SECTION 1: GENERAL INFORMATION

The Graduate Faculty of The OSU Genetic Counseling Graduate Program (OSU-GCGP) offers one degree: the M.S. in Genetic Counseling. There are two major documents that contain the rules, procedures, and guidelines for graduate students in the Genetic Counseling Graduate Program in the College of Medicine. The first of these documents is the Graduate School Handbook. The Graduate School Handbook contains the rules and procedures of the Graduate School of the Ohio State University. These are rules that are applied across the university.

The second document is this document: The OSU Genetic Counseling Graduate Program Policy and Procedures Manual (usually called the GC Student Handbook). The OSU-GCGP Program Handbook is found on the Program website.

The GC Student Handbook is intended to provide graduate students in the OSU-GCGP with guidance in pursuing an advanced program of study in genetic counseling within the College of Medicine. In this manual are statements of the requirements, procedures, and policies for the M.S. degree program offered by the OSU-GCGP. In addition, rules related to graduate studies and adopted by the Graduate Studies Committee are included. The formal mandate of the Graduate Studies Committee is defined in Section XIV of the Graduate School Handbook, which reads:

Each graduate program authorized to offer a graduate degree must have a Graduate Studies Committee. The Graduate Studies Committee oversees and administers its graduate programs and is the liaison between the Graduate School and the Graduate Faculty members in the graduate program.

To assure the high quality of the student experience and the graduate program itself, the graduate faculty of the OSU Genetic Counseling Graduate Program operates under the related rules, regulations, and policies established by the OSU-GCGP, the Graduate School, and the university. Where applicable, and to reduce confusion, some of the material in this Manual is verbatim repetition of material in the Graduate School Handbook. Other portions apply only to graduate students in the OSU-GCGP.

Student are advised to familiarize themselves with the relevant portions of these documents, as many University and Graduate School requirements are not repeated in this manual. It is each student’s responsibility to become familiar with and to comply with the various University and School requirements and regulations outlined in the Handbook. By carefully reading the entire Handbook, students should be able to avoid difficulties related to class scheduling, petitions, disciplinary action, and graduation.

In the case of differences in the requirements of the Graduate School and the OSU-GCGP, the stricter of the requirements takes precedence. The Graduate Studies Committee encourages students to bring any conflicting rules or information to the attention of the Committee or the OSU-GCGP Program Director(s). In the case of any conflicts within the Graduate School Handbook or the OSU-GCGP rules or procedures, the Graduate Studies Committee will determine the appropriate solution.
SECTION 2: THE OHIO STATE UNIVERSITY GENETIC COUNSELING GRADUATE PROGRAM

The Master’s degree of genetic counseling curriculum is planned and administered to provide the student with a range of knowledge, skills, and behaviors that are required for professional success as a genetic counselor. The educational program addresses foundational knowledge and contemporary issues in medical and psychosocial sciences that are significant to health care and its appropriate delivery to the consumer. The content of the total program is governed, reviewed, and revised in response historical, political, and social forces as they relate to health care. The Master’s of Genetic Counseling Graduate Program is accredited by the Accreditation Council for Genetic Counseling, PO Box 15632, Lenexa, KS, 66285.

MISSION
The mission of The Ohio State University Genetic Counseling Graduate Program is to train our graduates knowledgeable, compassionate, and scholarly genetic counselors.

PROGRAM GOALS
Graduates of The Ohio State Genetic Counseling Graduate Program will:

- Have a strong foundation of knowledge in genetics, medicine, and counseling.
- Have a strong professional identify.
- Be thought leaders in their jobs and the profession.
- Approach their work in a scholarly manner and contribute to the scientific literature.
- Have self-awareness and understanding of their professional strengths, weaknesses and limitations.
- Use critical thinking skills.
- Embody the principles of empathy, compassion, respect for diversity, advocacy, and ethics in their professional roles.
- Be life-long learners.

CURRICULAR GOALS
The curriculum for the graduate program in genetic counseling is designed to provide a foundation in integrated genetic medicine through a selection of core courses. It will proceed to emphasize sub-disciplines based on the expertise of the faculty associated with both didactic curriculum and thesis mentorship. The curriculum will seek to educate individuals capable of conducting independent research with in-depth specialized knowledge in one or more areas. The curriculum is designed to provide a solid educational, technical and experiential foundation for graduate students entering their choice of academic, industrial, regulatory, or other work forces. Finally, the curriculum will seek to provide an environment that nurtures and stimulates the research interests and the intellectual advancement of both students and faculty by providing a forum for scientific and professional discourse.
Graduates from this program will possess the following attributes and competencies:

- A thorough knowledge of the principles of human genetics with emphases on Mendelian and non-Mendelian inheritance, population and quantitative genetics, bases of human variation and disease susceptibility, family history taking and pedigree analysis, normal development/abnormal development, human reproduction.

- A unique perspective on the linkage of human genetics to the medical disciplines especially with regard to cytogenetics, biochemical genetics, molecular genetics, embryology/developmental genetics, teratology, and cancer genetics in the identification of the etiology and medical management of disease.

- Mastery of the principles and practice of clinical/medical genetics including clinical features and natural history of a broad range of genetic diseases, complex common disorders and syndromes of unknown etiology, understanding the diagnostic process, understanding genetic testing, utilizing risk assessment skills, and use of genetics literature, databases, and computerized tools.

- A comprehensive understanding of psychosocial content encompassing counseling theory, interviewing techniques, psychosocial development, family dynamics, dynamics of grief and bereavement, ethnocultural sensitivity and competency, and crisis intervention.

- An appreciation of the social, ethical, and legal issues as they pertain to the delivery of genetic services.

- Familiarity with health care delivery systems and principles of public health emphasizing health and social policy, community, regional and national resources, financial/reimbursement issues, and genetics as a component of public health services.

- An ability to develop and deliver appropriate educational materials and lectures to clients, students and colleagues in health and human services.

- A thorough knowledge of planning, organizing and conducting independent research following the norms and standards of the National Institutes of Health and other national research organizations and societies, and of methods to secure support and independent funding from government and private sources to maintain an independent research program.

- An ability to effectively communicate research findings both orally in small groups or seminars, and in written form in peer-reviewed, published papers to scientists both within and outside the field.

- An understanding of the importance of life-long learning.

**CODE OF CONDUCT**

The Ohio State University has developed a Code of Student conduct that can be accessed at the following website: the [http://studentconduct.osu.edu/](http://studentconduct.osu.edu/). In addition, the Genetic Counseling Graduate Program has a "Student Code of Ethics," outlined in this handbook, which defines expectations specific to our students. Each student is responsible for reading and following these expectations.
SECTION 3: PROGRAM ADMINISTRATION & FACULTY

GENETIC COUNSELING GRADUATE PROGRAM GRADUATE STUDIES COMMITTEE AND EXECUTIVE LEADERSHIP

The Graduate Studies Committee consists of the Program Director, who is chair of the Graduate Studies Committee, the Associate Director, and the Medical Director for the OSU-GCGP. The Graduate Studies committee is responsible for the conduct and administration of its graduate program. Included are responsibility for curriculum, admission to the program, evaluation of academic progress, and general oversight of the requirements and rules of the program, although some duties may be delegated to other faculty members and/or committees of the OSU-GCGP.

Actions taken by the committee are subject to approval, modification, or reversal by the OSU-GCGP Curriculum Development and Assessment Advisory Board. Decisions made by Graduate Studies Committees must comply with Graduate School rules. The Graduate Studies Committee assumes other responsibilities as assigned to it by the Graduate School, the Graduate Faculty members in the graduate program, the head of the academic unit, or the committee members. The committee reports on its actions taken during the year to OSU-GCGP Curriculum Development and Assessment Advisory Board and Graduate Program Faculty.

GENETIC COUNSELING GRADUATE PROGRAM FACULTY

Graduate students of the OSU-GCGP are enrolled in the Graduate School, not in any of the other university enrollment units. The Graduate Studies Committee in the OSU-GCGP also comes within the jurisdiction of the Graduate School and the Council on Research and Graduate Studies.
Not all people who teach classes at The Ohio State University are members of the Graduate Faculty. Those who are members of the Graduate Faculty can be designated as holding either Category M status (able to serve on master’s examination committees and serve as advisor for master's degree students), or Category P status (able to serve on master’s or doctoral examination committees, and serve as advisor for master's and doctoral degree students).

Faculty members receive graduate faculty membership only upon the recommendation of the Graduate Studies Committee of a particular unit of the University, such as the OSU-GCGP. Faculty members recognized by the appropriate graduate studies committee thus become members of the graduate faculty of that unit. They do not necessarily have to teach in that unit to be considered part of the unit’s graduate faculty. Table 1 provides a list of the graduate faculty members of the OSU-GCGP.

Other non-faculty genetic counselors, physicians, and University staff work on behalf of the OSU-GCGP with students. The work that these individuals provide includes, but is not limited to, the provision of guest lecturers, clinical supervision, committee work and advisory board work.

SECTION 5: STANDARDS FOR ENROLLMENT

The Master’s degree in Genetic Counseling from The Ohio State University indicates that the individual is a genetic counselor who is competent to practice genetic counseling and is capable of genetic counselor licensure. All graduates are required to demonstrate the knowledge, skills and attitudes needed to provide safe and effective genetic services to diverse patients in a wide variety of clinical settings. Thus, each candidate for admission must possess the skills and qualities required to practice direct patient care regardless of his or her ultimate career goals.

In accordance with the Americans with Disabilities Act as amended, the faculty assembly of the OSU Genetic Counseling Graduate Program requires that matriculates into the Genetic Counseling Graduate Program will assist the student in making reasonable accommodations which include those assistive devices and strategies that do not change the essential requirements of the curriculum and do not change the standards of performance judged to be acceptable. Assistive strategies that use trained intermediaries to obtain and interpret data from patients on behalf of the student will not be accepted as reasonable.

Prior to receiving reasonable accommodations a student must be evaluated at the Ohio State University Office of Disability Services: http://ods.osu.edu/. Students approved through the Office of Disability Services will receive all reasonable accommodations to the study of genetic counseling and for locally administered examinations.

The American Board of Genetic Counseling (ABGC) has an independent approval process for Certification Examination accommodations. For information about the ABGC testing accommodations for the Board Certification Examination, see www.abgc.net.

ORIENTATION

Each year before the first day of Year 1 of the curriculum, the OSU Genetic Counseling Graduate Program requires participation in an orientation program for first-year students. The program includes an official welcome, an overview of the curriculum, introduction to members of the administration, faculty and staff, student life and the learning communities. General information about the College of Medicine and The Ohio State University is also covered. Various activities give students opportunities to get to know their classmates.

Prior to orientation, new students receive a variety of information to facilitate their matriculation, including course registration information, online computer system registration, request for medical history and immunizations, electronic medical record training, CITI training, HIPAA (Health Insurance Portability and Accountability Act) and Infection Control training.

REGISTRATION

Students will be registered each semester by the Genetic Counseling Graduate Program Assistant, Praacnaa Colestock.

Students should promptly make changes in their address or telephone number on the Web at http://buckeyelink.osu.edu/https://sis.med.ohio-state/edu. Students are also required to update
addresses and phone numbers with the Genetic Counseling Graduate Program Coordinator. This information must be accurately maintained not only for University records, but also for the protection and benefit of the student.

**CREDIT HOURS & RESIDENCY REQUIREMENT**

A minimum of 69 graduate credit hours is required to earn a master’s degree in Genetic Counseling at The Ohio State University. All of those required credit hours must be completed at this university over a period of at least two semesters. A student must be registered for at least three graduate credit hours the semester or summer term in which graduation is expected.

**COMMUNICATION & IDENTIFICATION**

**E-Mail**

Each student is required to have an activated e-mail address within The Ohio State University. The Genetic Counseling Graduate Program will provide assistance with registration during orientation. Administration, faculty and staff will use the firstname.lastname@osumc.edu address assigned to the student for official communications. Students *may not* forward their emails from the OSUMC address to other email addresses; however, other e-mail address and/or other OSU email addresses such as lastname.number@osu.edu can be forwarded to the osumc.edu address. This account will be utilized for clinical rotation correspondence, access to the electronic medical system at OSUMC, and completing appropriate regulatory training.

In addition, faculty *may not* use non-OSUMC address to communicate with students. It is the faculty member(s) responsibility to respond to student e-mail inquiries in a timely and professional manner.

The Genetic Counseling Graduate Program, College of Medicine, Graduate School, and Student Life use distribution lists for each class year to disseminate information appropriate for the classes. It is the students and faculty members’ responsibility to check e-mail regularly in order to be informed on College events, announcements, and policy changes.

**Cell Phones/Pagers**

Cell phones and pagers should be turned to vibrate when in classes, conferences, or clinics. Please refrain from texting or doing personal emails when in class and clinic.

**Internet Access on Campus**

Virtually everywhere on campus has access to either OSUWMC wireless or OSU wireless. For OSU wireless, students should use their name.# as their username and then their chosen password to connect.
**Buckeye Alert Text Messaging System**

All students are encouraged to register for the Buckeye Alert Text Messaging System run by OSU Emergency Management. Ohio State's text messaging system is designed to provide rapid notification to alert students, faculty and staff of an emergency situation that requires them to take immediate action to help preserve their safety and security such as disasters, crimes, and severe weather alerts. Instructions for student text messaging registration are available at: http://buckeyealert.osu.edu/sr/

**Use of the Division Equipment and Facilities**

Students are provided with resources such as a shared telephone/voicemail, photocopying accessibility, internet connected computers/printers, clinic stationary and other office supplies that are to be used for clinic and class related uses only. Students found to be abusing these privileges will result in having the privileges revoked for the entire student class. Excessive usage of the departmental printer will result in the students/trainees purchasing any additional cartridges required.

**Disaster Plans**

In the event of a disaster, natural or otherwise, students located at the 2012 Kenny Road Office should assemble in the inner hallway on the first floor. If any student is at another campus location, instructions regarding class meetings and any responses to the disaster will be communicated by email or text message.

**Mailboxes**

Students have individual mailbox slots in the Division of Human Genetics at 2001 Polaris Parkway, Ste. 1000. It is the student’s responsibility to check their mail slots regularly in order to be informed of Division events or other information.

**Student Identification Cards**

Hospital photo IDs are obtained as part of the initial orientation process. Photo IDs can be obtained from Hospital Human Resources and Security, S128 Rhodes Hall (7:00 a.m.-12:00 p.m. and 1:00 p.m. - 4:15 p.m., Monday through Thursday, Friday by appointment only). This ID allows access to hospital buildings for those students who need it. ID cards must be worn at all times when participating in any academic activity involving patient care whether within a hospital or practitioner’s office. The hospital ID also allows 24 hour access to student portions of Polaris Innovation Centre.

All students are also required to carry the BuckID card which can be obtained from the BuckID Office, Room 3040 of the Ohio Union (open 9:00 am to 5:00 pm Monday through Friday). Access to university facilities and use of COTA buses require the BuckID. The Buck ID card overrides all other forms of campus identification.
SECTION 6: STUDENT LIFE

FACILITIES

Genetic Counseling Student Carrels

The second floor of Polaris Innovation Centre has a space where students can study and relax when they have down time. The space is a wireless network environment provided through OSU Guest Services and OSUMC.

Computer Access

Computers are available in the Prior Health Science Library for student use. All students will have access to the wireless network within Polaris Innovation Centre, Graves Halls of the College of Medicine, and the Biomedical Research Tower. Please note that when computer is not in use, students must log completely out of the system so that Division files cannot be accessed by unauthorized individuals.

Campus Recreation Facilities

The Recreation and Physical Activity Center (RPAC) is located in the heart of the campus just southeast of the Ohio Stadium at 337 W. 17th Avenue. The center includes over 25,000 square feet of fitness space featuring state-of-the-art cardio and weight equipment. There are also four gyms, four squash courts, 10 racquetball courts, a four-lane jogging/walking track, massage therapy rooms, an aquatic center, and athletic training services. For more information, call (614)292-7671 or visit: http://recsports.osu.edu/facilities/recreation-physical-activity-center-rpac.

The Adventure Recreation Center, located on the west edge of campus at 855 Woody Hayes Drive, boasts four hardwood basketball courts (converts to five volleyball courts), two indoor turf fields, free weights, strength training machines, and cardio equipment. There are also day-use locker and individual shower facilities. The ARC also houses the Outdoor Adventure Center (OAC) and includes climbing walls. For information, call 247-8686 or visit: http://recsports.osu.edu/facilities/adventure-recreation-center-arc

The Scarlet and Gray Golf Course, located at 3605 Tremont Road, may be used for a minimal charge. For tee times, call 459-4653.

The University has a department of recreational sports that coordinates intramural sports and various facilities on campus. See: http://recsports.osu.edu.

Child Care Center

The Ohio State University Child Care Center, a department of the Office of Human Resources, provides quality child care that allows parents in the university community to participate in and fulfill their responsibilities to the university. Support for academic units is provided by offering opportunities for
study and research by students and faculty. The OSU Child Care Center is licensed by the State of Ohio Department/Human Resources.

University students, staff, or faculty who has legal custody and/or is the primary care giver for their children are eligible for child care services. Eligibility is verified at time of enrollment by current pay stubs or paid fee statement. All children are eligible regardless of race, color, national origin, sex, or handicap. A limited number of spaces are available for children identified as needing early intervention service. Children from birth to three years are enrolled through Franklin County MRDD. Children three to six years old are enrolled through Columbus Public Schools. There is no charge for these early intervention services, and wrap-around child care is available for a fee.

For further information or to arrange a visit, go to http://hr.osu.edu/ccc/home.htm or call 614-292-4453. The Child Care Center is located at 725 Ackerman Road, Columbus, OH 43202.

**PARKING**

Parking is handled through the CampusParc, 1560 N. High Street Columbus, Oh 43201. Students can choose a variety of parking passes and additional information is available at www.campusparc.com. Parking spaces are extremely competitive around the medical complex.

Students may also use remote parking in “C” spaces at the Buckeye and West Campus Lots and arrive at the medical center complex by the CABS shuttle. Contact Transportation and Traffic Management for additional details about shuttles (http://www.tp.osu.edu). The phone number is 292-9341.

**Note:** The Genetic Counseling Graduate Program has no control over issues related to Transportation and Parking.

**STUDENT HEALTH & INSURANCE**

**Student Health Insurance**

The Ohio State University requires that all students enrolled at least half-time have continuous health insurance coverage. All students, including regional campus students, are automatically enrolled in the Student Health Insurance plan (SHI) upon registration, unless the student obtains an exemption. All domestic students who have coverage through a non-university health insurance plan and who want to waive SHI coverage can do so by completing the online waiver process as described on the SHI website. Students must submit a waiver by the published deadline of their initial term of enrollment each academic year. Should a student miss a deadline, the student must submit an appeal. The appeal form can be found on the SHI website.

The decision made for the first semester of the academic year remains in effect for the entire year unless a qualifying event occurs. More information on student health insurance is available at http://www.shi.osu.edu

Students who are injured or become ill while enrolled in the Genetic Counseling Graduate Program are responsible for any expenses not covered by their insurance, including injuries during clinical rotations.
Dependents and Domestic Partners: Students may enroll dependent children and domestic partners into the student health insurance plans. Further information about sponsored dependent benefits is available on the Office of Human Resources website.

**Liability Coverage**

Covered in Liability Coverage Section within Section 8: Academic Affairs

**Student Health Services**

Student Health Services is a nationally accredited outpatient facility providing a variety of health care services to the student population. Medical services include primary care, dental care, sports medicine, preventive medicine, optometry, gynecology, and allergy evaluations and therapy. Support services include radiology, laboratory, and physical therapy. These services and an on-site pharmacy are all available in one, convenient location – the Wilce Student Health Center. The primary website for information about OSU Student Health Services is: [http://shs.osu.edu/](http://shs.osu.edu/).

The health center is located in the heart of campus, between the main library and the RPAC. The address is 1875 Millikin Road. Appointments may be made by calling (614) 292-4321. For more details, go to: [http://shs.osu.edu/](http://shs.osu.edu/).

Student Health Services charges fees for most all services performed at the health center. If a student purchased the OSU Student Health Insurance or WilceCare Supplement, claims will be processed automatically according to the benefits to which the student is entitled under the plan. For benefit details, please visit the OSU Student Health Insurance website at [http://shi.osu.edu](http://shi.osu.edu).

If students are covered under another health insurance plan, be sure to contact the insurance company prior to the appointment to find out how or if the policy will cover care and prescriptions provided at the health center.

Co-pay and co-insurance amounts for eye exams, dental visits, nutrition visits, and prescriptions are due at the time of service. The health center accepts cash, check, BuckID, Visa, MasterCard, Discover and American Express.

Faculty and others health care professionals who provide sensitive health, psychiatric or psychological care to genetic counseling students will not evaluate student academic performance or participate in decisions regarding student advancement and/or graduation. Faculty are required to attest that they have not provided such care to students when they complete evaluations, participate in course grading or engage in committee academic review or promotion decisions and must recuse themselves from these academic roles if they have provided such care at any time in the past.

**STUDENT COUNSELING SERVICES**

**Academic Counseling**

Academic counseling includes study skill assessment and recommendations for academic improvement, one-on-one and small-group tutoring, and time management evaluations. Students often find the
academic challenges of graduate school to be different from undergraduate, and an academic counselor will help them evaluate their challenges and collaborate with the personal counselor on solutions. In addition, academic tutoring is available for students who have experienced significant academic difficulty and referrals. A student-driven resource for academic assistance (TutorNet) is also available on Carmen. Students are also encouraged to utilize the resources and expertise of the OSU Younkin Success Center on 1640 Neil Avenue (Phone 292-4400) for the assistance of learning specialists.

### Personal Counseling

Counseling and consultation services are available through the Office of Student Life. This office employs licensed mental health professionals who provide counseling to any student. The Office of Student Life can be reached at 614-292-5766, or by e-mail at ccs@studentlife.osu.edu.

