoc_irp)

**Graduate Partnerships Program**

This program is designed to bring PhD graduate students to the NIH Intramural Research Program for dissertation research. [https://www.training.nih.gov/programs/gpp](https://www.training.nih.gov/programs/gpp)

**Core Curriculum in Clinical Research**

Free courses offered include: Introduction to the Principles and Practice of Clinical Research (IPPCR); Principles of Clinical Pharmacology (PCP); and Ethical and Regulatory Aspects of Clinical Research. These courses are offered as distance learning courses. [https://cc.nih.gov/training/training1.html](https://cc.nih.gov/training/training1.html)

**NIH Opportunity for Aspiring Biomedical Researchers**

The National Institute of Allergy and Infectious Diseases (NIAID), one of the largest Institutes at the National Institutes of Health (NIH), is looking for science students with a passion to advance global health research in the 21st century for its Intramural NIAID Research Opportunities (INRO) program, held February 4-7, 2019, in Bethesda, Maryland. Selected INRO students visit NIAID to learn about the breadth of research we do in the areas of allergy, immunology, and infectious diseases from world-renowned scientists and interview for potential research training positions.

[Find out more about INRO](https://cc.nih.gov/training/training1.html)

**Changes to HSL Space and Hours**

Please see the attachment for more information.

Piloting earlier hours on Sunday (starting September 9). Please do note that the library will be closing on several football Saturdays this year - including this upcoming Saturday - September 1 - as well as September 8 and 22. Please read the attached bulletin for more information about renovations, services and hours.

**TEC Lab Application**
TEC Lab is a FREE professional development workshop series aimed at STEMM grad students and post-docs. Please see the attached flyer for more information including the application.

Graduate Student Workshop Series
Please see the attachment for more information on events being offered by University Libraries.

Need Help? CCS is here for you!
COUNSELING AND CONSULTATION SERVICE

WHO WE ARE
We promote personal well-being and the academic success of students by providing comprehensive mental health services.

Comprehensive Services Include:
- Individual Counseling
- Group Counseling
- Psychiatry
- Couple's Counseling
- Outreach and Workshops
- Crisis Support and Debriefing
- Consultation for Faculty, Staff and Loved Ones
- Community Referral

We're Here To Help With:
- Stress Management
- Life Transitions
- Academic Concerns
- Identity Exploration
- Relationship Problems
- Substance Use
- Eating Concerns
- Anxiety
- Depression
- And Much More
