$5 million from Greif over five years to provide health professionals and medical training to people in needy countries.

The goal is a permanent, self-sustaining system that will educate and train doctors and other health professionals in specialty care for mothers and children.

Practice focuses are:
- Prenatal care and safe childbirth
- Neonatal care
- Maternal and newborn care

Partners: The Ohio State University and the Global Health Delivery Partnership

GHDP is composed of:
- Brigham and Women’s Hospital’s Division of Global Health Equity
- Harvard Medical School’s Department of Global Health and Social Medicine
- Partners In Health

The announcement was made at a news conference held November 29, 2012, at the McCoy Center in New Albany, Ohio, by
- David Fischer, President and CEO of Greif Inc.;
- Dr. E. Gordon Gee, President of The Ohio State University;
- Dr. Paul Farmer, a founding director of Partners In Health, and
- Dr. Steven Gabbe, Ohio State’s Senior Vice President for Health Sciences.
- Dr. Elizabeth Nabel, President of Brigham and Women’s Hospital, could not attend but sent a video message expressing the hospital’s gratitude for the grant.