Counselors are available to provide behavioral health-related services and can also refer to other services outside that office. It is stated policy that the counselor shall not be in a position to offer any form of academic evaluation for graduate students. This is to reassure students that no conflict of interest would contaminate the counselor-student relationship. To further protect the privacy of genetic counseling students, it is required that all of their medical treatment comes from physicians who will not be in a position to offer any form of academic evaluation, thus protecting the student-educator relationship.

The Genetic Counseling Graduate Program encourages students to take a proactive approach to their own mental health and to seek counseling rather than to deny the existence of problems. Learning how to cope effectively with personal problems and feelings will help students become emotionally balanced clinicians.

Counseling services provided to genetic counseling students are confidential as stipulated under the Family Educational Rights and Privacy Act (FERPA). Information regarding counseling is released only with the written permission of the student. Student mental health issues can often include, but are not limited to: adjustment to graduate school, crisis counseling, relationship counseling, academic crises, interpersonal issues, test anxiety, depression and anxiety, grief counseling, substance use, roommate concerns, health concerns, body image issues, serious mental illness, stress, and relaxation strategies.

### STUDENT FINANCIAL SERVICES

[http://medicine.osu.edu/students/financial_services/](http://medicine.osu.edu/students/financial_services/)

Student Financial Services provides assistance for a wide variety of financial issues that students are confronted with throughout their education at the College of Medicine as well as immediately upon graduation. Students are encouraged to inquire about any financial issue including buying a house or car, budgeting, eliminating credit card debt, applying for scholarships and loans, and other financial matters. While this office does not provide investment or tax advice, its goal is to educate students about the possible variables involved in any financial decision.

### Loans

**Federal Government:** The federal government offers loans for graduate education. For more information, please contact Tru Shonda Carmicle at trueshonda.carmicle@osumc.edu.
Private Bank: Students may also apply for loans from private banks to help with their graduate education and expenses. Students must have good credit to be approved. The interest rates vary based on the student’s credit and the rates offered by different private banks for educational loans. Usually a credit worthy co-signer will improve the interest rate offered by the bank on this type of loan.

Graduate School Fellowships

A Graduate School fellowship is a financial award made by the university directly to a graduate student to provide support during a portion of the graduate degree program. Fellows are selected on the basis of academic merit through a university-wide competition without respect to financial need. Graduate fellows cannot be required to perform a service in return for receiving a stipend.

The Graduate School awards a first-year fellowship (University and Graduate Enrichment) for students applying to begin a graduate program at Ohio State on a competitive basis. The purpose of a first-year fellowship is to attract and retain a diverse, high quality graduate student population. Some first-year fellowships include a second and/or dissertation year of support.

Eligibility: Eligibility criteria for a Graduate School fellowship vary by kind of fellowship. However, recipients of all fellowships must meet the following minimal eligibility criteria. The student:

1. must be admitted to the Graduate School
2. must be pursuing a graduate degree at this university on a full-time basis
3. must maintain good standing in the Graduate School during the period of appointment
4. must maintain reasonable progress toward a graduate degree as determined by the Graduate Studies Committee
5. must hold no other appointment or outside employment during the term of appointment as a Graduate School fellow, except for approved supplemental appointments or fellowships

Nomination: Candidates for the first-year fellowships are nominated by the Graduate Studies Committee of the local graduate program. Candidates may not apply directly.

Procedures have been established for submitting fellowship nominations to the Graduate School. The dates of each fellowship competition and nomination procedures are communicated to each Graduate Studies Committee prior to each competition and are posted on the Graduate School’s website. Questions about nominating procedures, deadlines, and related matters should be directed to the Graduate School.

Selection: Selection of students to receive both first-year Fellowships is made by committees of Graduate Faculty appointed by the Dean of the Graduate School for that purpose. The committee establishes detailed procedures and guidelines for the review of nominations

For more information about the first-year fellowship see the Graduate School Handbook Section X.
Tuition Refund Policy

The policy for refunding tuition for students at OSU exactly follows the university's policy. A student is eligible for a full 100% refund of tuition if he/she withdraws prior to the first Friday of any given semester. Tuition is refunded at 75% after the first Friday but before the second Friday of the semester. The student is eligible for a 50% refund of tuition between the second and fourth Friday of the semester. If the student withdraws later than the fourth Friday of the semester, no refund of tuition is granted.

The specific refund dates for each semester are published on the University Registrar's website at www.registrar.osu.edu under the heading of “Important Dates.”

Prior to completing registration each semester, all students are required to complete the Financial Responsibility Statement through their Buckeye Link account. This statement details the specific financial obligation that the student assumes when registering for classes. It discloses to the student that by completing registration, he/she may be responsible for at least a portion of tuition associated with that enrollment even if the student does not complete the semester.

UNIVERSITY RESOURCES & WEBSITES

CARMEN

This is the University's web based system for interaction between faculty and students. All courses are listed on Carmen and faculty post updates, grades, discussions, and can also administer online quizzes using the system.  http://carmen.osu.edu

Buckeyelink

This is the University’s web based administrative system. IT is useful for interacting with the university in ways such as: registering each term, letting the university know a student and/or faculty members’ official address, checking grades, etc.  http://buckeyelink.osu.edu

The Ohio State University Graduate School’s Graduate School Handbook

This handbook delineates the rules, policies, and guidelines applicable to the graduate community at OSU.  http://www.gradsch.osu.edu/graduate-school-handbook1.html

OSU Libraries

There are several libraries on the OSU campus. The main library is located at 1858 Neil Avenue Mall. The Health Sciences Library is the library located on the Medical School Campus at 376 West 10th Avenue.  http://library.osu.edu/

Student Health Services

The Wilce Student Health Center at The Ohio State University is a Joint Commission accredited outpatient facility providing a variety of health care services to the student population. All students
enrolled at OSU are eligible to use the health service, regardless of health insurance coverage. http://shs.osu.edu/

Younkin Success Center

The Younkin Success Center functions as a hub for services related to student success. Within the Younkin students will find success support resources and services such as: Dennis Learning Center (DLC), Career Counseling and Support Services, University Center for the Advancement of Teaching (UCAT), Buckeye Careers, Student-Athlete Support Services Office (SASSO), and Counseling and Consultation Service (CCS). http://younkinsuccess.osu.edu/

Campus Map

This website provides information about getting around the campus, locations of buildings, and student parking facilities. It also provides information about OSU regional campuses, directions to campus, and locations of visitor parking. http://www.osu.edu/map/

CABS Bus

This is the website for the Campus Area Bus Service, which is a free transit service provided by OSU Department of Transportation and Traffic Management. CABS provide frequent and reliable service between remote parking lots and the Central Campus. The website also provides students with information regarding other modes of transportation in the Campus and Columbus area. http://ttm.osu.edu/cabs

COTA Bus

This is the Columbus Ohio Transit Authority Bus Website. They provide bus service from campus to other regions of Columbus. Students can ride using a Buckld. See https://buckid.osu.edu/about_cota.asp for more information about this program. http://www.cota.com/

Off-Campus Resources

Student Life’s Neighborhood Services and Collaboration and Off-Campus and Commuter Student Engagement provide programs and services to meet the needs of The Ohio State University’s off-campus and commuter students, and to address the needs of persons wishing to live and engage as a resident of the University community. http://offcampus.osu.edu
SECTION 7: PROGRAM POLICIES

The Genetic Counseling Graduate Program adheres to the Graduate School rules and policies, as well the policies of the College of Medicine where the Genetic Counseling Graduate Program is housed. As such, students are expected to follow the rules approved by the Graduate Council and presented in the Graduate School Handbook and this handbook. In the case of differences in the requirements of the Graduate School and the OSU-GCGP, the stricter of the requirements takes precedence.

GRADUATE SCHOOL RULES

A student who believes that circumstances warrant a waiver of a rule may submit a petition to the Graduate School. Petitions about Graduate School rules must be directed to the Dean of the Graduate School, must include a written statement from the student requesting the waiver of a specific rule and describing the circumstances, and must include written statements from the student’s advisor, the course instructor (if appropriate), and the Graduate Studies Committee chair, reacting to the student’s request and providing any additional information pertinent to the waiver request.

Graduate School Council

Purpose and Responsibilities: The Graduate Council is the principal advisory body of the Graduate School and has the following responsibilities:

- to serve as an advisory group to the Vice Provost for Graduate Studies and Dean of the Graduate School
- to participate in the development of rules, policies, and standards pertaining to graduate education and graduate programs and to act upon any question affecting those policies
- to participate in the establishment of rules, policies, and standards governing graduate associates and graduate fellowships, including overseeing eligibility and allocation procedures for Graduate School fellowships
- to review proposals for new or revised graduate degree programs, graduate minors, graduate interdisciplinary specializations, and other curricular matters
- to submit to the Council on Academic Affairs recommendations about adopting or abolishing academic degrees administered by the Graduate School
- to provide oversight for interdisciplinary graduate programs
- to make recommendations about establishing, affiliating, and abolishing academic centers and other comparable organizations that are engaged in research or graduate education and make recommendations for determining the membership and authorities of their boards or governing bodies
- to approve, modify, or reverse actions taken by its standing or ad hoc committees

See Section XIII of the Graduate School Handbook for more details about the membership and committee structure of the Graduate Council.

GRADUATE SCHOOL POLICY ON INVESTIGATION OF ALLEGATIONS OF RESEARCH MISCONDUCT BY A GRADUATE STUDENT
(From the Graduate School Handbook Appendix C)
This document is used by the Graduate School when allegations of research misconduct by a graduate student have been forwarded by the Committee of Inquiry as detailed in the document “University Policy and Procedures Concerning Research Misconduct.”

When a Committee of Inquiry determines that an allegation of research misconduct by a graduate student has substance so as to warrant further investigation, such investigation shall be handled by the Graduate School.

Upon receipt of the final report by the Committee of Inquiry, the Dean of the Graduate School shall appoint an Investigation Committee. The Committee shall be composed of at least five members: two members of the Graduate Council (one of whom shall chair the Committee), one member of the graduate Faculty from the college in which the student is enrolled, one member of the Graduate Faculty with academic expertise relevant to the field of study of the student alleged to have committed research misconduct, and one graduate student selected in consultation with the president of the Council of Graduate Students. If the Dean of the Graduate School determines that the complexity of the case requires that the Committee be larger than five members, additional members may be added at the discretion of the Dean of the Graduate School.

Upon receipt of a referral from the Dean of the Graduate School, the Investigation Committee shall review any documentary evidence submitted by the Committee of Inquiry and shall meet with the graduate student alleged to have committed research misconduct. At its discretion, the Committee shall interview individuals having information relevant to the allegation(s). The student shall be given copies of any documentary evidence submitted by the Committee of Inquiry. However, the student shall not have the right to be present when witnesses are interviewed or to question such witnesses. When the student is interviewed, the student may be accompanied by legal counsel or other advisor, but the role of such person in the process shall be limited to advising the student. The student may submit any relevant evidence for consideration by the Investigation Committee and may request that witnesses with information directly relevant to the allegation of research misconduct be interviewed by the Committee.

Findings of the Committee shall be based on greater weight of the evidence and the decision is reached by simple majority vote of the Investigation Committee. At the conclusion of its investigation, the Committee shall report its findings to the Dean of the Graduate School, including a conclusion concerning the merits of the complaint.

The Investigation Committee shall make every effort to conduct its investigation and submit its report to the Dean of the Graduate School within 45 days. If the Investigation Committee finds that the greater weight of evidence indicates research misconduct, the dean shall forward the Committee’s report to the coordinator of the Committee on Academic Misconduct. The coordinator shall schedule a hearing of the Committee on Academic Misconduct for the determination of sanctions. This hearing shall be held within a reasonable time, not to exceed 30 days. The rules of the Committee on Academic Misconduct will serve to inform this hearing and any appeal which may be filed.

**NON-DISCRIMINATION POLICY**

The OSU Genetic Counseling Graduate Program prohibits discrimination against any individual applicant or student based on age, color, ethnicity, race, gender, gender identity, sexual orientation, religion or creed, national origin or ancestry, veteran status, marital or parental status in the administration of
admissions, educational and other OSU programs. Otherwise qualified persons are not subject to
discrimination on the basis of disability. Reasonable accommodation will be provided to persons with
disabilities who otherwise meet the standards of the OSU-GCGP.

**SELF-DISCLOSURE & CRIMINAL BACKGROUND CHECK POLICY**

All students are required to complete a criminal background check and self-disclosure form. This
rationale for these policies, as well as the procedures related to these processes, are described in
detail in Section 10: Disclosure, Background Checks, and Toxicology Testing, of this handbook.

**SUBSTANCE ABUSE POLICY**

**Background**

The Genetic Counseling Graduate Program adheres to the College of Medicine Substance Abuse Policy
which states the following:

The College of Medicine is committed to the health and well-being of patients and of its students. As
part of this commitment, The COM complies with and upholds all federal, state and local laws that
regulate or prohibit the possession, use or distribution of alcohol or illicit drugs. Students who are
impaired by substance abuse endanger patients, themselves, faculty and staff, and other students.
Substance abuse shall be defined as:

1) The use or possession of any drug in a manner prohibited by law; and
2) The use of alcohol or any legal drug or other substance in such a way that the user’s
performance as a professional student is impaired.

The COM recognizes that early treatment is essential for successful rehabilitation and recovery for
students with substance abuse. Students are encouraged to voluntarily request referral for treatment
before their substance abuse leads to academic or disciplinary problems.

**Policy (adapted from the College of Medicine policy)**

The College of Medicine policy appropriately establishes substance abuse guidelines and procedures
that are similar to those already in place for all other employees of the hospitals in which genetic
counseling students’ work. Students are prohibited from engaging in substance abuse.

Testing for designated substances will occur on a scheduled basis during first-year orientation. The
Genetic Counseling Graduate Program administration also reserves the right to drug test a student at
any time that he/she is suspected of substance abuse (on “For Cause” basis) as outlined in Section 9 of
this handbook. Prior to testing, students are asked to disclose any substance use and prescription
medications to the College administration, who will keep this information confidential.

If a student brings forth a substance abuse issue to the administration or is found to have a substance
abuse problem through other means such as, but not limited to, drug testing, the student will meet with
the Director(s) to discuss the issue further. In the absence of the Director(s), the College of Medicine
Vice Dean for Medical Education will be available. The student will then be referred to an
addictionologist for assessment of the problem, who will suggest what treatment and rehabilitation
options are appropriate for the student. The Genetic Counseling Graduate Program Executive Leadership Committee will mandate the terms of the rehabilitation.

From the moment a substance abuse problem is deemed to be present, the student will be placed on a leave of absence and will be unable to participate in any clinical activities involving patients or patient care. Additional information regarding procedures and consequences for self-disclosure of substance abuse is delineated in Section 10.

**IMMUNIZATIONS & ASSESSMENT OF IMMUNITY**

**Immunizations & Immunity**

All students matriculating in the Genetic Counseling Graduate Program are required to submit a physician-supervised history and physical and to document the following immunizations:

- **Adult diphtheria/tetanus (Tdap):** An adult booster administered within the last ten years. All new boosters should be Tdap.

- **MMR (measles, mumps, rubella):** Two doses of vaccine after the first birthday with a recommendation that one of the doses be after 1980 (many vaccination failures have occurred in those immunized before this date) or evidence of immunity by serological titers of antibodies to these three viruses.

- **Hepatitis B vaccine:** All students must provide titer evidence of immunity for Hepatitis B or demonstrate no seroconversion after 2 complete series of vaccine and 2 titer results. If no vaccine was previously given, at least one dose of the series must be completed prior to matriculation. The second dose must be completed prior to patient contact.

- **PPD intradermal skin test:** Upon entry, a two-step PPD is required of all students except those who have a previous positive reading. All students must update their PPD status annually. An IGRA blood test may be substituted for the PPD and must also be updated annually.

  - Students with a previous positive PD must present chest x-ray results that verify no active disease. Students will complete an annual symptoms questionnaire in subsequent years.

  - Students with a previous negative PPD must have an annual one-step PPD or an IGRA blood test.

- **Chicken pox titer:** All students must provide titer evidence or immunity for varicella or document two doses of varicella vaccine before patient contact. If a titer result is equivocal or negative, a student will be required to complete two doses of varicella vaccine even if they had vaccine previously.

- **Primary DPT series:** Documentation is mandatory for all students.

- **Polio series:** Documentation is recommended.

- **Influenza Vaccination:** Vaccination is required annually for influenza.

- **Additional requirements may be added as required by college mandate.**
Students are encouraged to enroll with My BuckMD at the Wilce Student Health Center in order to have access to their immunization records at any time. This is particularly useful when applying for away electives and gathering information for residencies. Instructions on how to do this are found at http://shs.osu.edu/mybuckmd/.

**Note:** Students without appropriate immunizations will not be permitted to proceed to patient contact situations, such as the Clinical Practicum. Some clinical placement sites may also require additional immunizations and health documentation. Students will be notified of these requirements prior to starting a rotation at the site.

**Guidelines for Students Who Contract an Infectious Disease**

Students who contract a serious or infectious disease during graduate school must immediately seek appropriate medical care.

**Caring for Patients with Infectious Diseases**

Human Immunodeficiency Virus (HIV) and Hepatitis B (HBV) are serious health problems in the United States. There has also been an increase in the number of patients with tuberculosis infections. In keeping with the policy of the College of Medicine regarding patient care, genetic counseling students may **not** refuse to assist in the treatment of a patient solely because the patient is infected with HIV, HBV, or other infectious disease.

Genetic counseling students must use universal precautions when in contact with infected patients. Genetic counseling students must also comply with specific clinical departmental guidelines regarding contact with patients who have infectious diseases. Precautions and appropriate safeguards are expected to be used in the treatment of all patients.

**UNIVERSAL BLOOD & BODY FLUID PRECAUTIONS**

Universal blood and body fluid precautions lessen the risk of exposure to such fluids, and these precautions must be used routinely. While genetic counseling students are not typically in many situations during clinical placements where they are performing procedures that increase their risk to exposure of such fluids, they need to be aware of universal precautions and when exposed act in accordance to Genetic Counseling Graduate Program guidelines.

Students are assigned to several affiliated hospitals as well as University Hospitals. The protocols at each institution are slightly different. The following, however, are common to all facilities:

- Decontaminate (wash with disinfectant) the exposed or contaminated site immediately.
- Make a note of the patient’s name, hospital number, attending physician, and location.
- Report to the immediate supervisor (attending or resident physician).
- Have the injury inspected and an incident report filled out by a supervisor (e.g., resident or head nurse).
• Report the injury as soon as possible to Hospital Epidemiology or Student Health. Notify the attending physician of the patient. Usually, this is done by Hospital Epidemiology or OSU Wilce Student Health Center, since it is the hospital’s responsibility to have the patient’s blood drawn and tests done. The attending physician, though, may order the appropriate testing.
• Go to OSU Wilce Student Health Center or the Emergency Department immediately.
• The injured student’s blood may be drawn for baseline serologies at OSU Wilce Student Health Center, an OSU Emergency room or, if the student is out of Franklin County at the nearest emergency room.
• In the event of a needle stick, the student should call the OSU Wilce Student Health Center Appointment Line at 614-292-4321. They should identify themselves as a student who has had a needle stick injury, and they should be routed to the Triage Nurse for an ASAP appointment. Dr. Mary Lynn Kiacz can also be contacted if there are any questions or difficulties. Reports of tests should be sent to the Wilce Student Health Center for follow-up and appropriate medical recording.
• Notify the Program Director (Dawn.Allain@osumc.edu)
• Regardless of where the initial urgent care is received, all follow-up care of a BBFE should be obtained through the Wilce Student Health Center.
• Bills for blood tests and assessment should be submitted to the student’s health insurance. Any uncovered costs and bills should be brought to the Director(s) of the Genetic Counseling Graduate Program.

OCCUPATIONAL INJURIES

Occasionally, students will be injured in the course of clinical duties. All injuries in hospitals must be documented with an incident report available at each nursing station. If the injuries are significant, students should seek medical attention from the attending physician or Student Health.

HAND HYGIENE POLICY

Proper hand hygiene is an essential tool in reducing the risk of transmitting organisms from one person to another or from one body site to another in the same person. In an effort to reduce the transmission of infectious agents the Medical Center has a detailed hand hygiene policy with specific instructions for students available at: http://medicine.osu.edu/students/life/handbook/Documents/Student%20Hand%20Hygiene%20Policy%205-11.pdf

It is a detailed policy that genetic counseling students should review prior to patient contact. It includes watching hands upon entering and exiting a patient room. The Genetic Counseling Student Hand Hygiene Non-Compliance Policy is in direct alignment with similar policies created for faculty and staff and will be applied to reports received from OSU Medical Center and/or reports received from any other medical center at which the student may be rotating.
Consequences of Non-Compliance:

- **First Occurrence**: A written warning regarding the consequences of non-compliance will be sent. Students will be required to complete a remedial module on infection control and hand-washing in order to satisfactorily complete their clinical assignment. Students will have one week to complete this before being pulled from the clinical setting. Successful completion of the module will be documented in the student’s file.

- **Second Occurrence**: A written warning regarding the consequences of non-compliance will be sent. Students will be required to meet with the Program Director (or designee) to discuss the importance of hand-washing. Medical Center policy will be reviewed with the student. This meeting will be documented in the student’s file.

- **Third Occurrence**: A written warning regarding the consequences of non-compliance will be sent. The student will be referred to the Academic & Behavioral Review Committee to further explore the issue. Consideration will be given to removing the student from the clinical setting with any future occurrence.

- **Fourth Occurrence**: A written warning regarding the non-compliance will be sent and student will be referred to Academic & Behavioral Review Committee for consideration of LOA, withdrawal, or dismissal.

**CONSCIENTIOUS OBJECTION POLICY**
(Adapted from University of Manitoba)

The Genetic Counseling Graduate Program recognizes that for reasons of commonly-held ethical and religious beliefs, some students may wish not to involve themselves with certain medical procedures or services. Out of respect for such beliefs, the Genetic Counseling Graduate Program will respect conscientious objection by students if all of the following criteria are met:

1. A conscientious objection does not relieve a genetic counseling student from a duty to meet the current standard of timely and acceptable medical care, to engage in full and nonselective disclosure for Informed Consent, to inform patients of their conditions, and referral prognoses, and risks of receiving care services for their illness, condition or health-related request.
2. Patients cannot be abandoned. Any student who wishes to excuse him or herself must find another qualified individual to provide service to patients.
3. A genetic counseling student cannot object to provide a service if the patient’s condition, in the judgment of an attending physician, requires immediate action and that student’s assistance is required to provide that service.
4. A genetic counseling student shall not object to participate in the care of a specified classification or group of people, or on the basis of particular diseases or states of health or illness.
5. A genetic counseling student shall not object to provide or participate in a health care service if this objection amounts to discrimination.
6. A conscientious objection must not be so broad as to limit a student’s general medical education. If a conscientious objection constrains a student’s ability to provide the current
standard of medical care, the Genetic Counseling Graduate Program may require that student to withdraw from graduate school.

7. An objection to participate in any service or delivery of care does not exempt the student from the responsibility to learn about its indications, contraindications, benefits, and risks. A student will not be exempted to demonstrate this knowledge on any examination.

8. All curricular or clinical time missed through an excused exemption must be made up otherwise.

9. When a conscientious objection might compromise completion of the curriculum, this matter will be discussed by the appropriate evaluation committees, and if necessary, by the appropriate Executive Leadership Committee. Students can represent themselves at these meetings in accordance with College of Medicine policies.

10. If, in the course of a conscientious objection, a student engages in behavior which the Genetic Counseling Graduate Program considers unacceptable for a genetic counselor, the Genetic Counseling Graduate Program may require that student to withdraw from graduate school on the basis of improper professionalism.

11. A student wishing to make a Conscientious Objection Declaration should complete the Conscientious Objection request and declaration form (See Appendix) and submit to the Genetic Counseling Graduate Program office. This form will be reviewed by the Academic & Behavioral Review Committee, which will make final decisions regarding acceptance or rejection of the student declaration. Any appeals to the decision of the Academic & Behavioral Review Committee will be submitted to the College of Medicine Vice Dean for Education.

ATTENDANCE POLICY

Genetic Counseling Students are expected to attend all scheduled academic activities. An unapproved absence from clinical activities or examinations may result in failure of the course or one of the course components.

Sick days

Students are not allotted a certain number of “sick days.” The Genetic Counseling Graduate program is relatively short and absences will affect a student’s ability to learn the material. If a student is sick, it is their responsibility to directly inform the office of the reason for their absence and they will be held accountable for any missed material. Students should email the relevant course directors and/or clinical supervisors as soon as possible. If a student does not alert the program immediately to an illness, it will be considered an unexcused absence.

Weather Emergencies

The Genetic Counseling Graduate Program has a general policy that classes and clinical rotations are cancelled when the OSU Main Campus is closed. In addition, students often have questions about whether to attend classes and rotations when the OSU Main Campus remains open but a Snow Emergency is declared. The first guideline is that student safety is an important priority and students must at all times use their best judgment about personal safety when travel conditions are compromised by poor weather.

Snow Emergency Guidelines:
- Level 1 Snow Emergency: Students should plan to attend class/clinical rotations.
- **Level 2 Snow Emergency**: Classes and clinical rotations will be held as scheduled. A student should use their best judgment about personal safety to get to class or their rotation and notify the appropriate course or rotation office if they are unable to get to class safely.

- **Level 3 Snow Emergency**: All roadways are closed to non-emergency personnel. No one else should be out during these conditions unless it is absolutely necessary to travel. Students should not come to class or clinical rotations when a Level 3 Snow Emergency is declared since they are non-emergency personnel.

**Scheduled Absences**

Busy health professionals sometimes find it difficult to balance work and personal responsibilities and needs. However, the OSU COM directs that faculty, staff and trainees be permitted and enabled to attend to important medical and personal needs to maintain health and well-being. While genetic counseling students are encouraged to use unscheduled time for personal needs when possible, some medical, dental, and other personal issues cannot be resolved except during regular business hours. Students may request time off from educational classroom or clinical rotation responsibilities within the days specifically allotted for various rotations. Prior notification and approval of the clinical supervisor is required except in emergent situations.

In addition, students may miss days for previously planned events (weddings, special events, etc.). In these cases, students must authorize the absence at least 1 month prior to the event with the Program Director(s), and then notify any clinical supervisors and course directors individually. The student needs to complete an Absence Form indicating the reason for absence (Appendix D). Failure to do so will result in deductions in participation grades. For schedule absences, the student must make up any missed material. The Genetic Counseling Graduate Program will set up a distance learning option, via a WebEx Meeting, only in the following circumstances:

1. The class is being taught in a room with WebEx capabilities and is not an experiential class (i.e. PBL, Clinical Skills Laboratory, Laboratory rotation, clinical rotation).
2. The student has provided the necessary one month advanced notice.
3. The student is physically out-of-state or more than 2 hours away from the OSU Campus, and thus unable to attend the class in person.

A scheduled absence is allowed a maximum of 1 time per Academic Year, unless there is an emergent extenuating circumstance.

Interviews and other absences that are scheduled on short notice will be given latitude at the discretion of the Program Director(s), Course Directors, and Clinical Supervisors.

**Chronic Absences and Tardiness**

Chronic absences and/or tardiness impact learning in the classroom, impact patient care schedules in a clinical setting, and reflect poorly on an individual’s professional motivation and dependability. Each class will have their own attendance policy but repeated tardiness and absence may be reflected in course grades. Tardiness to any required courses, clinical rotations or program events/meetings, and unexcused absences will not be tolerated and will result in a warning. Students who are late for exams will not be allowed additional time.
Conflicts between Clinical Work and Classes/Conferences

Interesting or unusual patients may arise at times when classes or ancillary meetings (such as grand rounds or case conferences) are scheduled. Students may opt to be excused from scheduled ancillary meeting per rotation without penalty; advance notification of the Program Director(s) is required. With regards to classes, if a supervisor feels strongly that there is significant merit in seeing a case scheduled during class time, up to one class may be missed with the instructor’s permission and without penalty during each rotation. Supervisors must contact the course director and advisor in advance for this to be considered an excused absence.

Emergent Absences

In cases of absence for serious injury, illness, or personal emergency such as a death in the family, the student must call the appropriate faculty person or coordinator in charge of student assignments within two hours of the start of the session that will be missed. They should also contact the Program Director(s), or e-mail at OhioStateGCPProgram@osumc.edu when the emergency permits. Upon return, the student needs to complete an Absence Form indicating the reason for absence (Appendix E). Again, students may be required to make up missed work at a later time.

Students are strongly encouraged to attend:

- Occasional seminars sponsored by the OSU-GCGP
- A national genetics meeting in their second year of training. The NSGC meeting is recommended, but other options include ASHG (fall) or ACMG (spring). The program will contribute up to $1000.00 for travel and registration for this meeting

RELIGIOUS OBSERVATION POLICY

The Genetic Counseling Graduate Program follows the OSU College of Medicine policy on religious observations. This policy holds that every reasonable effort should be made to help students avoid negative academic consequences when religious obligations conflict with academic course requirements. Any student who is unable due to his or her religious beliefs to attend classes or participate in any academic requirement such as assignments, quizzes or examinations shall be provided with an opportunity to make up the assignment or examination or be given a reasonable alternative opportunity to complete their academic requirements without penalty unless it can be demonstrated that such an accommodation would fundamentally change the essential nature of the element of the curriculum, interfere with the delivery of the course, or create an unreasonable burden upon the program. Students who anticipate absences from scheduled required educational activities must notify the course or clerkship director at least four weeks in advance of the anticipated absence to request accommodations.

Although the Genetic Counseling Graduate Program makes every effort to accommodate participation in religious holidays and other religious observations, genetic counseling students should recognize that the requirements of patient care and required clinical education are significantly different from standard classroom education. If a course director or clinical supervisor reports that accommodations for a religious observation cannot be made and that this would result in negative academic consequences for
the student, the student should contact the Genetic Counseling Graduate Program Director(s) for further consideration.

COM academic faculty and staff are referred to the Interfaith Calendar Website as a resource of religious holidays: http://www.interfaithcalendar.org/

**LEAVE OF ABSENCE POLICY**

The Genetic Counseling Graduate Program follows the Leaves of Absence (LOA) Policy of the Graduate School (see http://www.gradsch.osu.edu/appendix-e.html). However, extended LOAs during graduate training are discouraged as there is no easy method of rejoining the curriculum. The student will receive no credit for work completed in the academic year of the LOA and will be required to resume the curricular year at the beginning of his or her return.

Student requests for an LOA in order to repeat an academic year due to marginal, but not failing, academic performance will not be granted.

**STUDENT MISTREATMENT POLICY**

**Standards of Conduct in the Teacher-Learner Relationship and Abuses of this Relationship**

The Genetic Counseling Graduate Program adheres to the College of Medicine guidelines regarding the teaching and learning environment. Following is the College of Medicine’s philosophy, policies, and mechanisms for handling issues related teacher-learner relationships.

**A Climate of Mutual Respect**

The OSU College of Medicine has as a core value a climate of mutual respect in the teaching and learning environment. It is committed to promoting a mistreatment free environment for all students, staff, volunteers, and physicians. The College maintains its commitment to prevent student mistreatment through education, by providing support for victims, and by responding with corrective action. In this way, the College assures an educational environment in which students, staff, volunteers, and physicians may raise and resolve issues without fear of intimidation or retaliation. The College is committed to investigating all cases of mistreatment in a prompt, sensitive, confidential, and objective manner.

Mistreatment may be defined as “treatment of a person that is either emotionally or physically damaging; is from someone with power over the recipient of the damage; is not required or not desirable for proper training; could be reasonably expected to cause damage; and may be ongoing.” This includes verbal (swearing, humiliation), emotional (neglect, a hostile environment), sexual (physical or verbal advances, discomforting humor), and physical harassment or assault (threats, harm). To determine if something is mistreatment, one should consider if the activity or action is damaging, unnecessary, undesirable, or ongoing or could reasonably be expected to cause damage.
The following are examples only and are not meant to be inclusive of all types of mistreatment. Furthermore, these examples may not always constitute mistreatment given a specific situation. For example, while “unwanted sexual advances” are clearly an example of sexual harassment, “being stared at” does not always constitute sexual harassment.

**Verbal:**
- Yelling or shouting at a student
- Humiliation or putdown (e.g., disparaging remarks about being in medicine)
- Racial, ethnic, or sexual orientation discrimination (e.g., slurs, jokes, prejudiced remarks)
- Non-constructive criticism
- Threatening to hit or to cause harm to others

**Emotional:**
- Being assigned work duties for the purpose of punishment rather than education
- Having others take credit for your work (e.g., papers, projects, clinical work, or research)
- Creation of a hostile environment
- Exclusion from formal or informal learning settings
- Threats to one’s academic standing (e.g., threatening to fail, to lower grades, or to give a poor evaluation)
- Being requested to perform personal duties for supervisors (Examples: getting refreshments such as coffee or picking up cleaning)

**Sexual:**
- Being stared at or leered at
- Unwelcome sexual comments, jokes, innuendoes, or taunting remarks about one’s body, attire, age, gender, sexual orientation, or marital status
- Malicious gossip pertaining to sexual habits
- Display of pornographic, sexually offensive, or degrading pictures
- Unwanted sexual advances, including unnecessary physical contact by touching, pinching, or patting
- Nonconsensual sexual intimacy with or without actual intercourse

**Physical:**
- Being pushed, shoved, shaken, or tripped
- Being slapped, hit, punched, or kicked
- Assault with a weapon (e.g., needle or surgical instrument)
- Aggressive violation of one’s personal space (e.g. “getting in one’s face”)

*Mistreatment* is to treat in a harmful, injurious, or offensive way; to attack in words; to speak insultingly, harshly, and unjustly to or about a person; and to revile by name calling or speaking unkindly to an individual in a contentious manner. Mistreatment is further defined to be particularly unnecessary or avoidable acts or words of a negative nature inflicted by one person on another person or persons.

*Harassment* is verbal or physical conduct that creates an intimidating and/or hostile work or learning environment in which submission to such conduct is a condition of one’s professional training.
Discrimination is a behavior, action, interaction, and/or policy that adversely affect one’s work because of disparate treatment, disparate impact, or the creation of a hostile or intimidating work or learning environment.

**Mechanism for Prompt Handling of Complaints**

**Staff-to-Student Abuse:** Faculty, clinical supervisors, committees, and staff work to create a learning environment that is mistreatment-free and a climate that has at its core mutual respect among students and all personnel. Problems may be reported at any support staff level based on the specific issue and the student’s comfort level. Students may report to:

- Course directors (faculty)
- Program Director(s) (faculty)
- Any member of the dean’s staff

**Clinical placements** have their own internal structure, based on mutual respect and a dedication to resolve issues of mistreatment at the most effective level, in the timeliest manner. Often the clinical placement personnel are the most effective at resolving mistreatment situations that occur at the rotation sites. Specifically, students should contact the appropriate clinical placement personnel based on the issue and the student’s comfort level including:

- Clinical Placement Coordinator
- Clinical Supervisor

Students may report an incident that occurred in a clinical placement to the Genetic Counseling Graduate Program’s Director if they feel more comfortable doing so.

**Student-to-Student Mistreatment:** If a student feels that the mistreatment involves a breach of ethical behavior by another student, they can report it to the Genetic Counseling Graduate Program Executive Leadership (Director(s), Associate Director, Medical Director) or a member of the Academic and Behavioral Review Committee. These types of mistreatment include student-to-student interactions, cheating, plagiarism, or misrepresentation of student work. Other acts of student-to-student mistreatment, such as sexual harassment or racial or ethnic discrimination, may be reported directly to the College of Medicine’s Vice Dean for Education, any faculty member, clinical supervisor, or other staff based on the issue and the student’s level of comfort.

**Mechanisms for Resolution of Reports of Student Mistreatment**

Whenever an incident of mistreatment is reported, the College shall attempt to resolve the issue in a rapid and efficient manner, thereby maintaining a healthy teaching and learning environment. Depending on the incident, a variety of pathways to resolution may be chosen. The majority of the complaints against faculty or students can be dealt with on a departmental basis, with feedback to the faculty member or student from the Genetic Counseling Graduate Program Director(s). More complex issues involving hospital personnel, community hospitals, or non-faculty mistreatment incidents may require interaction with departmental or divisional education committees, hospital educational offices, hospital ethics committees, directors of nursing, hospital administrators, and/or section/division heads.
The Academic & Behavioral Review Committee, through the Mistreatment Incident Report Form, will monitor the resolution of these incidents to assure that appropriate procedures are followed at all times and, where necessary, refer them to the appropriate University resources.

**Staff Education**

**Hospital Staff:** Since residents and nurses do not work directly for the College, but work for University Hospitals, the College will suggest to the hospital, and to the individual residency programs, activities that they may wish to undertake to sensitize their staff to student abuse. Staff should be educated as to the prevalence and types of mistreatment that have been reported specific to the College of Medicine. A copy of the current policy will be available to all department offices and attending OSU faculty.

**Attendings, Course Directors, and Clinical Supervisors:** The Genetic Counseling Graduate Program Faculty Handbook contains sections on the learning environment and student mistreatment. The College policy on mistreatment is provided to all faculty of the Genetic Counseling Graduate Program via Web-based information and hard copy. The Genetic Counseling Graduate Program Director(s) review the College of Medicine and Graduate School policies on student mistreatment and harassment with each faculty member during the faculty trainings that occur yearly.

Specific actions that faculty can take to ensure a professional and mistreatment free environment include:

1. Be certain that all members of the health care team know their roles and expectations, that incidences of mistreatment are discussed, and that students know the appropriate mechanisms by which they can report unprofessional behavior.
2. When a faculty member hears racial, sexist, or gender jokes and comments, they are directed to tell the person making such comments that they consider them inappropriate and unprofessional.
3. Be certain to welcome students of all genders and ethnicity to a given service and to create a comfortable environment for them, and assure them that they have the same opportunities and responsibilities as others on the service.
4. Welcome students as learners and realize that learners are nervous and vulnerable when they are beginning to learn something new. Help break the cycle of “acculturation” that has persisted in the past, which is exemplified by such statements as, “When I was in graduate school, I was treated poorly and you should expect the same.”
5. All health care team members should speak respectfully and honestly so that students are not shocked or disappointed in the way they talk about patients in private.
6. Work professionally with gay, lesbian, and bisexual students and avoid remarks that would make them uncomfortable.
7. Treat students kindly and professionally so that they will treat students in the same way.
8. During monthly or other regularly called meetings, include opportunities for students to communicate and exchange information on their working environment and their educational programs.
9. When designing or redesigning clinical supervisor or faculty evaluation processes, be sure to include items on mistreatment and use the results of these evaluations for constructive criticism as well as praise for student’s behavior.

**Student Life Office:** In addition, the Office of Student Life will report major College policy changes designed to address abusive situations to the hospitals and departments.
All reports of sexual harassment will be forwarded to the College of Medicine and University office responsible for investigation. Other reports of alleged abuse will be handled on a case-by-case basis. Investigation of anonymous complaints are not possible, but the complaints will be collected, filed in the College of Medicine Vice Dean for Education’s office, and reviewed as new complaints are received to determine if a pattern is present.

ROMANTIC AND/OR SEXUAL RELATIONSHIPS POLICY

What relationships or behaviors are really prohibited?

Teachers (faculty, instructors, staff, graduate assistants, or undergraduate teaching assistants) are prohibited from engaging in romantic or sexual relationships with students in their classes.

Faculty, staff, or instructors, as well as faculty from other universities or individuals from industry are prohibited from engaging in romantic or sexual relationships with students upon whose thesis, dissertation, program, or exam committees they sit or over whom they exercise significant academic or career-determining authority.

Coaches (Staffs, graduate assistants) are prohibited from engaging in romantic or sexual relationships with students that they coach.

Faculty, staff, and student employees are prohibited from engaging in romantic or sexual relationships with students that they advise.

Faculty, staff, instructors, graduate assistants, or graduate students are prohibited from engaging in romantic and/or sexual relationships with individuals with whom they are engaged in counseling relationships, as is specified by counseling codes of ethics.

Faculty, staff, instructors, graduate students, or undergraduate students are prohibited from engaging in romantic and/or sexual relationships with any individual as defined in their field-specific codes of ethics or professional responsibility.

Faculty members may not serve as graduate school representatives (exam, dissertation defense) for students with whom they are engaged in a romantic and/or sexual relationship.

Supervisors (faculty, staff, or students) are prohibited from engaging in romantic or sexual relationships with employees that they supervise (direct reports).

What is a power differential?

An individual need not occupy a direct position of organizational authority over an individual (e.g., supervisor to direct report, teacher to student) for there to be a power differential. Power is present in supervisor-employee, teacher-student, tenured-nontenured relationships, and power can also derive from differences in gender balance of a group, length of time with the department or university, relative status in a field of scholarship, age variances, etc. For example, it could be that an individual has been in
a position or academic program for five years and the other individual is a new hire; this can present a power differential. Another example could be that out of a staff of 20, 19 are female and one is male; this can also present a power differential.

Individuals entering into a consensual relationship in which a power differential exists must recognize that the reasons for entering, maintaining, or terminating such a relationship may be a function of the power differential. According to the American Association of University Professors, “The respect and trust accorded a professor by a student, as well as the power exercised by the professor in an academic or evaluative role, make voluntary consent by the student suspect.”

An imbalance of power is inherent in the teacher-student relationship, as well as the relationship between a student and a staff member. The student may defer to the teacher or staff person as an expert, a respected figure whose authority is unassailable. This power imbalance can be further exacerbated by the existence of other factors such as race, gender, sexual orientation, international student/scholar status, command of the English language, and previous sexual victimization. (See Report to the President’s Council on Women from the work group examining the university’s policy on consensual relations between faculty and students, January 11, 2005.)

**What does institutional power mean?**

Institutional power means that one individual occupies a position of authority over another individual. This institutional power can manifest through the ability to make or significantly influence such decisions as:

- Admission to or matriculation through an academic program
- Assignment of grades, determining pass/fail status in the candidacy exam or dissertation defense
- Selection, termination, compensation, promotion, or tenure in the employment setting
- Approval of sick or vacation leave
- Permission to take classes during the work day
- Assignment of resources necessary to do one’s job

**What are acceptable alternative arrangements?**

Acceptable alternative arrangements can be made by working with one’s supervisor, chair/director, or dean/vice president. The arrangements must alleviate any actual or perceived conflicts of interest or potential conflicts of interest. They may include altering supervisory or reporting lines; moving a student to another section of the same class; having the teacher switch class sections with another teacher; appointing a different individual to serve on a thesis, dissertation, program, or evaluative committee; moving a student to another position of the same or comparable status and duties; or establishing alternative means of evaluation of academic or work performance, among other options. Having acceptable alternative arrangements made is not an entitlement and if the department determines they are not feasible, the relationship must cease.

**Who has a duty to act regarding prohibited relationships?**

- Any individual who begins a prohibited relationship must disclose and cooperate in making alternative acceptable arrangements.
• Any human resource professional, faculty or staff supervisor, chair/director, or dean/vice president who becomes aware of a prohibited relationship must seek to ascertain that an acceptable alternative arrangement has been made.
• Any human resource professional, faculty or staff supervisor, chair/director, or dean/vice president who becomes aware of a prohibited relationship for which alternative acceptable arrangements have not been made must report the relationship to the Office of Human Resources. This is the case even across departments, colleges, or units.

**Who has a duty to act regarding sexual harassment in general?**

Any human resource professional, supervisor, chair/director, or faculty member who becomes aware of information that would lead a reasonable person to believe that sexual harassment has occurred must notify the Office of Human Resources (OHR), Organization and Human Resource Consulting, by ensuring that a Discrimination/Harassment Complaint Form or other appropriate documentation is filed within five working days of becoming aware of the information. The Complaint Form/documentation will initiate collaboration between OHR, Organization and Human Resource Consulting and the unit human resource professional to determine how to proceed with resolving the complaint. Failure to exercise reasonable care by appropriately referring and addressing these complaints may result in personal as well as institutional liability.

**What about current prohibited relationships? Do those individuals have to disclose?**

Yes. Any individual who is currently in a prohibited relationship must immediately disclose and cooperate in making alternative acceptable arrangements.

**What about past prohibited relationships? Do those have to be disclosed?**

Past prohibited relationships, in effect and ended before the effective date of this policy (June 1, 2006), must be disclosed only when they create conflicts of interest in the present or future.

**Why are these relationships a conflict of interest?**

A conflict of interest is a real or seeming incompatibility between one’s private interests and one’s public or professional duties. The ability to make objective decisions is compromised if there is a romantic and/or sexual relationship between two individuals who have a reporting or evaluative relationship. Other students and faculty may be affected because it places the authority figure in a position to favor or advance one student’s interest at the expense of others and implicitly makes obtaining benefits contingent on amorous or sexual favors.

**How will same-sex sexual and/or romantic relationships be handled?**

These relationships should be handled in the same manner as opposite-sex sexual and/or romantic relationships are handled. Care should be taken not to discriminate against same-sex couples in any way, as the University’s Affirmative Action, EEO, and Nondiscrimination policy prohibits discrimination based upon sexual orientation, among other categories. Individuals involved in same-sex sexual and/or
romantic relationships that have concerns about disclosing and making alternative acceptable arrangements based upon fear of discrimination should contact the OHR, Organization and Human Resource Consulting at (614)292-2800.

**What are the consequences if a violation occurs?**

Where a violation of the sexual harassment policy is found, including the “romantic and/or sexual relationships” section, steps will be taken to ensure that the behavior is stopped promptly, or that the relationship is managed appropriately. Appropriate corrective action may range from counseling, written reprimands, suspensions, or other action up to and including dismissal in accordance with established University rules and procedures. The OHR, Organization and Human Resource Consulting will monitor corrective action to ensure compliance.

In cases involving faculty members, corrective measures may be imposed in accordance with chair/dean administrative authority and/or Faculty Rules and Procedures 3335-5-04. For unclassified and classified civil service employees, refer to Human Resources Policy 8.15, Corrective Action. For bargaining unit employees, refer to the appropriate collective bargaining agreement. In cases involving students acting in their employment capacity, measures may be imposed in accordance with Human Resources Policy 10.10, Student Employment; in all other cases, measures may be imposed in accordance with the Code of Student Conduct.

**What if I am the only professor who teaches a required class, and I want to initiate a relationship with a student who will have to take the class?**

If there is no feasible way to alleviate the conflict of interest, it is not possible to engage in the relationship. Individuals might consider other alternatives:

- Delay the initiation of a relationship until after the student has completed the class.
- Identify a comparable class taught in another department (e.g., a research methods course taught in FAES that is comparable to one taught in Education) and allow the student to apply for permission to substitute the course.
- Arrange an independent study with another qualified professor or practitioner from Ohio State, the immediate community, or another university.
- Arrange for the individual to be graded and guided by an equally qualified colleague at another university.

The conflict of interest must be removed by whatever reasonable means can be identified, without denying or degrading the student’s experience and creativity is invited. Although we encourage departments to be supportive in making alternative acceptable arrangements, they are not required to invest additional resources to do so. Such arrangements are not an entitlement. If acceptable alternative arrangements cannot be made, the relationship must cease.

**How soon do I need to notify my supervisor that I am in a relationship?**

Relationships generally do not come into existence “out of the blue”; often they evolve over time. If a faculty member is developing an interest in an individual over whom they will almost certainly have supervisory, teaching, evaluation, advising, coaching, or counseling authority, they should think about
the extent to which it will be feasible to make acceptable alternative arrangements to entirely avoid the conflict of interest.

If this will not be possible, and the faculty member and student decide to pursue a relationship, the relationship will be prohibited at the point that one individual has authority over the other; that is, at the point at which the conflict of interest manifests. If a faculty member and student start dating, or become intimate with an individual over whom they have such authority, they are required to immediately notify their supervisor and make alternative acceptable arrangements. It is not acceptable to let the relationship continue for a few weeks or months before doing so.

**What options are there for corrective action with tenured faculty?**

There are a range of options when addressing violations of policy with faculty, depending on the nature of the violation and the specific fact pattern. Some actions that may be taken are: letters of reprimand placed in the personnel file; loss of salary increase or increases; removal of administrative responsibilities and compensation; removal of privilege of advising graduate students; removal of supervisory privilege over students, faculty, and staff; title change (e.g., removal of named chair); resignation in lieu of detenurization; and initiating the 504 (detenurization) process.

**How should this be communicated to faculty, staff, and students?**

Deans and department chairs should cover this policy directly with faculty at the first faculty meeting of the year each year. Faculty and staff leaders should review this policy with supervisors and employees on an annual basis.

**How can I talk with students/staff who are upset that they cannot be in a relationship with someone who has supervisory responsibility over them?**

Listen for understanding and be sensitive. Explain the policy. Read the final report of the Task Force and talk with the individual about all the potential repercussions of such relationships, to the individual, her/his peers, the person in the position of power, the department, and the institution. Refer students to additional resources such as the Student Advocacy Center, Student Life, and Counseling and Consultation Service:

*Younkin Success Center (4th Floor)*
*1640 Neil Avenue (Just South of 11th Avenue)*
*Phone: 614-292-5766 ccs@studentlife.osu.edu*

Refer faculty and staff to the Office of Academic Affairs (614-292-5881), the Employee Assistance Program (1-800-678-6265) and OHR Organization and Human Resource Consulting.

**SEXUAL HARASSMENT POLICY**

The Genetic Counseling Graduate Program adheres to the OSU Sexual Harassment Policy 1.15. The policy in its entirety is available on the following website:

What are some examples of sexual harassment?

Inappropriate behavior may include:
- Sexual jokes, innuendoes, gestures.
- Unwanted flirtation, advances, or propositions.
- Pressure for sex.
- Leering.
- Display of sexually suggestive objects/visuals.
- Display/transmission of sexually suggestive electronic content.
- Any unnecessary, unwanted physical contact.
- Sexual assaults (if this occurs, call the police immediately and maintain evidence).

What should I do if I feel I have been sexually harassed?

- Document the problem behavior: date, time, place, witnesses, specific behaviors.
- Tell the harasser that the behavior is offensive and that you want it to stop.
- Seek counseling and personal support from the Counseling and Consultation Service (for students: 614-292-5766) or the Employee Assistance Program (for faculty and staff: 1-800678-6265).
- File a complaint with OHR Organization and Human Resource Consulting by calling 614-292-2800 or by sending an e-mail to sexualharassment@osu.edu.

What about false allegations?

Sanctions may be imposed on individuals who knowingly or with reckless disregard for the truth make false accusations of sexual harassment. Just because a complaint cannot be proven does not mean that it is false.

Is sexual harassment only male to female? Supervisor to employee? Faculty to student?

Sexual harassment occurs when individuals feel they are the recipients of unwanted sexual attention or behavior. Sexual harassment can happen to or be perpetrated by anyone against anyone else: women, men, students, faculty, staff, supervisors, employees, volunteers, and vendors.

Can I file a confidential complaint?

The University cannot promise complete confidentiality. Each situation is resolved as discreetly as possible. Ohio State is obligated to follow up on all allegations. There are times that a one-on-one conversation with the alleged harasser can resolve the situation without revealing the complainant’s identity. If this does not work, then it is often necessary to reveal the complainant’s identity to conduct an investigation. Students and faculty may make an anonymous complaint to the University Anonymous

**What is the purpose and possible outcome of an investigation?**

The purpose of the investigation is to evaluate the allegations of sexual harassment, formulate a response to address the situation, and follow up to ensure that recommended actions have been taken. Outcomes can include: no finding of harassment, finding of inappropriate behavior, finding of harassment, or finding of false allegations. The ultimate goal is to stop the harassment.

**Who is typically involved in an investigation?**

OHR Organization and Human Resource Consulting conduct investigations. The charged party and the unit human resource professional are notified. Management, the department chair/unit director, and dean/vice president may also be notified. Information will only be shared with individuals who have a “need to know."

**What if I am retaliated against?**

Individuals who report sexual harassment or who are involved in the investigation as witnesses are protected against retaliation by University policy as well as state and federal law. The University will take appropriate corrective action toward those individuals who retaliate against someone because he/she filed a complaint, encouraged someone to file a complaint, served as a witness in an investigation, or otherwise participated in an investigation. If a student feels that he/she are being retaliated against, contact OHR Human Resources Organization and Human Resource Consulting immediately at 614-292-2800.

**What should I do if I feel in danger?**

If something has occurred in the workplace that is causing fear for personal safety, contact University Police at 292-2121 or local police at regional campuses. Then contact OHR Organization and Human Resource Consulting at 614-292-4500. If a student feels in danger in the academic environment; contact the Office of Student Life after contacting the police.

**TRAVEL POLICY**

**Funds to Support Student Travel to Local Professional Meetings**

The OSU-GCGP encourages travel to local conferences/meetings for both first- and second-year graduate students. In order to facilitate opportunities for students to participate in local conferences, the OSU-GCGP is willing to reschedule classes provided it works for all the students enrolled in the class and the course instructors. It is important to note that reimbursement for expenses due to local travel to conferences is not guaranteed to be reimbursed by the OSU-GCGP. All reimbursement for local meetings will be considered on a case-by-case basis if the OSU-GCGP office is provided with information about the conference prior to the student’s participation.
Funds to Support Student Travel to Local Professional Meetings

Students in good academic standing will be provided $1000.00 to travel to the National Society of Genetic Counselors’ Annual Education Conference (NSGC AEC) in the fall of their second year. **Any costs over the $1000.00 stipend will be incurred by the student.**

Authorization to Travel:
1. Approval for travel and its estimated costs, must be documented prior to the trip and available for audit and review.
2. A student may not approve his/her own travel.
3. An OSU Travel Request Form must be filled out by the traveler to request the ability to travel to the conference **before he/she goes anywhere.** This form can be obtained from and submitted by the OSU-GCGP Program Assistant. The form must be completed at least 30 days prior to travel.

Use of Personal Funds:
1. Personal funds used to facilitate travel arrangements will not be reimbursed until after the trip occurs and the Travel Reimbursement Form has been completed and approved by the OSU-GCGP Program Director.
2. All students should incur the lowest reasonable travel expenses and exercise care to avoid impropriety and/or the appearance of impropriety.
3. Reimbursable expenses to the NSGC AEC are limited to transportation, per diem, lodging and conference registration.
4. All requests for reimbursement with supporting documentation within 60 days of completion of the trip to obtain reimbursement of travel expenses.

Reimbursements
1. Reimbursement of documented travel expenses is based on reasonable and actual expenses supported by original, itemized receipts where required. On an occasional basis if original receipts are not available, a substitute document can be used.
2. Travel expenses that have been or will be reimbursed to a traveler by a third party must be referenced in the travel system and will not be paid by the university.
3. Reimbursements are processed and approved in the travel system via the OSU-GCGP Program Coordinator.
4. Reimbursements that exceed the travel estimate by 20% or more must be approved by the designated approval authority.

Airfare
1. All flights **must** be arranged through the OSU-GCGP Program Administrator. Students who book their own flights, rent a car, or use their personal vehicle to attend the NSGC Conference without prior approval will **not** be reimbursed by the OSU-GCGP.
2. Coach class or economy ticket should be purchased for all flights. The lowest reasonable airfare expenses that meet the travel needs should be incurred. First class and business class tickets will **not** be paid for or reimbursed by the OSU-GCGP.
3. Boarding pass must be printed for all legs of the trip and turned in with Travel Reimbursement Form.

Rail
1. Same as airfare regulations.

Personal Vehicles
1. Mileage will be reimbursed for personal vehicles as a primary mode of transportation if the cost does not exceed the least expensive airfare. Additional expenses, including but not limited to hotel expenses and Per Diem, should be considered when comparing the cost of a trip by auto to airfare.
2. Reimbursement for usage of a personal automobile is based on the IRS mileage rate. IRS mileage rate includes all vehicle related expenses (i.e. gasoline, wear and tear and personal auto insurance).
3. Mileage log (including date, odometer readings, destination, and purpose of travel) or other supporting documentation to document mileage distance of trip (e.g. MapQuest) is required upon completion of trip in order to receive reimbursement.
4. Mileage will be reimbursed after the trip is completed, provided the documentation mentioned in #4 above is turned in to the OSU-GCGP office.

Conference Registration Fees:
1. Conference registration fee must be prepaid by the OSU-GCGP prior to any conference early-bird deadlines.
2. Conference rates will only be reimbursed for students at the student-member rate.

Lodging:
1. The OSU-GCGP will reserve and cover the cost of three rooms for the graduate students to share at the conference.
2. Should a student wish to stay in a hotel room by themselves or with a non-OSU graduate student then the cost of the room will be at their expense.
3. Minibar, room service, and other incidentals will not be reimbursed by the OSU-GCGP.
4. Students must return an itemized bill for the hotel expenses to the OSU-GCGP when the trip is completed.

Meals:
1. Meals will be reimbursed based upon itemized receipts up to the Per Diem expense for the day.
2. The Per Diem allowance for the first and last days of travel is up to 75% of the full Per Diem rate.
3. Full meal allowances will not be paid if a meal is included in a conference registration fee, built into the hotel room rate or replaced by a legitimate business meal (i.e. continental breakfast at conference, sponsored luncheon, program sponsored dinners). In these instances, the allowance for reimbursement will be adjusted by deducting the appropriate meal percentage (25% - breakfast; 25% - lunch; 50% - dinner) from the full Per Diem allowance for applicable city location.
4. Alcohol will not be reimbursed by the OSU-GCGP.
5. Guest(s)' meals will not be reimbursed by the OSU-GCGP.
6. All itemized receipts for meals must be turned in to the OSU-GCGP after the trip is completed.
7. Meal Allowances are paid after the trip is completed and are based upon the federal meal and incidental (Per Diem) rates that vary by city location provided the documentation mentioned in #6 above is turned in to the OSU-GCGP office. Per Diem rates can be found on the U.S. General Services Administration’s Per Diem Rates Website.

**Miscellaneous Business Expenses:**

1. Miscellaneous business expenses (excluding those specifically noted above) considered necessary for business travel may be reimbursed for each expense with original receipts.
   a. Cab fares receipts for transportation to and from the conference airport and lodging. The OSU-GCGP will only reimburse for cab fare to dining establishments on a case-by-case basis; consideration will be given to location of conference.
   b. Baggage fee for one bag to be transported to the meeting location.
   c. Parking tolls will be reimbursed.

**Payments that do not adhere to the above procedures will not be reimbursed. There are no exceptions to this policy.**

**WORKSPACE POLICY**

Graduate students need access to adequate space with proximity to their advisors, faculty, research equipment and students. We are typically able to provide office/carrel space to all students; however, it is important to note that our student workspace is a shared resource. As such, students will be assigned to a shared space by the OSU-GCGP Program Coordinator. Given that space is one of the University’s most important and costly resources, graduate students must adhere to the following rules regarding OSU-GCGP space.

**Student Carrels:**

2. Student workspace will be assigned to two students (one first year student and one second year student).
3. Assigned space will be reviewed on an annual basis.
4. The assigned workspace and fixed contacts (cabinetry, file drawers) may not be renovated.

**Personal Belongings:**

1. Personal belongings may be stored in workspace during the time in which the student is using the space.
2. The workspace is not meant for long-term storage of personal belongings.
3. The OSU-GCGP is not responsible for lost or stolen personal belongings.

**Telephones:**

1. Telephones in faculty offices, clinic space and student carrels are for University or Medical Center Business.
2. Long-distance calls for patient care and/or other clinical services may be placed using the OSU Division of Human Genetics long distance codes. Long-distance calls for graduate program business (thesis projects, offsite locations, coursework) should be placed using the graduate program long-distance telephone codes. The OSU-GCGP Program Coordinator will provide these codes to students as needed.
3. Telephones may not be used for personal calls.
Computers:
As part of the physical and social learning infrastructure, the OSU-GCGP, under the auspices of The Ohio State University develops and maintains computers, computer systems, and networks. These Computing Resources are intended for university-related purposes, including direct and indirect support of the university's instruction, research, and service missions; university administrative functions; student and campus life activities; and the free exchange of ideas among members of the university community and between the university community and the wider local, national, and world communities.

The rights of academic freedom and freedom of expression apply to the use of university computing resources. So, too, however, do the responsibilities and limitations associated with those rights. The use of university and the OSU-GCGP computing resources, like the use of any other university-provided resource and like any other university-related activity, is subject to the requirements of legal, regulatory, and ethical behavior within the university community. Responsible use of a computing resource does not extend to whatever is technically possible. Although some limitations are built into computer operating systems and networks, those limitations are not the sole restrictions on what is permissible. Students must abide by all applicable restrictions, whether or not they are built into the operating system or network and whether or not they can be circumvented by technical means.

All students that use the computing resources at OSU and within the OSU-GCGP must:

1. Comply with all federal, Ohio, and other applicable laws related to computer use. Examples of such laws, rules, policies, contracts, and licenses include: the Family Educational Rights and Privacy Act (FERPA); Health Insurance Portability and Accountability Act (HIPAA); laws and regulations governing export control, which prohibit the electronic transmission of certain types of information to citizens of specified countries; laws governing libel, privacy, copyright, trademark, obscenity, and child pornography; the Electronic Communications Privacy Act and the Computer Fraud and Abuse Act, which prohibit "hacking," "cracking," and similar activities; the Americans With Disabilities Act as reflected in the Web Accessibility Policy; Code of Student Conduct; Sexual Harassment Policy; Institutional Data Policy; Disclosure or Exposure of Personal Information Policy; and all applicable software licenses.

2. Use only those computing resources they are authorized to use and use them only in the manner and to the extent authorized.

3. Respect the privacy of other users and their accounts, regardless of whether those accounts are securely protected.

4. When not in use and not attended, all users must log off the computer.

5. Refrain from using computing resources for personal commercial purposes or for personal financial or other gain. Personal use of university computing resources for other purposes is permitted when it does not consume a significant amount of those resources, does not interfere with the performance of the user's job or other university responsibilities, and is otherwise in compliance with this policy. Further limits may be imposed upon personal use in accordance with normal supervisory procedures or as a matter of college, department or unit policy.

6. Students must refrain from stating or implying that they speak on behalf of the university and from using university trademarks and logos without authorization to do so. Affiliation with the university does not, by itself, imply authorization to speak on behalf of the university. This also extends to the use of social media.

7. The university employs various measures to protect the security of its computing resources and of their users' accounts. Users should be aware that the university cannot guarantee such security. Users should engage in "safe computing" practices by establishing appropriate access
restrictions for their accounts, guarding their passwords, and changing them regularly. **Accounts and passwords may not be shared with, or used by, persons other than those to whom they have been assigned by the university**

8. Students are responsible for logging off all computers after use. Computers should never be left logged onto while unattended. If an unattended computer is found with an active login by a student, the following will occur:
   a. 1st offence: Student will receive a verbal and written warning which will be put in their academic file.
   b. 2nd offence: Student will receive a second verbal and written warning which will be put in their academic file. In addition, they will be required to read and sign the computing policy.
   c. 3rd offence: Student’s computing privileges will be revoked.

9. The OSU-GCGP does not routinely monitor individual usage of its computing resources, the university may specifically monitor the activity and access the accounts of individuals users of computing resources, including individual login sessions and communications without notice, under circumstances delineated in the OSU Computing and Network Policy which can be found at [https://ocio.osu.edu/sites/default/files/assets/Policies/Responsible-Use-of-University-Computing-and-Network-Resources-Policy.pdf](https://ocio.osu.edu/sites/default/files/assets/Policies/Responsible-Use-of-University-Computing-and-Network-Resources-Policy.pdf).

The OSU-GCGP will provide one computer per student carrel. As such, computers are a shared-resource between first-and second-year students. Computers are the property of the OSU-GCGP and may not be removed from the premises.
SECTION 8: ACADEMIC AFFAIRS

FAMILY EDUCATIONAL RIGHTS & PRIVACY ACT – FERPA

Faculty and students should be aware of the Family Educational Rights and Privacy Act (FERPA). Graduate students are protected by FERPA - a set of laws enacted in 1974 – which guarantees students the right to review and inspect their educational records, to seek to amend educational records and to have some control over the disclosure of educational record information. Grades should not be posted publicly with student names or other information which would allow a third party to identify the student. Faculty should not give out student personal information or grades to third parties without the express consent of the student.

More detailed information about policies regarding privacy and release of student educational records from the Office of the University Registrar is available at:
http://registrar.osu.edu/policies/privacy_release_student_records.pdf

For those faculty members who wish to learn more about FERPA, there is an online tutorial at the following link:
http://registrar.osu.edu/staff/ferpa_tutorial/main.asp

CURRICULUM DEVELOPMENT & ASSESSMENT ADVISORY BOARD

The overarching responsibility of the OSU Genetic Counseling Graduate Program’s Curriculum Development and Assessment Advisory Board is to assist in the development and ongoing assessment of the graduate program’s curriculum. The advisory board will be responsible for ensuring that the curriculum is in line with the Graduate Program’s mission, the University’s mission, and with the ACGC accreditation standards for the genetic counseling profession.

Functions of the Advisory Board

Responsibilities include, but are not be limited to:

- Development and maintenance of an ability-based curriculum map, that documents and assesses appropriate learning of ability-based outcomes and the curriculum sequence to develop critical thinking skills.
- Description of learning objectives and competencies to be achieved in didactic, problem-based, and clinical/laboratory/advocacy placements.
- Establishment of objective measures and assessment tools for evaluating students, both academically and clinically.
- Development of an ongoing system utilizing internal and external validations to review and subsequently enhance the effectiveness of the curriculum.

Composition of the Advisory Board

[Type text] [Type text] Updated 12/21/2016
• The Advisory Board will be chaired by the Genetic Counseling Graduate Program’s Director(s).
• The Advisory Board will be comprised of a minimum of 7 members, with a maximum of 13 members.
• Members of the committee will be appointed by the Director(s) of the Genetic Counseling Graduate Program.
• Representation on the committee must encompass experience in medical genetics, teaching, clinical supervision, and other related subjects. In addition, the overall expertise of the committee should represent a cross-section of the genetic counseling profession, advocacy community, and the student/alumni population.
• Members must also have appropriate knowledge of the ABGC practiced-based competencies, ACGC accreditation standards, as well as the missions of The Ohio State University, The Ohio State University College of Medicine, and the OSU Genetic Counseling Graduate Program mission.
• The founding committee will have terms of either 3 or 5 years. After the initial stagger of the founding committee members, committee members will have three (3) year terms with options for reappointment.

GRADUATE STUDIES COMMITTEE

The Graduate Studies Committee consists of the Program Director, who is chair of the Graduate Studies Committee, the Associate Director, and the Medical Director for the OSU-GCGP. The Graduate Studies committee is responsible for the conduct and administration of its graduate program. Included are responsibility for curriculum, admission to the program, evaluation of academic progress, and general oversight of the requirements and rules of the program, although some duties may be delegated to other faculty members and/or committees of the OSU-GCGP.

Actions taken by the committee are subject to approval, modification, or reversal by the OSU-GCGP Curriculum Development and Assessment Advisory Board. Decisions made by Graduate Studies Committees must comply with Graduate School rules. The Graduate Studies Committee assumes other responsibilities as assigned to it by the Graduate School, the Graduate Faculty members in the graduate program, the head of the academic unit, or the committee members. The committee reports on its actions taken during the year to OSU-GCGP Curriculum Development and Assessment Advisory Board and Graduate Program Faculty.

Functions of the Committee

The following list summarizes the responsibilities of the Graduate Studies Committee. This list is not exhaustive.

Rules: Formulates rules and procedures relevant to the OSU-GCGP within the policies established by the Curriculum Development & Assessment Advisory Board, the Graduate Council and the Graduate Faculty members in the graduate program.
• Publishes and makes available to students and faculty in the graduate program a graduate program handbook containing the policies, rules, and procedures relevant to its own graduate programs.
• Establishes procedures for assigning and changing advisors.
• Considers and acts on student petitions that pertain to its rules.
- Considers and recommends action to the Graduate Council on student petitions that pertain to the policies and rules of the Graduate Council or the university faculty.
- Establishes rules respecting thesis master’s degree programs.

**Curricula, Program Changes, and Graduate Courses:** Considers and recommends action on curricula, program changes, and graduate courses proposed for graduate credit to Graduate Council.
- Considers and acts on requests for non-Graduate Faculty members to teach courses for graduate credit (5000-8000-level courses)
- May propose other plan options for tagged master’s degrees to the Graduate Council

**Graduate Faculty:** Appoints faculty for Category M membership on the Graduate Faculty and nominates faculty for Category P membership to the Graduate School. Also, approves emeritus faculty members to continue specified Graduate Faculty functions and reviews Graduate Faculty membership.

**Admissions:** Specifies admission criteria and admission credentials in addition to those required by the Graduate School.
- Specifies and monitors the conditions that must be satisfied by students admitted in the conditional classification.
- Approves provisional classification extensions and may withdraw the provisional offer of admission or recommend denial of further registration.
- Approves changes in a student’s admission classification.
- Approves extensions of the English as a Second Language time limit.

**Other:** In addition to enforcing Graduate School rules regarding master’s degree programs, the Graduate Studies Committee
- Establishes rules and procedures for the conduct of the master’s thesis dissertation and examination, including attendance by graduate students and faculty members other than the master’s examination committee members
- Reviews student records to ensure that master’s degree requirements are met

**Committee Composition:** The chair(s) of the Graduate Studies Committee is the Genetic Counseling Graduate Program Director(s). The other members of the committee are the Associate Director(s) and the Medical Director.

**GRADUATE PROGRAM FACULTY**

According to the [College of Medicine Faculty Handbook](#), all faculty members at the OSU College of Medicine have an obligation to teach. The receipt of a University salary entails a requirement for teaching of students enrolled in University educational programs.

In the Genetic Counseling Program this requirement applies principally to the teaching of genetic counseling and medical students, but may also be applied to the teaching of undergraduate and other graduate students as well.

Faculty for the Genetic Counseling Program will be selected by Genetic Counseling Program Graduate Studies Committee, with assistance from the Curriculum Development and Assessment Advisory Board.
Final review and approval is given by the Graduate Council. Appointments will be for a period of two years with option to reappointment for another cycle.

The graduate faculty is selected from the University faculty on the basis of academic training, experience, demonstrated potential for creative work and scholarly research, and evidence of the ability and competency essential to directing and supervising graduate students in their pursuit of advanced knowledge. Each graduate faculty member is authorized for specific graduate activities within the Genetic Counseling Program. These activities and the necessary qualifications for each are:

- **Teach Graduate Courses**: Qualifications: Graduate degree. Course Directors must have evidence of professional activity sufficient to assure awareness of current advances in the discipline or profession. Evidence of effective instruction or effectiveness in other types of professional presentations should be supplied. When possible, teaching evaluations should be provided as evidence of effective instruction. In the case of new appointments, strength of evidence that indicates potential may substitute for experience.

- **Serve on graduate student committees**: Qualifications: Graduate degree appropriate to the student's degree level. Faculty must have evidence of professional activity or scholarship sufficient to assure awareness of current advances in the discipline or profession. Evidence of effectiveness in advising, participation on graduate student committees, and supervising graduate student research should be supplied for re-appointments. In the case of new appointments, information suggesting potential for providing guidance to graduate students may substitute for participation on committees.

- **Direct master's theses**: Qualifications: Doctoral or other relevant terminal degree (A combination of a master's degree and scholarly activity may be considered as a substitute). Faculty must have evidence of professional activity and scholarship indicating participation in advances in the discipline or profession. Evidence of successful participation in the advising of graduate students and the direction of master's thesis research should be supplied for re-appointments. Records of any pertinent comments of Graduate Council Representatives on program committees will be reviewed. In the case of new appointments, information suggesting potential for directing master's theses may substitute for experience.

A courtesy faculty member may be appointed to the Graduate Faculty when appropriately qualified for the purpose of teaching a graduate level course, directing theses, or serving on a graduate student's committee. An affiliate faculty member is eligible to be appointed to the Graduate Faculty when appropriately qualified, typically for minor participation in graduate instructional activities (activities 1 or 3 above). For more information see the policy on [Courtesy Faculty and Affiliate Faculty Policy](#) document published by the OSU office of [Human Resources](#).

The same process for nomination to Graduate Faculty will be used for the removal or reduction in responsibility of Graduate Faculty Status when the Graduate Faculty member's status initially provided for continuing research or teaching duties. Before a regular faculty member's graduate faculty activities are reduced, the head or chair of the academic unit will write a letter to that faculty member, notifying him or her of the intent to change responsibilities. Cases in which the faculty member was hired for a fixed term/assignment, retired, died, moved or became inactive will be exempt from the removal process.
Graduate faculty members with the appropriate authorized activities will occasionally be called upon to act as a Graduate Council Representative (GCR). A GCR is required on the committees of master’s degree students who are writing a thesis, on Master of Arts in Interdisciplinary Studies committees, and on all doctoral committees. As the title suggests, a GCR is the representative of the Graduate Council on a graduate student's committee and interprets institutional policy concerning graduate degree requirements.

**ACADEMIC ADVISORS**

Academic advisors must be faculty members of the OSU-GCGP holding M or P status and who will be responsible for oversight and guidance on the student’s thesis project. Students should select a permanent advisor by the end of the first semester of study. The selection of a permanent advisor is one of the most important decisions a graduate student will make in his or her graduate student life. The choice of advisor can determine the pace of progress through their thesis project and success of a student. The advisor-student relationship is generally one of mutual interdependence, mentorship, research expertise, and even friendship, as each relies on the other in order to achieve various professional objectives.

Students are encouraged to talk to several faculty members as well as other graduate students before settling on a permanent advisor. Among the things the students should consider are whether the faculty member is active in ways that meet the student’s thesis project objectives, as evidenced by a visible and recent publication record. It also is important that the work styles of the student and advisor are compatible; that they share interests; and that each feels a commitment to the other. It is important also to note that an advisor helps students navigate the program, but both the student and the advisor have responsibilities in making certain a student’s graduate experience is rich and rewarding. Please see our appendix on graduate advising for examples of responsibilities as well as guidelines designed to make certain a relationship with an advisor is successful.

Students should consult their advisor about the selection of their thesis advisory committee, development of their protocol, submission to IRB, data collection and analysis, as well as final defense. Students are expected to meet with regularly with their Academic Advisor throughout their tenure at OSU. Advisors will also be available at other times if students or faculty have issues to discuss. At the end of beginning of the second year, all students will meet with the Program Director(s) and Associate Director, in addition to their Academic Advisor, to discuss general issues regarding progress towards completion of their thesis and their degree.

At times, the student may feel that a change of advisor is in his or her best professional interests. It is the student’s prerogative to change advisor if he/she feels it to be beneficial, and it is inappropriate for the current advisor to attempt to pressure the student into remaining in the relationship if the student does not want to. A student who wants to change advisors but feels uncomfortable approaching the current advisor to discuss the change, or who feels such pressure is being applied, should consult the Program Director or members of the Graduate Studies Committee for assistance.

**Graduate Advisor/Student Relationship**
Graduate advising is best understood as a relationship between graduate student and faculty advisor where both parties can expect that the other party will follow best practices in fulfilling his or her responsibilities as graduate student or advisor.

The relationship between a graduate student and advisor is one that can have a great impact on the academic achievements and life of a graduate student. This relationship can greatly encourage the academic pursuits of the graduate student, proving to be one of the most influential interactions of the scholar’s life. A relationship in which mutual expectations are not understood, however, may diminish a graduate student’s potential.

The Graduate Advising Best Practices section of the Graduate School Handbook outlines the minimum expectations for best practices in graduate advising at The Ohio State University. It is meant to be a spring board for each graduate program to discuss, develop, or reevaluate its local advising expectations and practices. This document was created in 2012 by the Council of Graduate Students in consultation with the Graduate School and approved by the Graduate Council. Following are excerpts from the Graduate Advising Best Practices Section of the Graduate School Handbook.

**Communication and Graduate Advising**

Regular and clear communication is essential to good graduate advising. It is recommended that as much communication as possible occur in person or over the phone to enhance clarity, reduce ambiguity and misunderstanding, and to resolve conflict. Written communication, e.g. via mail and e-mail, is appropriate, especially to document situations and potentially contentious issues. Problems that arise should be addressed immediately and clearly so that both parties can work to remedy issues in an expedient manner. Graduate students and advisors should recognize that social media can blur the line between professional and personal lives and should be used only if deemed appropriate by both parties.

**Graduate Program’s Responsibilities**

- Establish graduate advising best practices that pertain specifically to the local graduate program and its graduate degrees.
- Maintain a graduate program handbook, including the steps and processes for students to complete degree requirements and grievance procedures for graduate students and advisors.
- Create and maintain an easily accessible online list of information for graduate students that contains links to the Graduate School Handbook and other relevant university resources.
- Provide yearly written review of performance for graduate students and advisors.
- Maintain clear communication with students and advisors.
- Hold a yearly orientation to familiarize new students and faculty with the graduate program and the university.

**Graduate Student Responsibilities**

Conduct academic pursuits in an ethical manner and develop professionally.

- Uphold Ohio State’s Code of Student Conduct.
- Pursue opportunities that advance career as a graduate student and beyond.

Take ownership of academic progress
- Devote significant and productive time toward degree completion.
- Stay abreast of requirements for degree completion through active and regular discussions with advisor.
- Communicate career goals and concerns related to academic progress clearly.
- Initiate communication with the advisor.

Respect the responsibilities of the advisor
- Maintain open communication with advisor.
- Allow sufficient time for the advisor to provide feedback in advance of deadlines.
- Maintain professionalism by keeping up with graduate student responsibilities even when advisor is not present.

PROGRAM ADVISORS

Each student will be assigned a Program Advisor by the OSU-GCGP Graduate Studies Committee at the beginning of their first year of study. The program advisor is responsible for giving the student advice about general issues regarding progress towards their degree. Program advisors are also there to assist students in academic misconduct, grading disputes, or other programmatic issues.

MENTORING

Being a relatively small program, our student to faculty ratio will be low. This will allow each student a great deal of individualized teaching, advising, and guidance. Program leadership, faculty, course directors, and other instructional faculty are encouraged to maintain open door policies by which students who need additional assistance can obtain guidance. In addition, clinical supervisors are available at site-specific rotations to provide personalized attention to the student.

Beyond the formal academic advisement system described above, the OSU-GCGP also encourages student participation in the NSGC mentoring program. Additionally, we expect that students will develop informal mentors over the course of their training. These mentors may be clinical supervisors and/or program faculty members. The University also provides extensive seminars for graduate students on a range of areas, including courses on public speaking and scientific writing.

STUDENT LEARNING ENVIRONMENT

Each August the OSU Genetic Counseling Program and OSU affiliated clinical training sites welcome new trainees in various health professions. While the primary purpose of the medical center is to provide care for patients, this is also a learning environment for each of our trainees. It is the responsibility of each of us in this community to contribute to the development of a positive learning and work environment for all learners. Many studies have shown that hostile environments negatively affect students and trainees and are detrimental to learning and associated with higher rates of student depression, stress, anxiety and burn-out. Faculty should treat students and trainees as they wish students and trainees to treat their patients.
The OSU-GCGP is cognizant of the fact that many of our learners have very little experience in the clinical environment. Students may be a bit anxious about how they will fit in and what they will experience. Some of the things that the OSU-GCGP will do to improve the learning environment for our trainees include:

- Welcome each student and trainee to the work environment and introduce them to the various team members.
- Orient students to the work place (give a tour) and explain to them the various schedules and activities of the clinic or other work unit.
- Vow to improve the professional environment for faculty, staff and trainees and encourage colleagues to join in this effort. Students are always learning from what they observe – not just from formal lectures and rounds but also from informal interactions – both positive and negative. OSU-GCGP will strive to keep those lessons positive.
- Communicate to trainees that faculty and staff value trainee education and consider it to be a high priority in the medical center.
- Practice appreciative inquiry – don’t just criticize shortcomings – also point out and praise good practices and performances by our trainees.
- When possible, optimize flexibility and choice for health profession students to decrease the perception of lack of control (this helps to decrease stress).

GRADING

Maintaining Good Standing in the OSU-GCGP

Graduate students are expected to maintain “Good Standing” in the program. Good Standing consists of maintaining a minimum 3.0 grade point average, demonstrating good commitment to professional standards, and making steady progress toward degree completion.

Minimum Grade Point Average

The Graduate School requires graduate students to maintain a graduate cumulative point-hour ratio (CPHR) of 3.0 or better in all graduate credit courses. Any student receiving a B-, or lower, in any course or an unsatisfactory grade in the thesis or clinical coursework may be required to complete remedial work as assigned by the program. A student whose overall grade average is below B, or who has more than one incomplete grade or who fails to make progress towards the degree in accordance with the requirements adopted by the Graduate Faculty, is not meeting academic standards and will be placed on Academic Probation by the Graduate School.

All students receiving financial aid must maintain a B average (3.0/4.0).
**Probation**: A student whose graduate CPHR falls below 3.0 after nine graduate credit hours have been attempted is placed on probation by the Dean of the Graduate School.

**Didactic Courses**

A significant portion of graduate student work involves taking courses. Each course has a certain amount of credit hours associated with it. These credit hours are often referred to in this document and elsewhere are credits, where one credit hour equals one credit.

The Genetic Counseling Graduate Program courses are graded A through E. Grades are assigned point values as follows:

<table>
<thead>
<tr>
<th>Letter Grade</th>
<th>Numerical Grade</th>
<th>Grade Point Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>93-100</td>
<td>4.0 Pts</td>
</tr>
<tr>
<td>A-</td>
<td>90-92</td>
<td>3.7 Pts</td>
</tr>
<tr>
<td>B+</td>
<td>87-89</td>
<td>3.3 Pts</td>
</tr>
<tr>
<td>B</td>
<td>83-86</td>
<td>3.0 Pts</td>
</tr>
<tr>
<td>B-</td>
<td>80-82</td>
<td>2.7 Pts</td>
</tr>
<tr>
<td>C+</td>
<td>77-79</td>
<td>2.3 Pts</td>
</tr>
<tr>
<td>C</td>
<td>70-76</td>
<td>2.0 Pts</td>
</tr>
<tr>
<td>D</td>
<td>65-69</td>
<td>1.0 Pts</td>
</tr>
<tr>
<td>E</td>
<td>60-64</td>
<td>0.0 Pts</td>
</tr>
</tbody>
</table>

**Clinical Placement Grading**

The Genetic Counseling Graduate Program uses a pass/fail system for clinical placements. These grades consist of:

- S = Satisfactory
- U = Unsatisfactory
- I = Incomplete
- P = Progress (issued when grading is required for University purposes, progress is satisfactory, but the curricular component has not been completed.)
**Unsatisfactory**: An **Unsatisfactory** grade indicates academic (knowledge, skills and/or behavior) performance is not at an appropriate level upon completion of the rotation. Additional work is required to bring the performance level to appropriate standards. Required remediation is the decision of the Genetic Counseling Graduate Program Director in collaboration with the Clinical Supervisor/Clinical Placement site submitting the unsatisfactory evaluation. Examples of unsatisfactory performance are:

- Clinical skills do not meet expected level.
- Clinical application of knowledge base is inadequate.
- Interpersonal relations need improvement.
- Initiative and self-motivation need improvement.
- Performance standards impaired or not met due to professional, health, mental, psychosocial, and/or emotional problems.

College rules mandate that an unsatisfactory grade must be made up within 12 months from the conclusion of the rotation for which that grade has been assigned. If a Satisfactory grade has not been recorded in the allotted time, the student will not be permitted to pursue any other clinical rotations until the remediation is completed. The student will be required to meet with the Genetic Counseling Graduate Program Director, and the failure to remediate may be considered cause for dismissal. A leave of absence will not count into the 12-month timeframe.

**Incomplete**: An **Incomplete** grade indicates specific requirements of the rotation are not yet met. Examples of requirements not met are:

- Documentation (letters, papers) due.
- Evaluations not completed.
- Deficiencies in diagnosis and counseling experiences.
- Cases not signed off on.
- Significant clinical time missed.

Clinical placement sites are expected to notify a student of an incomplete grade within two weeks of the conclusion of the rotation. College rules mandate that ALL clinical placement requirements must be completed within six months of the end of the rotation, or the grade will be changed to Unsatisfactory. A leave of absence will not count into that time. The Clinical Supervisor/Placement site submitting the changed grade will determine in collaboration with the Genetic Counseling Graduate Program Director the remediation required.

Any grade that has been changed to Unsatisfactory must be properly resolved according to the policy described above under “Unsatisfactory” (i.e., within 12 months from the conclusion of the rotation, not 12 months from the assignment of the Unsatisfactory grade). No deviation from this policy will be allowed without prior written approval from the Genetic Counseling Graduate Program Director. Any such approval must be received before the 6-month period has expired.

It is the student’s responsibility to arrange make up of incomplete grades through the respective clinical placement sites in a timely manner. The clinical placement site is responsible for issuing an unsatisfactory grade as soon as an incomplete grade has been changed to an Unsatisfactory. The clinical placement site will also notify the students, but they should maintain a keen awareness of such deadlines. The clinical placement site substituting an unsatisfactory grade for
an incomplete grade is responsible for determining with the Genetic Counseling Graduate Program Director the requirements for remediation of the unsatisfactory grade. These requirements will be communicated to both the student and the Med 3-4 Office.

Assessments/Evaluations
A combination of standard examinations, papers, standardized patients, and class discussions will be used to determine grades. Course syllabi will outline the course expectations for students. In clinic, supervisors and students will be provided with a grading rubric and learning objectives at the beginning of each clinical rotation.

Course Grading Grievance Procedures

For complete OSU Grievance procedures, see Faculty Rule 3335-8-23.

If an OSU-GCGP graduate student has a complaint regarding a grade the student should take these steps.*

1. First, speak to the class instructor(s) and attempt to resolve the matter. The student is encouraged to bring their Academic Advisor or Program Mentor as their advocate and as a neutral third party to the meeting.

2. If the situation is not resolved to the student’s satisfaction, the student will present his/her case to the Chair of the Graduate Studies Committee (In the OSU-GCGP this is the Program Director). The student is encouraged to bring their Academic Advisor or Program Mentor as their advocate and as a neutral third party to the meeting. The Chair of the Graduate Studies Committee also has the authority to invite the Academic Advisor or Program Mentor to any meetings if the Chair believes it is in the best interest of the student.

3. If the situation is still not resolved, the student will submit a detailed written statement (along with any pertinent class material – e.g. syllabus) to the Academic and Behavioral Review Committee (via the Program Director’s assistant). The committee members will be given a copy of this submission and will consult with both the instructor and the student if necessary. They shall then determine the validity of the grade grievance due to grading procedures. The review committee shall make its findings known in writing to both the student and the instructor within thirty days of the date the student submits pertinent supporting documentation to the Director. If the committee finds that a procedural error has occurred and if the instructor declines to accept the findings of the review committee, the committee shall consider the reasons for not authorizing a grade change given by the instructor and may, upon consideration of these reasons, authorize in writing a grade change to be instituted by the School Director.

4. In cases of instructors no longer affiliated with the university, the findings of the committee shall be reported to both the student and the instructor. If the instructor chooses not to respond, the judgment of the committee shall prevail. If the instructor responds and declines to accept the findings of the committee that a procedural error has occurred, the committee shall consider the reasons for not authorizing a change
given by the instructor. In either case, the committee may, upon due consideration, authorize in writing a grade change (if such can be determined) to be instituted by the School Director.

* An important note about grade changes. Ohio State’s rules allow that grades can be changed only if there has been an error in grade processing or grading procedures. No opportunities or leniencies may be granted to one student that is not granted to all. Thus, a student’s grievance that rests on claims of personal hardship cannot be handled as a grade grievance. Action to change a grade must be initiated before the end of the second succeeding semester.

**Attendance Policy**

Genetic Counseling Students are expected to attend all scheduled academic activities. An unapproved absence from clinical activities or examinations may result in failure of the course or one of the course components. See Section 6 of Genetic Counseling Graduate Program Handbook for specific information on sick days, weather emergencies, religious observation policies, scheduled, and unscheduled absences.

**CLINICAL PLACEMENTS**

The goal of the clinical training component of the OSU-GCGP will be to provide students with a strong and balanced exposure to a range of clinical genetic counseling areas, both traditional (e.g. prenatal and general pediatric and adult genetic counseling) and new and evolving specialty roles (e.g. management of individuals with metabolic disease, expanded newborn screening, clinical research coordinators, laboratory liaisons, adult predictive testing). To achieve this, during the clinical practicum, students will rotate through clinical settings in which patients with disorders having genetic implications are diagnosed, treated and/or discussed so they appreciate the medical needs and implications a genetic disorder can have on an individual or family. Students will be required to participate as the primary genetic counselor under the supervision of ABGC- or American Board of Medical Genetics (ABMG)-certified genetic counselor or an ABMG certified-medical geneticist in order to compile a portfolio with a minimum of 50 cases representing a broad spectrum of genetic counseling situations. Students will also rotate through clinical genetic service laboratories.

A list of rotation sites is provided on the OSU-GCGP website (http://medicine.osu.edu/residents/masters_programs/genetic_counseling/pages/index.aspx).

The Genetic Counseling Graduate Program Director is responsible for the assignment of clinical training sites which is based upon a variety of factors:

**Determination of Clinical Placement Sites**

The student’s clinical placement assignments will be determined by the Genetic Counseling Graduate Program Director. Each student will be assigned a variety of placements to ensure comprehensive training in clinical genetics. All students will also observe clinical laboratory operations during their first semesters. The Program Director may alter a student’s planned assignment if necessary based on the student’s performance in didactic courses and other activities such as seminars and case conferences, as
well as evaluations by the supervisors at previous clinical rotations. Students who receive satisfactory yet concerning evaluations from their clinical rotation supervisor(s) are required to complete an additional brief clinical rotation at an OSU-based clinic for closer observation (e.g. Division of Human Genetics Medical Genetics or Cancer Genetics clinic). If a student does not satisfy requirements for passing a rotation, he/she is required to enroll for the additional summer semester and complete a fourth 12 week rotation which is coordinated by the Genetic Counseling Graduate Program Director. This student is not eligible for graduation until all program requirements are fulfilled.

**Student Preference:** A student may request a specific site, particularly a specialty rotation, with the understanding that the availability of sites may be limited or that the Genetic Counseling Graduate Program Director may decide another training site better suits the student’s needs. Students may also arrange, with approval, to attend an ad hoc clinical rotation outside of the Columbus area during the summer semester or winter break of the second year. The Genetic Counseling Graduate Program Director has the right to refuse to approve an outside clinical rotation if they feel that it will not be in the best interest of the student’s training.

**Logistics:** Greater than ninety percent of clinical rotation sites are within one hour driving distance. All sites are within 1½ hours driving distance from Columbus. Where the student lives, and their access to a car, will be taken into consideration in determining site placements.

**Computer Accessed Patient Information Training**

- **Ohio State University:** The OSU Medical Center uses an electronic medical record (IHIS). Training on the use of the electronic medical record is mandatory for all genetic counseling students prior to the start of clinical rotations. Scheduling for these sessions is coordinated in the Genetic Counseling Graduate Program during the Program Orientation. All genetic counseling students must also meet Human Resources requirements for the Medical Center. Students are required to complete be up to date on immunization requirements, complete all required CBLs, complete a background check, get a new ID, and do toxicology screen before beginning clinical rotations.

- **Off-site clinical placements:** Each individual clinical rotation will have additional requirements that will need to be met in order to complete the clinical rotation. These requirements will be arranged by the Genetic Counseling Graduate Program Director and the placement clinical supervisors as necessary.

**Clinical Supervision of Genetic Counseling Students**

The faculty has responsibility for the supervision of genetic counseling students. In their role as faculty they must provide a combination of *Direct Supervision of Students* (i.e. the faculty is personally present at key times during the educational process of the genetic counseling student); and *Indirect Supervision of Students* where the faculty member is aware of the educational components that the student is participating in. These roles are done in conjunction with and facilitated by the OSU-GCGP Program Director and Graduate Studies Committee members. In addition faculty is expected to serve as a role model for the student to learn the art and science of Genetic Counseling. Faculty are expected to review and advise on patient care notes and plans and enable students to be an active partner in delivery of care, interacting with patients at each patient encounter. It is the responsibility of the faculty to assign

[Type text] [Type text] Updated 12/21/2016
patients and level of care to a genetic counseling student based on the faculty assessment of the expertise and level of training of the student.

**Clinical Supervisor Evaluation of and Feedback to Students**

An essential role of faculty members in health professional education is to provide evaluation and feedback to learners. Feedback is information about how a trainee’s observed performance compares with an accepted performance standard that is given with the intent of assisting the trainee to improve performance. Effective feedback should be frequent, specific and timely and given in a climate of respect and mutual trust. **Faculty should strive to provide direct observation of genetic counseling student activities in order to give optimal feedback and evaluation.**

Clinical supervisors will be encouraged to review cases with the students immediately after each session and to sign off on their case logs (Appendix F). Clinical supervisors are also encouraged to meet approximately weekly with each student, in addition to formally meeting at the middle and at the end of the placement. This allows for continuous feedback and, progression of the student skills, and lessens the possibility of the student not being aware of a deficiency until the end of the placement. While this may not be feasible in all clinics at all times given busy schedules, at a minimum it serves as a desired goal.

The clinical supervisors are required to review the mid-rotation and final evaluation with the student in person (See Appendix G). The OSU-GCGP has developed a student evaluation form based upon instruments that are used by currently established genetic counseling training programs. Evaluations may be submitted to the programs via email with electronic signatures, fax or mail. Students will receive copies of all written evaluations that are submitted regarding their clinical training which will be uploaded into their electronic portfolios.

It is an important responsibility of each faculty member to complete course evaluations in an accurate, complete and timely fashion. Students and trainees deserve the feedback provided by evaluations. The Genetic Counseling Program requires that grades be completed in a timely fashion and delayed evaluations can hinder this process. Any questions about evaluations should be addressed to the Program Director(s).

Composite summaries of each student’s performance are entered by the Genetic Counseling Graduate Program Director in the CARMEN system. These summaries are part of the official student record in the Genetic Counseling Graduate Program office. Evaluations from individual clinical supervisors are kept on file in the respective departments, as well as in the Genetic Counseling Graduate Program. Any questions regarding departmental grades should be directed to the Program Director.

**Past or present health care provider relationship with students and evaluation policy**

Faculty and other health care professionals who provide sensitive health, psychiatric or psychological care to genetic counseling students **must not evaluate** student academic performance or participate in decisions regarding student advancement and/or graduation. Faculty are required to attest that they have not provided such care to students when they fill out evaluations or participate in course grading.
or committee academic review or promotion decisions or to recuse themselves from these academic roles if they have provided such care at any time in the past.

**Evaluation of the Clinical Training Site and Supervisor**

OSU-GCGP graduate students will complete an evaluation form for each placement regarding their experience and supervision. This evaluation instrument, developed based upon published clinical supervisor competencies and similar instruments used in medical education. Our goal is to provide feedback to supervisors on a yearly or bi-yearly basis. This ensures that supervisors receive feedback in a semi-regular manner, but also protects confidentiality of students allowing them to provide honest evaluations. It will also assist in the development of annual clinical supervisor training.

**Attendance Policy**

Genetic Counseling Students are expected to attend all scheduled academic activities. An unapproved absence from clinical activities or examinations may result in failure of the course or one of the course components. See Section 6 of Genetic Counseling Graduate Program Handbook for specific information on sick days, weather emergencies, religious observation policies, scheduled, and unscheduled absences.

**Liability Coverage**

Students in the Genetic Counseling Graduate Program are covered by the University Hospitals self-insurance program in amounts of at least $1 million per occurrence and $3 million annual aggregate for acts or omissions performed in the scope of their assigned academic course work at OSU Hospitals and Clinics and all OSU owned or operated facilities. Acts or omissions that are intentional or are so careless to be wanton or reckless are not covered.

Genetic Counseling students are covered while participating in any required or elective course work at OSU hospitals, affiliates, or institutions within the state of Ohio approved by the Dean for The College of Medicine. They are covered for electives approved by the Vice Dean for Medical Education and outside the state of Ohio through a separate malpractice policy. Proof of coverage is obtained through the office of the Vice Deans. Students are not covered for electives outside of the United States. Check with the Office of Global Health Education at 247-8968 for more information.

In no case will Ohio State provide coverage for nonacademic activities. This includes non-approved volunteer services to non-OSU owned or sponsored groups. No coverage is provided where medical students are performing work for hire, that is, receiving compensation as salary or other benefits.

**CLINICAL SKILLS EDUCATION & ASSESSMENT CENTER**

http://medicine.osu.edu/orgs/clinicalskills/Pages/index.aspx

The College of Medicine’s Clinical Skills Education and Assessment Center (CSEAC) is an innovative training facility that uses state-of-the-art technology, low- to high-fidelity simulators, as well as highly trained “standardized patients” to mimic actual patient care experiences. The CSEAC plays an essential role in the implementation of innovative curricula for genetic counseling students, medical students,
residents, and other healthcare providers. A major objective has been to ensure that all our graduates have been exposed to an extensive range of skills and procedures, from basic to complex.

The CSEAC simulates actual patient care, both ambulatory and in-patient, and gives medical trainees hands-on clinical skills experience in a safe, controlled environment. With the health care setting’s limited hospital stays, diversity of physician faculty, and multiple training sites, the CSEAC provides a means of assuring consistency in education. Genetic counseling students hone their interpersonal skills by conducting histories and physical exams on standardized patients (— individuals trained to simulate specific case scenarios) and enhance their technical skills by practicing on task trainers and human patient stimulators.

Genetic counseling students are encouraged to initiate individual or group procedure practices to gain exposure to a variety of procedures as well as explore different specialties.

To contact the Clinical Skills Center, please call (614) 688-7988.

**ACADEMIC ASSISTANCE PROGRAMS**

The Genetic Counseling Graduate Program provides academic assistance to students experiencing difficulties. The type of assistance varies depending on the content, student needs, and resources available. For tutoring assistance that is subject related, students should contact the Genetic Counseling Graduate Program Director(s) at 614-293-4347 to obtain assistance. Once contacted, the student will be assigned to a specific faculty member on the Tutor Team for help.

For a study skills assessment which can include skills coaching, time management and tips for note-taking and test-taking, we also encourage students to contact

The Younkin Success Center  
1640 Neil Avenue  
Phone: 614-688-4011

If a student has been identified or self-identified for a learning issue and wants to proceed with diagnostic psychometric testing, their own physician can make a referral to their choice of provider or the lab of:

Robert Bornstein, PhD  
Ph # (614) 293-4774 (Lab)  
FAX# (614)293 – 6058 (Lab)  
130N Harding Hospital, 1670 Upham Dr.

If a student has a learning disability or another disability, it is recommended that he/she set up a meeting with a counselor at:

The OSU Office of Disability Services  
150 Pomerene Hall  
1760 Neil Ave.  
614-292-3307  
Hours: 7:30 am – 8:30 P (M – Th), 7:30 – 5:00 (Friday)
SECTION 9: PROFESSIONALISM STANDARDS

OSU GRADUATE SCHOOL PROFESSIONAL STANDARDS

Examinations, papers, conducting and reporting research, all integral parts of the academic enterprise, require honesty and fair attribution of ideas. The OSU-GCGP takes the issue to be one of utmost importance. The Ohio State University requires faculty members who suspect Academic Misconduct to take such suspicions to the Committee on Academic Misconduct.

The Graduate Student Code of Research and Scholarly Conduct (Appendix C in the Graduate School Handbook) describes the Graduate School's general expectations for ethics and conduct in graduate research and scholarship. University processes exist to address allegations of research misconduct by graduate students. To this end, a student who is found guilty of academic misconduct will be classified as being in poor standing and not making satisfactory progress toward the degree. A student found guilty of plagiarism or cheating will lose employment as a graduate associate and be dismissed from the program. Ignorance of the guidelines does not excuse misconduct.

In addition to those behaviors described in Appendix C as indicating academic misconduct, the Graduate Studies Committee takes all components of the academic enterprise very seriously. The academic enterprise includes such factors as collegiality and altruism. The Graduate Studies Committee may consider students who disrupt classes or graduate activities, or otherwise exhibit nonprofessional activity as not exhibiting a commitment to professional standards.

Graduate students are required to observe professional ethical standards in their graduate studies and research. As such, all students in the OSU-GCGP are expected to familiarize themselves with the university guidelines on academic misconduct (Appendix C in the Graduate Student Handbook). Graduate students have the responsibility to be aware of and to follow these standards. OSU-GCGP students should talk with the Program Director(s), members of the Graduate Studies Committee, or their faculty advisor(s) if they have questions about the specific expectations of the Genetic Counseling Graduate Program.

Research and Scholarly Misconduct

As a recipient of federal funding, the Ohio State University is obligated to have an administrative process for reviewing, investigating, and reporting allegations of research misconduct. The University Policy and Procedures Concerning Research Misconduct is available on the Office of Research website.

When a Committee of Inquiry, as defined in the University Policy and Procedures Concerning Research Misconduct, forwards allegations of research misconduct by a graduate student to the Graduate School, the Graduate School follows the “Graduate School Policy on the Investigation of Allegations of Research Misconduct by a Graduate Student” (Appendix C in the Graduate School Handbook).

Academic Misconduct
The university’s Committee on Academic Misconduct is responsible for reviewing charges of academic misconduct against students, including graduate students. The Code of Student Conduct defines the expectations of students in the area of academic honesty. A copy of the code is available on the website of the University’s Office of Student Life.

**MEDICAL PROFESSIONAL STANDARDS**

The public expects that those in the medical profession will adhere to a set of values that reflect their commitment to excellence, responsibility, respect for all, integrity, prudence and trustworthiness. The Genetic Counseling Graduate Program considers any student enrolled in the Program for the purpose of seeking the MS degree to be an active member of the profession at all times. Commitment to integrity in espousing the values of the profession means that members of the profession (including genetic counseling students) behave in ways that will reflect positively on the profession even when they are not in class or on the grounds of the university or medical center. Students who behave in a manner counter to the values of the medical profession may be subject to adverse actions from the College of Medicine, up to and including dismissal.

Unprofessional behavior includes but is not limited to:

1. Breaches in patient confidentiality.
2. Public intoxication or substance abuse, including use of alcohol or drugs especially while attending classes and clinical placements.
3. Distribution of material that includes disparaging comments about populations of people.
4. Lack of self-control in encounters with patients, faculty, staff, and other health professionals.
5. Criminal activity.
6. Interpersonal violence.
7. Distribution of defamatory or vulgar comments about faculty of The Ohio State University, employees of the Wexner Medical Center at The Ohio State University Medical Center or any of the following entities: The Ohio State University, the Wexner Medical Center at The Ohio State University or The Ohio State University College of Medicine.
8. Invasion of another’s privacy by any means.
9. Misrepresentation of credentials, abilities, or position.

**GRADUATE STUDENT CODE OF RESEARCH AND SCHOLARLY MISCONDUCT**

*Approved by the Council on Research and Graduate Studies, May 2004*

Graduate students and Graduate Faculty aspire to professional behavior that is consistent with the highest ethical and moral standards. The Graduate School at The Ohio State University expects that graduate students will demonstrate responsibility and integrity in pursuing their creative and scholarly interests. The academic enterprise is dependent upon such behavior. Graduate students are responsible for learning about appropriate standards for ethical research and scholarly conduct and for following all university policies related to ethical research and scholarly conduct.

When graduate students join the Ohio State community, they become members of disciplinary, scholarly, and professional communities that extend beyond the university. Graduate students are expected to learn, respect, and abide by the professional codes of ethics and responsibilities that are commonly accepted in their field of study or area of research. These codes include but are not limited to
the following: a responsibility to contribute an original body of work to one’s chosen discipline and the recognition that one’s work is based on the work of others which must be respected and properly acknowledged. Graduate students also have the responsibility to treat university faculty, staff, and other students respectfully and professionally.

Graduate Faculty, advisors, and graduate programs should actively encourage their students to participate as members of their chosen disciplinary, scholarly, and professional communities. Graduate students should be encouraged to seek and share knowledge wherever and whenever possible. Academic and Program advisors, and other faculty members, should educate graduate students through example and discussion, addressing such issues as academic honesty, research, publication, recruitment, and hiring practices, and applicable fellowship and graduate associateship responsibilities. Disciplinary codes of ethics and norms should be discussed among graduate students and faculty. Such communication is a means of setting high standards of behavior in graduate study and beyond.

ACADEMIC HONOR CODE

Students must demonstrate academic honesty and refrain from dishonorable actions that include, but are not limited to:

- **Cheating:** Allowing another party to do one’s work/exam; serving as a substitute for a student in the taking of an exam; possession and/or use of unauthorized study aids/notes during an exam; practicing fraud or deceit; knowingly providing or receiving information during examinations with or without the source’s knowledge; and/or sharing information about the content of an exam with a student who has not yet taken the exam.

- **Plagiarism:** Representing another’s work as one’s own including the unacknowledged word-for-word use and/or paraphrasing of another person’s work, and/or the inappropriate unacknowledged use of another person's ideas.

- **Fabrication:** Altering a graded work; falsification of information and resources including laboratory and research results

- **Aid of academic dishonesty:** Intentional facilitation of the above dishonorable actions or any other action deemed in violation of this code.

Students who fail to adhere to these academic standards will be referred to the Academic & Behavioral Review Committee for determination of adverse actions up to and including dismissal from the College of Medicine.

PROFESSIONALISM & SOCIAL NETWORKING

**Policy on Social Networking: The Ohio State University College of Medicine**

Social networking is a common activity that has the potential to increase our ability to interact with each other in positive ways. However, the ability of the internet to instantly reach millions of people, both within and outside of the medical profession makes it imperative that we take safeguards to insure that
social networking does not erode the values of the medical profession or damage the reputation of the profession or the medical center.

Definitions:

Social Networking: The use of various internet sites to connect people via web based technology. This includes but is not limited to FaceBook, MySpace, Flicker, web blogs, chat rooms.

Publically Disseminate: to distribute to a wide audience, either through posting to a non-secure website, sending content in an email, posting flyers.

Values of the Medical Profession: altruism, respect, confidentiality, prudence, tolerance, integrity and a commitment to personal excellence.

The Genetic Counseling Graduate Program adheres to the policy of the OSUCOM regarding student and faculty use of social networking sites. This policy is delineated below.

Students and Faculty of the College of Medicine:

- Should take steps to insure that their social networking sites have the appropriate privacy settings to avoid inadvertent dissemination of material to audiences beyond their control.
- Should include a disclaimer with postings that clearly states that the expressed opinions belong to the writer alone and do not necessarily reflect the views of the College of Medicine.
- May not write about patients in a manner that could in any way convey the patient’s identity, even accidentally. They are cautioned that patients with rare diagnoses, physical appearances, and specific locations within the medical center may be easily identifiable even in the absence of names and medical record numbers.
- May not write defamatory comments about faculty, staff, students, and health professionals within the medical center.
- May not post someone else’s work (including from internet sites) without attribution.
- May not post pictures or descriptions that demonstrate participation of students, faculty, or staff engaging in unprofessional behavior
- Faculty within the College of Medicine are strongly discouraged from inviting people who are actively enrolled in the College of Medicine or in the Wexner Medical Center education programs to participate in any social networking community that involves their personal lives. Social networking communities limited to professional work are acceptable.

Consequences

Students who fail to adhere to the standards of professionalism regarding social networking will be referred to the Academic & Behavioral Review Committee. The same sanctions for social networking
transgressions exist as for other professionalism breaches up to and including dismissal from the College of Medicine.

APPEARANCE REQUIREMENTS & GUIDELINES

General Expectations of Appearance

The Department of Internal Medicine and Division of Human Genetics is committed to presenting a professional, neat and clean image for our patients, their families, and visitors. The following policy was developed to delineate guidelines regarding professional attire for any preclinical or clinical patient encounter, whether with actual patients or simulated patients. Additional guidelines of affiliated hospitals or preceptors shall be observed. Students are expected to inquire prior to wearing any questionable items. These guidelines for professional attire should also be followed anytime a student represents the Genetic Counseling Graduate Program outside of the campus while giving presentations, performing service work, etc.

Identification: Always display IDs in a visible location above the waist.

Clothing: All employees are expected to exercise good judgment in their dress and grooming habits. Clothing should be clean, non-revealing (not excessively tight or loose fitting clothes) and in good repair. Following are

Shirts:
- Shirts should be wrinkle-free, clean, and in good repair.
- Tight-fitting or revealing shirts are not permitted.
- Tank tops, halter tops, tops exposing midriff, and spaghetti-strap or shoulder-less dresses or tops are inappropriate.
- Proper undergarments should be worn at all times

Skirts:
- Tight-fitting and revealing skirts are not permitted.
- Skirt length shall be no shorter than three inches above the top of the knee.
- Split skirts and dress shorts are permitted, provided that they fall within skirt guidelines.

Pants:
- Tight-fitting or excessively baggy pants are not permitted.
- Pants should be wrinkle-free, clean, and in good repair.
- Denim pants of any color, spandex, leggings, athletic wear, and sweat suits shall not be worn.

Socks and Hosiery: Socks and hosiery should be worn at all times in the hospital or clinic.

Shoes:
- Shoes should be clean and in good condition.
• Per OSHA regulations, for safety and protection purposes, open toed shoes/sandals are prohibited in any patient care area.
• Casual sandals and canvas sneakers shall not be worn.
• Heels should not be taller than three inches.
• Open toed dress shoes may be worn in non-patient areas (no flip flops, beach sandals or slippers)

Accessories:
• Rings, bracelets, and necklaces are permissible if they are not hazardous to equipment operation or patient contact.
• No more than two earrings per ear are recommended.
• Body piercing is permitted in ears only; no other visible body piercing is permitted.
• Hats are not to be worn inside unless they are required parts of a uniform.
• While representing the College of Medicine, students should not display accessories such as pins, buttons, bracelets, etc. that could potentially make patients feel ill at ease such as those advocating a political party or commenting on a sensitive controversial issue.

Tattoos: Visible tattoos are not permitted. Tattoos should be hidden by clothing or obscuring make-up.

Nails:
• Artificial nails are not permitted.
• Nails should be clean and manicured and kept less than ¼ inch long past the tip of the finger.
• If worn, nail polish should be of a single color and not chipped, cracked, or peeling.
• No nail jewelry or nail art is allowed.

Hygiene:
• Daily healthy hygiene includes clean skin, hair, and teeth; regular use of deodorant/antiperspirants; and regular dental hygiene.
• Makeup should not be distracting and cologne/perfume should not be worn in the clinical environment.

Enforcement

Department managers, attending physicians, and genetic counselor faculty may prohibit any student from working if he/she is wearing clothing that is offensive, unsafe, or not in compliance with the hospital/clinic and department standards. Failure of any student to adhere to the standards will result in corrective action by his/her supervisor. If the issue cannot be resolved at that level, the student will be referred to the Academic & Behavioral Review Committee. Repeated infractions will also result in referral to the Academic & Behavioral Review Committee.

Note: Exceptions to these requirements for religious preference require prior approval of the supervising Director(s)/Dean’s Staff.
SECTION 10: DISCLOSURE, BACKGROUND CHECKS & TOXICOLOGY TESTING

RATIONALE

Many hospitals, child care facilities, and nursing homes now require criminal background checks and toxicology screening of individuals working in their settings due to state legislation and accreditation requirements. These institutions also require healthcare professional students, such as genetic counseling students, to undergo a toxicology screening and criminal background check before participating in any educational activities at their sites.

The Ohio State University Genetic Counseling Graduate Program is committed to providing high-quality education in the foundational and clinical sciences. An integral part of this commitment requires that students function in a professional manner. Professional behavior dictates that an individual will not function when their judgment is altered by the use of legal and/or illegal substances. A drug-free and safe environment is an expectation for the delivery of both educational experiences and patient care. For Students with impairment due to active substance abuse or a record of activity unsuitable for patient contact should not be placed in a patient care environment for the protection of our patients.

The American Board of Genetic Counseling Certification Examination and state genetic counselor licensing board applications require self-disclosure of arrests, convictions, and/or court appearances; psychiatric diagnosis, treatment, or hospitalization; medical conditions including drug addiction and alcoholism; use of any chemical substance, including prescribed medications, which may impair the ability to practice; and illegal use of controlled substances.

Any criminal conviction or guilty plea which is related to substance use may be deemed by the state licensing board or the American Board of Genetic Counseling as an indication of substance abuse. These types of convictions are likely to appear on a criminal background check. Evidence of substance abuse often times will prevent an applicant from getting a license to practice, even a temporary one, unless it is also accompanied by evidence of rehabilitation and ongoing sobriety through monitoring in a formal aftercare program.

Based on the requirements of affiliated health care institutions and The Ohio State University Genetic Counseling Graduate Program’s desire to facilitate the ability of our graduates to ultimately become licensed providers, a system of self-disclosure, criminal background checks and toxicology screening is in effect.

SELF-DISCLOSURE FORMS AND CRIMINAL BACKGROUND CHECKS

During orientation all students will be fingerprinted and undergo a criminal background check. They will also complete a self-disclosure form annually. Students are required to disclose reportable events within 1-5 days of their occurrence and must not wait until the annual disclosure to do this.
The Genetic Counseling Graduate Program shall maintain the criminal records check and self-disclosure reports in a manner that ensures the confidentiality of the results, prevents disclosure pursuant to a public records request, and complies with applicable state and federal requirements.

**Consequences**

One of the intents of the self-disclosure is to provide assistance to students or applicants who may have a criminal record due to substance use or abuse and who will need appropriate documentation to become licensed. An affirmative response to a self-disclosure item or the existence of a criminal record will not constitute an automatic bar to admission or patient care placement. Students and applicants with a positive background check or self-disclosure will be forwarded to the Academic and Behavioral Committee. The student will be required to provide documentation with court records, physician letters, treatment facility records, and other pertinent records so that an individualized assessment can be performed and recommendations made. The student will be barred from any patient contact until the committee has made a recommendation. In line with policies of the State Medical Board of Ohio, the Academic and Behavioral Committee will consider the following when considering the aspects of criminal activity:

- The nature and seriousness of the crime.
- The extent of the student’s past criminal activity.
- The age of the student when the crime was committed.
- The amount of time that has elapsed since the student’s last criminal activity.
- The student conduct and scholastic performance before and after the criminal activity.
- Whether the student has completed the terms of any probation or deferred adjudication.
- Evidence of the student’s rehabilitation.
- Whether the student fully disclosed the arrest or conviction to the College of Medicine.
- Any other factors the College of Medicine considers relevant.

Refusal to comply with the recommendations of the Academic and Behavioral Committee may result in dismissal from the College. Relapse while in substance abuse/use treatment or aftercare may result in dismissal from the College.

Refusal to complete the self-disclosure or to sign consent to conduct a background check will prevent the student from participating in any patient care activities. Inability to participate in patient care activities does not permit the successful completion of the curriculum at any stage. As such, students will not be eligible for admission, for continuation in the curriculum, or for graduation. These students will be reviewed by the violations committee and will be sent to the College of Medicine Vice Dean for Education for dismissal.

Another intent of this policy is to assist those institutions who provide an educational venue for our students. Some arrests or criminal offenses make it impossible for a student or applicant to participate in patient care activities. These activities/arrests include, but are not limited to, sexual offenses, homicide or murder, abuse of at-risk populations (children, elderly, prisoners, and patients), possession of child pornography, and possession of illegal substances with intent to sell. Inability to participate in patient care activities does not permit the successful completion of the curriculum at any stage. As such, students will not be eligible for admission, continuation in the curriculum, or graduation.
Students and applicants will be asked to self-disclose any arrests or criminal convictions, followed by a criminal background that includes fingerprinting. If the student does not disclose an item subsequently found on a background check, the student will be reviewed by the Academic and Behavioral Committee and will likely be sent to the Vice Dean for Education for dismissal. The cost of the background checks will be borne by the Genetic Counseling Graduate Program.

**TOXICOLOGY TESTING**

**Scheduled Toxicology Testing**

1. A toxicology screen is required for all students as they enter into the Genetic Counseling Graduate Program.

2. Students must undergo the required toxicology screening through urine toxicology testing prior to being allowed to interact in the clinical setting.

3. General Issues:
   a. All testing will be done at the OSU Student Health Center (SHC) according to the SHC testing protocols.
   b. Costs for scheduled drug testing are the responsibility of the genetic counseling student.
   c. When performing scheduled screening of genetic counseling students, the substances listed below will be tested through urine toxicology screening:
      i. Benzodiazepine
      ii. Barbiturates
      iii. Cocaine
      iv. Marijuana
      v. Methamphetamine
      vi. Opiates/Morphine
      vii. Methadone
      viii. Tricyclic Antidepressants
      ix. Oxycodone
      x. Ecstasy
      xi. Phencyclidine
      xii. Amphetamine
   d. Prior to any screening, the individual being tested will be asked by the SHC to declare any medications or other substances that they are actively using. The record of any prescribed medications being used by an individual being tested will remain confidential.
   e. If an initial positive result is obtained for any of the substances noted above, a confirmatory test will be conducted.

**“For Cause” drug and alcohol toxicology testing for genetic counseling students**

1. The Genetic Counseling Graduate Program Director(s) or his/her designee may act to order testing “for cause” when concerns are raised regarding the performance, behavior or actions of a genetic counseling student that indicate a reasonable suspicion for impairment with drugs and/or alcohol.
2. “For cause” drug and/or alcohol testing may be ordered when concerns are raised and/or recommendation for drug and/or alcohol testing is made to the Director(s) or his/her designee by any of the following individuals and/or committees: Academic & Behavioral Review Committee, any faculty member or attending physician, any COM staff member, any fellow genetic counseling student, hospital administrator, other healthcare professional, patient, and/or family member.

3. There will be no opportunity to appeal the order to be tested “for cause.”

4. General Issues
   a. Once testing is ordered, it should be completed immediately and must be completed within two hours. Failure to complete testing in a timely manner may result in summary suspension or other disciplinary action.
   
   b. Testing “for cause” will be done under the direct supervision of SHC staff during normal working hours or through the Emergency Department (OSU Main or OSU East) at times when SHC staff is not available.
   
   c. Prior to “for cause” testing, the individual being tested will be asked by the SHC to declare any medications or other substances that they are actively using. The record of any prescribed medications being used by an individual being tested will remain confidential.
   
   d. When testing “for cause”, the following substances will be tested through urine toxicology, blood toxicology, or “breathalyzer” testing as appropriate for the substance/s of concern:
      i. THC
      ii. Cocaine and metabolites
      iii. Amphetamine/methamphetamine
      iv. Benzodiazepine
      v. Opiates/Morphine
      vi. Methadone
      vii. Barbiturates
      viii. PCP
      ix. Alcohol
      x. Any other related substance suspected to be used by the individual
   
   e. If an initial positive result is obtained for any of the substances noted above, a confirmatory test will be conducted.
   
   f. Costs of “for cause” testing will be handled through the Genetic Counseling Graduate Program Office.
   
   g. The student may request to have independent testing done at a different lab. SHC staff will send a portion of the original sample to the independent lab in order to preserve the chain of custody. If independent testing is requested by the individual being tested, the individual will be responsible for any and all costs of the independent testing.
Test Results

1. Results of toxicology testing for genetic counseling students under this policy will not be posted on the clinical information system and will be handled within the Genetic Counseling Graduate Program administrative structure.

2. Results of all toxicology testing (both screening and “for cause”) will be forwarded to the office of the Genetic Counseling Graduate Program.

3. Final results will be stored in a confidential manner in the individual’s student file.

The Genetic Counseling Graduate Program shall maintain the toxicology reports in a manner that ensures the confidentiality of the results, prevents disclosure pursuant to a public records request, and complies with applicable state and federal requirements.

Consequences

A student with a positive Toxicology Screen:

1. Will be placed on immediate Leave of Absence (LOA) and all educational and clinical activities will be discontinued.

2. The student’s information will be sent to the Academic & Behavioral Review Committee for action. The Academic & Behavioral Review Committee does not have to meet with individual students. If the Academic & Behavioral Review Committee chooses not to meet with the student, a letter outlining any additional information which the student would like the committee to consider may be submitted. Refusal to comply with the recommendations of the Academic & Behavioral Review Committee may result in dismissal from the College.

3. If this evaluation reveals no evidence of a substance use issue, the Academic & Behavioral Review Committee will determine the appropriate course of action.

4. If the evaluation reveals a substance use issue, the student will be required at his/her expense to:
   - Make an appointment with the Counseling and Consultation Services (CCS) at The Ohio State University Younkin Success Center.
   - Attend three one-hour assessment sessions.
   - Sign a release notifying the Vice Dean for Education of the disposition of the visits.
   - Re-test, at the student’s expense, prior to returning to a clinical placement.

5. If the student tests positive a second time:
   - The student will be dismissed from the program and will need to petition to re-enter the program.
   - Upon petition to re-enter the program, the student will provide the Vice Dean for Education with documentation for a certified drug and alcohol counselor indicating readiness to return to the program and prognosis for full recovery.

6. Upon returning to the program:
   - The student may be required to appear before the appropriate Academic and Behavioral Committee in order to determine an appropriate academic plan. This plan may require a student to repeat/remediate curriculum.
   - Random drug testing will occur periodically until the student graduates from the program. The Vice Dean for Education will notify students of the required random
drug screening which will be completed within five days of notification, at the student’s expense.
  o If a positive drug screen occurs, the student will be placed on LOA and will need to petition to re-enter as indicated above.

ACADEMIC & BEHAVIORAL REVIEW COMMITTEE

The Academic & Behavioral Review Committee is responsible for the oversight of self-disclosure forms, background checks and toxicology screens. The Academic & Behavioral Review Committee will make recommendations to the College of Medicine’s Vice Dean for Education in regards to positive findings on student background checks and toxicology screening. The composition of the Academic & Behavioral Review Committee is outlined in Section 11.
SECTION 11: ACADEMIC REVIEW PROCESS

PRE-REVIEW ASSESSMENT

The policy as outlined below describes the necessary steps when reviewing students for concerns about knowledge, skills and behavior. There are pre-review assessment steps that must occur prior to making a decision as to whether or not a formal review is necessary or appropriate. The pre-review assessment is a data-gathering, fact-finding step to assure that there is sufficient information to send the concern on for formal review.

If a knowledge, skill or behavior concern is brought to the attention of anyone in the Medical Center and if the concern cannot be resolved with the individual or individuals involved, then the concern should be discussed with the Genetic Counseling Graduate Program Executive Leadership, a member of the Academic & Behavioral Review Committee, a member of the Curriculum Development and Assessment Committee or member of the Dean’s staff for guidance to assure that the pre-review assessment has occurred and sufficient information has been collected to warrant referral for formal review and to determine to which review body it should be referred.

Pre-review assessment should include talking with all parties involved and review of pertinent materials. If, through this assessment process, it is determined that there has been a failure to meet the standards, a formal Level I or Level I/II referral is required.

Academic reviews are typically triggered by course or clinical placement performance data that do not meet stated requirements. With course or clinical placement failures resulting from failure to meet academic standards, the pre-review involves the review of pertinent data but may not require a meeting with the student. Prior to referral, the student would have received performance data, feedback, and stated standards.

FORMAL REVIEW LEVEL ASSESSMENT

Below are the formal levels of review, with the higher levels used in cases of recommendations for repetition of a major portion of the curriculum or dismissal for knowledge, skills and/or behavior issues.

**Level I: Course Director/Clinical Supervisor Review**

Each Course Director and Clinical Supervisor is charged with initial and ongoing review of students in that course or clinical placement. When a student fails to meet an academic, noncognitive, or professionalism standard, the student is subject to review. The process designed to be timely and fair, is a review by faculty, not a legal proceeding. Unless there is a recommendation for repetition of a significant portion of the curriculum or dismissal, the review process may end here. However, depending on the severity of the difficulties, the review may proceed to other levels.

**Level II: Academic & Behavioral Review Committee**

The Genetic Counseling Graduate Program’s Academic & Behavioral Review Committee reviews all recommendations for repetition of a significant portion of the curriculum or dismissal. Recommendation
for repetition or dismissal may come from a Clinical Supervisor, Course Director or the Dean’s staff. Recommendations may be for failure to meet knowledge, skills and behavior standards. If the student is recommended for dismissal, the review process is forwarded to College of Medicine’s Vice Dean for Education.

The Academic & Behavioral Review Committee also provides consultation on course grade grievances if the grievance is not resolved at the course director and program director level. The committee members will consult with the course instructor, Program Director, Program Mentor, Academic Advisor and the student if necessary. They shall then determine the validity of the grade grievance due to grading procedures. The review committee shall make its findings known in writing to both the student and the instructor within thirty days of the date the student submits pertinent supporting documentation to the Director. If the committee finds that a procedural error has occurred and if the instructor declines to accept the findings of the review committee, the committee shall consider the reasons for not authorizing a grade change given by the instructor and may, upon consideration of these reasons, authorize in writing a grade change to be instituted by the School Director.

The Academic & Behavioral Review Committee is also responsible for the oversight of the student’s ability to meet the background checks and toxicology screens. The Academic & Behavioral Review Committee will make recommendations to the College of Medicine’s Vice Dean for Education in regards to positive findings of background checks and toxicology screening.

**Level III: College of Medicine Vice Dean for Education**

The College of Medicine’s Vice Dean for Education reviews all dismissal recommendations to ensure completeness of significant information available to the Academic & Behavioral Review Committee. The Vice Dean for Education also ensures that the College’s policies and procedures have been followed. The College of Medicine’s Vice Dean for Education either forwards the recommendation to the Graduate School or returns the decision to the Academic & Behavioral Review Committee for re-evaluation.

**Level IV: Graduate School**

The Graduate School is occasionally called upon to address a complaint by a graduate student related to other academic matters. The Graduate School becomes involved in such matters only after all reasonable local efforts to resolve the problem have failed. In accordance with university policy, complaints of harassment, sexual or otherwise, and allegations of scholarly misconduct are directed to the appropriate offices authorized to address them.

Should the Vice Dean for Medical Education concur on the decision by the Academic & Behavioral Review Committee to dismiss a student, the decision will be sent to the Graduate School for consideration. The Graduate School dismisses the student or returns the decision to the College of Medicine’s Vice Dean for Education. In the event that a student demonstrates behavior felt to be significantly harmful to patients, students, staff, or faculty, the Graduate School may suspend or dismiss a student without Level I, II, or III review process.

**REVIEW COMMITTEE STRUCTURE & MANDATES**
Academic & Behavioral Review Committee (ABRC)

Functions of the Committee: The Genetic Counseling Graduate Program Executive Leadership Team has assigned the Academic & and Behavioral Review Committee the following responsibilities:

- Review and make recommendations regarding all students who have been considered for dismissal or repetition of a year for academic, behavioral, or other intervention by Course Directors or Clinical Supervisors.
- Determine curricular recommendations for students who are reinstated;
- Make recommendations for a repetition of a substantial portion of the curriculum;
- Make recommendations of dismissal
- Make recommendations for action because of any combination of lapses in academic or professional behavior; and

The Academic & Behavioral Review Committee does not overturn or change grades given by a Course Director or Clinical Placement Site. In considering recommendations for repetition of a year, dismissal, or interruption of progress, the committee is responsible for reviewing all information related to the student’s progress in graduate school, including all basic science and clinical performance and admissions information.

Committee Composition: The chair of the Academic & Behavioral Review Committee is appointed annually by the Genetic Counseling Graduate Program Director in consultation with the other members of the Executive Leadership Committee. Members should not be concurrent members of the Executive Leadership Committee.

A quorum is five members. Decisions are made by a majority of members voting. An abstention does not count as a vote. The chair of the committee does vote. Any member can designate an alternate with the approval of the committee chair. Voting is open ballot unless a member requests a closed ballot.

The 7 members of the committee are as follows:

- Two Genetic Counseling Graduate Program Course Directors
- Two Ohio State University Faculty or Staff Member
- Three Genetic Counseling Graduate Program Clinical Supervisors

Review Procedures: A Course Director, Clinical Supervisor, or a student can inform the Academic & Behavioral Review Committee of a recommendation for repetition of a year, dismissal, or other interruption of a student’s progress. If possible, the Academic & Behavioral Review Committee should complete the process no less than two weeks and no more than three weeks following the referral. Under extenuating circumstances or spring vacation periods, the meeting may be delayed by the chair or upon request of the student. The review, however, must proceed in a timely manner.

The student will be informed of the review meeting at least seven calendar days before the scheduled meeting. Written notification will be sent to the student’s current home address by e-mail. Notification includes the time and place of the meeting, the review procedures, and the rights of the student. In addition, the student will have the opportunity to meet with the Genetic Counseling Director(s) or designee who will discuss the procedures, provide advice on selection of an advocate and presentation
of information, and answer questions. Prior to the review, the student may inspect his or her College records in accordance with the procedures established by the University.

**Review Meeting:** A review scheduled with the Academic & Behavioral Review Committee is considered an administration function of the Genetic Counseling Graduate Program. Attendance is limited to the committee members, student, one advocate, and participants as indicated below. The student, advocate, and any other invited participants are excused from the meeting before deliberations.

The review meeting by the Academic & Behavioral Review Committee will be conducted according to the following procedures:

- The student will be afforded the opportunity to meet with the Academic & Behavioral Review Committee. The student may select one advocate from the College faculty to accompany him or her to the review.
- At the meeting, the student may present any written or oral information pertaining to his or her standing in graduate school.
- The student may invite up to two faculty, clinical supervisors, or health care professionals who can provide relevant information on the student’s academic performance.
- The committee may request additional information or invite other individuals as needed.
- The chair has the authority to control the conduct of the proceedings.
- A decision is made by a majority vote of the members voting.
- Minutes of the meeting will be taken.
- A summary of the proceedings will be made by the chair.

**Recommendations:** Within five business days, the chair will send a written report of the recommendations to the student and the College of Medicine’s Vice Dean for Education. In addition, the chair or designee will attempt to contact the student by phone regarding the outcome. A report of the recommendations will be included in the student’s permanent file.

If the recommendation is for dismissal, the student may be placed on an immediate administrative leave of absence at the discretion of the Genetic Counseling Graduate Program Executive Committee until the Vice Dean for Medical Education concludes the review.

If the recommendation is for dismissal, the College of Medicine’s Vice Dean for Education is informed in writing and, if possible, by phone. Information to be forwarded to College of Medicine’s Vice Dean for Education includes, but is not limited to: written conclusion of the Academic & Behavioral Review Committee; minutes of review meetings; records of the student’s academic performance; documentation of problems, including the resolution; if available, written statements from faculty, including the student’s academic advisor, program advisor, and advocate; and correspondence with the student regarding the review process.

**College of Medicine’s Vice Dean for Education**

**Functions of the Vice Dean for Education:** The College of Medicine’s Vice Dean for Education has the following responsibilities in the Academic Review Process:

- To review all recommendations for dismissal for completeness of significant information available to the Academic & Behavioral Review Committee making the decision and to ensure
that the College’s and the Genetic Counseling Graduate Program’s policies and procedures have been followed; and

- To recommend to the Graduate School whether or not a student should be dismissed or reinstated.

**Procedure for Dismissal Review:** A recommendation for dismissal is automatically reviewed by the Vice Dean for Education. The Vice Dean is responsible for reviewing the determinations of the Academic & Behavioral Review Committee, and to ensure that they had access to all significant information and to determine if the College’s policies and procedures have been followed.

A recommendation for dismissal should come before the Vice Dean no less than two weeks and no more than three weeks following receipt of the Academic & Behavioral Review Committee’s written recommendation for dismissal and supporting documentation. Under extenuating circumstances, the review meeting may be delayed by the Vice Dean and upon request of the student. The review, however, must proceed in a timely manner. Copies of all materials in the dismissal recommendation are to be forwarded immediately to the Vice Dean.

The student and the chair of the Academic & Behavioral Review Committee are invited to make a presentation or answer questions to the Vice Dean. They only provide information and are not present for the Vice Dean’s deliberations. The student’s advocate can write a letter but is not invited to present to the Vice Dean. The Vice Dean determines if the prior committees had access to significant information that might influence its decision. General information reviewed includes, but is not limited to:

- Written conclusions of the Academic & Behavioral Review Committee;
- The student’s academic performance;
- Documentation of problems, including their resolution; and
- Written statements from faculty, including the student’s advisor and advocate, if available.

In general, guidelines for the College’s policies and procedures include the following:

- The student’s difficulties and attempts to address them were documented. Documentation indicates that the student was informed of his or her difficulties and the consequences of their continuation. Such paperwork also indicates that requirements for improved performance to meet standards were explained to the student and preferably provided in writing.
- The student had opportunities to address and eliminate these difficulties. Regular or standard methods for support (e.g., tutoring or counseling) were made available. The student was referred to other support services if College resources were not available.
- Once the dismissal process with the Academic & Behavioral Review Committee began, the student received written notice of the review meetings and dismissal procedures at least seven calendar days before the scheduled meeting.
- Prior to the Academic & Behavioral Review Committee meetings, the student had the opportunity to discuss the dismissal process with the Genetic Counseling Graduate Program Director(s).
- Prior to the Academic & Behavioral Review Committee consideration, the student was informed that a College faculty advocate can present information on his or her behalf either in person or in writing.
• The student had the opportunity to present in person and in writing any significant information related to his or her difficulties to the Academic & Behavioral Review Committee.

If the Vice Dean is concerned about completeness of information or whether the College’s procedures were followed, the recommendation is returned to the Academic & Behavioral Review Committee. Returning a decision for reconsideration means that there is significant new information or a step in the process may have been overlooked.

If the Vice Dean determines that there was access to all significant information and the College’s policies and procedures were followed, the recommendation for dismissal is forwarded by the Graduate School within 24 hours. With the Graduate School’s concurrence, the notification process is initiated. If the Graduate School does not concur, the decision is returned to the Vice Dean and the Academic Review Board for re-evaluation.

The Genetic Counseling Graduate Program Director(s) will inform the student of the Vice Dean’s conclusions by phone within 24 hours. The Vice Dean will inform the student by letter.

Procedures for Reinstatement Review: The Vice Dean considers all requests for reinstatement by students who have withdrawn from or been dismissed by the College. In general, the Vice Dean will not consider petitions for reinstatement sooner than six months following the student’s dismissal or withdrawal from the College.

Following a denial of reinstatement, the Vice Dean will consider a subsequent petition no sooner than six months, except under the most unusual circumstances. In addition, it will not review more than two petitions for an individual.

The Academic Review Board may choose to:
• Recommend reinstatement;
• Deny reinstatement; or
• Recommend that the student reapply for admission.

The board recommends to the Dean whether the student should be reinstated. With the Dean’s concurrence, the Associate Dean for Medical Education will inform the student in writing of the decision. If the decision is to reinstate the student, the appropriate Academic Standing Sub-Committees will determine specific curricular requirements, including performance requirements for remaining in good standing. The Dean or his/her designee, may also construct an individual educational contract that takes into consideration the student’s previous performance and may include different requirements for satisfactory completion for the educational program than are in place for students without a history of academic difficulty.

The procedures for determining reinstatement after dismissal and withdrawal are similar.

**DISMISSAL**

A student who has been dismissed from the university may petition the Graduate Studies Committee for reinstatement to the Graduate School. If the petition is approved, the Graduate Studies Committee must submit the student’s petition to the Graduate School for review.
Such a request must be supported by compelling evidence indicating that the student has made substantial changes in his or her ability to meet the College’s current cognitive standards, professionalism standards, and graduation requirements. This is in addition to the ones in place when the student was originally admitted.

The process of reinstatement is initiated by the student scheduling a meeting (in person or by phone) with the Associate Dean for Student Life or designee. At that meeting, the Associate Dean will review the reasons for dismissal and discuss information needed to be provided to support a request for reinstatement. If the student chooses to pursue this action, a formal reinstatement request is prepared which includes:

- **A letter** from the student that:
  - Requests reinstatement;
  - Summarizes recent activities that might have an impact on performance; and
  - States how his or her ability to perform has changed since the dismissal, including specific performance problems identified during the dismissal process.

- **Documentation** to support the above (e.g., letters from therapists, proof of completion and grades in courses taken since dismissal).

**WITHDRAWAL**

A student may elect to withdraw from the Genetic Counseling Graduate Program for academic or personal reasons. Unlike a leave of absence, a specific return date is not arranged or guaranteed for a student who withdraws from the Genetic Counseling Graduate Program.

Withdrawal from the university during a semester entails withdrawal from all courses in which a student is enrolled during that semester.

1. Withdrawal from any or all courses requires the approval of the student’s advisor
2. Withdrawal requests must be submitted to the Graduate School

Until closing on the fourth Friday of a semester a student may withdraw from any or all courses that began in the same semester with no mark entered on the official permanent record.

After closing on the fourth Friday of a semester and until closing on the tenth Friday of a semester, if a student withdraws from any or all courses that began in the same semester, the Registrar enters the mark “W” on the official permanent record for the courses withdrawn. A dated notation “withdrew” is entered on the official permanent record when the student withdraws from the university.

After closing on the tenth Friday of the semester, students who, because of circumstances beyond their control, find it necessary to withdraw from any or all courses; must file a petition with the Graduate School. Reasons not acceptable for withdrawal include, but are not limited to, the student’s performance in the course(s), lack of preparation for the course(s), or dissatisfaction with the subject matter offered in the course(s).

The petition form is available on the Graduate School website. Petitions must be approved by the instructor, advisor, and department chair. Petitions are reviewed in the Graduate School. If the Graduate School approves the petition, a copy is filed with the Registrar, who is then authorized to enter
the mark “W” on the student’s official permanent record, and the instructor(s) of the course(s) is/are so notified. If the petition is denied by the Graduate School, the student continues to be enrolled in the course(s), and a final grade(s) must be reported by the instructor(s).

A student who stops attending a course and does not officially withdraw from it has the final grade of “EN” as reported by the instructor entered on the official permanent record. Such a grade is based on the Rules of the University Faculty.

**Military Leave Course Withdrawal:** A graduate student who is involuntarily called to active-duty military service should contact the Graduate School for assistance with course withdrawal.

**Re-Enrollment**

Should a student petition to return to academic studies after withdrawal, he/she must first schedule a meeting with the Genetic Counseling Graduate Program Director(s) or designee. At that meeting, the Executive Leadership Team will review information to support the request, including a letter from the student that requests reinstatement and documentation of how any medical, personal, or academic problems that led to the withdrawal have been resolved. The request is sent to the Academic & Behavioral Review Committee for consideration.

**AVOIDANCE OF CONFLICT IN FACULTY ROLES**

Faculty and other healthcare professionals who provide sensitive health, psychiatric, or psychological care to genetic counseling students will not evaluate student academic performance or participate in decisions regarding student advancement and/or graduation. Faculty are required to attest that they have not provided such care to students when they complete evaluations, participate in course grading, or engage in committee academic review or promotion decisions and must recuses themselves from these academic roles if they have provided such care at any time in the past.
SECTION 12: GRADUATION REQUIREMENTS & COMMENCEMENT CEREMONY

PROGRESS TOWARD DEGREE COMPLETION

In order to graduate in a timely manner, the OSU-GCGP has a schedule for completion of particular milestones within the program. This timeline includes information about the time frames to maintain consistent progress within the degree program. Students who do not meet the guidelines may lose graduate associate funding or may lose good standing within the program, which can eventually lead to a request to the Graduate School for restrictions to be placed on any future enrollment.

PROGRAM REQUIREMENTS

Complete the minimum 34 graduate course credits, including the 11 credits for thesis and 24 credits for clinical placements.

THESIS REQUIREMENTS

Thesis Committee

OSU-GCGP students must form a committee composed of at least three Graduate Faculty members (the academic advisor plus one additional member). The advisor and one of the committee members must hold membership at the category M level or P status in the OSU-GCGP. Non-Graduate Faculty members may be appointed to the thesis committee by approval of the OSU-GCGP Graduate Studies Committee and by petition to the Graduate School. Non-Graduate Faculty members are in addition to the required two current Ohio State Graduate Faculty members. It is the student’s responsibility to solicit faculty participation in the master’s thesis committee. Decisions on committee membership should be made in consultation with the student’s academic advisor. Members of the student’s thesis committee will help decide on issues pertinent to the thesis project that will enable a student to graduate in a timely fashion. It is therefore important to choose an advisor and a thesis committee early in the program. Students should choose an advisor by the end of the first semester in the program, and a thesis committee should be formed by Spring semester of the first year BEFORE data collection or study interventions have begun.

Thesis Proposal Development and Submission (See Appendix H for tentative timeline)

The first step in the thesis procedure is to write at thesis proposal. The proposal should be written in consultation with the student’s advisor and, if possible, members of the thesis committee. After writing the proposal, students must provide the thesis advisor and the committee members with a copy of the proposal for review and comment. At minimum, committee members must be given 10 business days to read, evaluate, and approve the document. If the committee is not yet formed, the student may rely on the thesis advisor for general oversight of the protocol development and submission to the IRB. However, data collection and/or study interventions cannot be started until approval of the entire thesis committee. Prior to collection of data or initiation of study interventions the student must have the committee review the proposal.
1. The committee may approve, disapprove or require changes to the proposal. Students and their advisors should convene the thesis proposal meeting/discussion early in the process, with approval of the thesis proposal no later than the end of the second semester of enrollment. All committee members must sign the proposal approval form before the data collection and/or study interventions can proceed. The internal OSU-GCGP thesis proposal approval form does not speak to whether the OSU-GCGP student completed a successful oral defense of his/her proposal. A faculty signature provided under "approve" on the form simply signals that a meeting concerning the thesis proposal occurred between the student and members of the committee and that the specific faculty member agrees at the end of the meeting that the outline of the scope of the project is sufficient and detailed enough for the student to move forward with the research effort (i.e., data collection, data analysis, and production of formal thesis).

2. After it is signed by the committee, the form must be returned to the OSU-GCGP office and the student can begin work on a thesis.

3. The student then prepares the thesis under the supervision of the advisor and the committee.

4. The thesis draft must be approved by the committee before a student takes the thesis defense. At minimum, committee members must be given 10 business days to read, evaluate, and approve the document prior to date of the defense meeting.

5. Students are responsible for meeting Graduate School deadlines and specifications for preparation of the thesis. Students should consult the booklet, Graduate School Guidelines for Preparing Graduate Theses, Dissertations, and D.M.A. Documents, available from the Graduate School. Students should offer to provide a bound copy of the thesis to the advisor

**THESIS FUNDING**

It is the policy of the OSU-GCGP that all graduate students will have $500.00 budgeted toward financing their thesis project. Given that the scope of projects will vary, it is conceivable that this funding may not adequately cover the cost of the project. As such, all graduate students who have projects that entail a budget of more than $500.00 to complete will be expected to apply for additional grant funding. Funding opportunities include awards given by the National Society of Genetic Counselors, local foundations, advocacy groups, and University grant cycles. The OSU-GCGP will consider additional funding on a case-by-case basis, if additional funding is not secured to offset the overage of the thesis project.

**Draft**

A student pursuing the thesis option must submit a complete, word processed thesis draft to the master’s examination committee. The thesis draft must be approved by the master’s examination committee before the student takes the examination. The thesis must conform to Graduate School
format requirements as described in the “Graduate School Guidelines for Formatting Theses, Dissertations, and D.M.A. Documents” available on the Graduate School website.

**Thesis Oral Defense for Master’s Degree in Genetic Counseling**

Students writing a thesis must take an oral examination defending their thesis. This oral examination is the final validation of performance for the master’s degree. It is not a second examination on material covered in individual courses. Rather it is an examination of the student’s full knowledge in the field of Genetic Counseling and the student’s ability to integrate that knowledge as it relates to the thesis.

The examination must be taken during the semester in which the student plans to graduate. The student must be registered for at least three graduate credit hours during that semester. The thesis defense is administered by the student’s thesis committee under the auspices of the Graduate Studies Committee of the College of Medicine Genetic Counseling Graduate Program. The student must determine that all participants are category M or P members of the graduate faculty and willing to participate in the thesis defense as specified in this section. The student must provide a copy of the Graduate Examination Procedures to any outside members of his or her thesis committee. Examination procedures are available from the School’s Graduate Program Office.

Before a student does their defense, the student must have submitted the Application to Graduate electronic form to the Graduate School (247G University Hall) by the deadline set for the semester in which the student wish to graduate. Usually this is the Friday of the third week of classes. The student, advisor and the chair of the Graduate Studies Committee of the OSU-GCGP must all electronically sign the form. The form is available on the Graduate School website at gradforms.osu.edu.

The student will make arrangements for the oral examination with the examination committee. A room for the exam can be reserved by contacting the OSU-GCGP Program Coordinator located in Room 1006 at 2001 Polaris Parkway, 614-293-3437. The oral examination lasts approximately two hours and should be scheduled during regular university business hours Monday through Friday. At minimum, committee members must be given 10 business days to read, evaluate, and approve the document prior to the oral examination. The oral examination will ordinarily allow students to amplify or correct statements made in the thesis, but it is not limited to the research material covered in the thesis.

**Attendance**

If the master’s examination includes an oral portion, the advisor serves as chair. Except when video conferencing is involved, all members of the master’s examination committee must be present during the entire examination and are expected to participate fully in questioning during the course of the examination and in the discussion and decision on the result. Other faculty members and graduate students may attend the examination, subject to the rules of the Graduate Studies Committee.

**Video Conferencing**

With the prior approval of the Graduate School, one remote examination site may be linked through video conferencing. All master’s examinations involving video conferencing must adhere to the Graduate School’s guidelines for video conferencing (see Appendix A).
Oral Examination

Before the beginning of the oral portion of the thesis defense, the committee will discuss (without the student present) the likelihood of success in the examination. After this meeting, the committee will advise the student of the opinion of the committee. The opinion of the committee before the examination is only an opinion based on the written material, and so is not a guarantee of success or failure. Students have the right to take the oral examination even if the student has been advised of a high likelihood of failure. Conversely, a committee may believe there is a high probability of success, but the student may not perform to expectations. In all cases, the committee’s opinion beforehand only reflects a judgment about what is likely to happen, and should only be taken as an advisement. If a student decides not to take the oral at the time it is scheduled, the student must sign a statement indicating that decision and this constitutes failure of the exam.

Halting an Oral Examination in Progress

If for reasons of illness, fire, or other emergency, the committee members agree that it is necessary to halt the oral portion of the master's examination, then the examination shall be rescheduled without prejudice to the student. If, however, the committee members unanimously decide that the examination has been sufficient to reach a decision to pass the student, then they shall consider the examination concluded and report the result to the Graduate School.

Results of the Master’s Thesis Examination

Decision: The decision on the outcome of the master’s examination is reached in the student's absence immediately following the oral examination. Only the master’s examination committee members are to be present for discussion of the student’s performance and the decision about the outcome. Each examiner indicates judgment by signing the Master’s Examination Report form that must be submitted to the Graduate School by the published deadline for the semester or summer term of graduation. The advisor notifies the student and the Graduate Studies Committee of the master’s examination committee’s decision.

- **Satisfactory:** The student is considered to have completed the master’s examination successfully only when the decision of the master’s examination committee is unanimously affirmative.
- **Unsatisfactory:** If the examination is judged unsatisfactory, the master’s examination committee must decide whether the student will be permitted to take a second master’s examination in that graduate program and must record that decision on the Master’s Examination Report form.

Second Master’s Examination: If a second examination is held, the master’s examination committee must be the same as the original one, unless a substitution is approved by the Dean of the Graduate School. A student who has failed the master’s examination twice in one graduate program is not permitted to take another master’s examination in that program. The second examination may be held in the same semester as the first examination, although this is usually not advisable.
Review: On written appeal by the student or a member of the master’s examination committee, the Graduate School Grievance Committee reviews the master’s examination to ensure its conformity to Graduate School rules and to determine if it was conducted fairly and without prejudice to the student. The Graduate Council has established review procedures called “Graduate Student Grievance Review Guidelines” (Appendix D of the Graduate School Handbook).

Approval

After making changes to the thesis that are satisfactory to the student’s committee, the student must obtain the signatures of all the committee members on the electronic Thesis Approval Form at gradforms.osu.edu indicating that the thesis is acceptable in meeting the requirements of the master’s degree. Changes to the thesis after the oral defense must be clearly marked (e.g. via “track changes”) so that the committee will be able to quickly locate and approve these revisions. The Thesis Approval form must be submitted to the Graduate School by the published deadline for the semester or summer term of graduation (see Graduate School Handbook for exact details).

Restricted Material

Theses must not include material restricted from publication.

Submission

The thesis must be submitted to the Graduate School by the published deadline for the semester or summer session of graduation. The final thesis must be submitted electronically as a PDF document to OhioLink, the Ohio Library and Information Network. In addition to copies required by the Graduate School, the student should offer to provide a copy of the bound thesis to the advisor so that he/she is able to approve the document and keep a copy for his or her records.

GRADUATION
(from the Graduate School Handbook Section VI)

It is the dual responsibility of the Graduate Studies Committee and the Dean of the Graduate School to review the student’s record and ensure that all degree requirements are completed at the end of the expected semester or summer term of graduation.

Requirements

In addition to the master’s degree requirements described in this section, the student:

1. Successful completion of all clinical rotations at ACGC-approved sites with satisfactory reviews from the clinical supervisor, along with a completed and signed ACGC logbook with 50 cases.
2. Completion of a minimum of 69 graduate credit hours. Eighty (80) percent of those required credit hours must be completed at this university over a period of at least two semesters.
3. Graduate cumulative point-hour ratio of at least 3.0 with receipt of final grades in the University Registrar’s Office by the published deadline.
4. Registration for at least three graduate credit hours during the semester in which graduation is expected.
5. Satisfactory completion of the master’s examination and submission of the Master’s Examination Report form to the Graduate School by the published deadline for the semester or summer term of graduation.

6. Submission of the Thesis Approval form to the Graduate School and electronic submission of the approved thesis to OhioLink by the published deadline for the semester or summer term of graduation.

7. Submission of the Application to Graduate form to the Graduate School no later than the third Friday of the semester (or third Friday of May session for summer term commencement) in which graduation is expected.

8. Completion of the master’s degree requirements established by the Graduate Studies Committee.

**Application to Graduate**

The following procedures pertain to a master’s candidate’s last semester of enrollment, which is also the semester of graduation. Students should also consult the complete listing of deadlines and application requirements at [www.gradsch.osu.edu](http://www.gradsch.osu.edu). Forms related to graduation and degree examinations are accessed electronically at GRADFORMS.EDU.

Per the Graduate School’s Final Semester Procedures Guidelines to graduate, Master’s students must:

1. Submit an Application to Graduate by the third Friday of the semester (or third Friday of May session for summer term commencement). The application is valid for that semester or summer term only. Submitting this application indicates that the student is expected to complete all degree requirements that semester or summer term. The form must be signed by the student, the advisor, and the Graduate Studies Committee chair. The degree plan the student is pursuing and the proposed master’s examination committee members must be listed on the form.

2. Complete the master’s thesis examination no later than the published deadline for the semester or summer term of graduation. Specific dates for graduation deadlines can be found on the Graduate School Web Site at [http://www.gradsch.osu.edu/Depo/PDF/Deadlines_ProfD.pdf](http://www.gradsch.osu.edu/Depo/PDF/Deadlines_ProfD.pdf).

3. Verify the Report on Final Examination has been completed by the master’s thesis examination committee by the published deadline for the semester or summer term of graduation.

4. Bring a complete, paper copy of the formatted thesis document to the Graduate School for a format check. Guidelines for document formatting and sample pages are available on the Graduate School website at [gradsch.osu.edu/guidelines.html](http://gradsch.osu.edu/guidelines.html).

**NOTE:** For format checks, plan to arrive at least 30 minutes before the office closes. 4:30 p.m. for autumn and spring semesters. 4 p.m. for summer term

5. Once the Graduate Studies Committee approves the final copy, the student is ready to submit the thesis.

6. Convert the thesis document to an embedded-font PDF.

**Instructions for users of Word 2007 or 2010 for PC**

a. Have the document open and on screen
b. Select FILE...SAVE AS
c. Select PDF OR XPS/PDF (in SAVE AS TYPE dropdown)
d. Click on OPTIONS  
e. Select ISO 19005-1 COMPLIANT (PDF/A)  
f. Select OKAY  
g. Click SAVE  

7. Submit the thesis document to OhioLINK https://etdamin.ohiolink.edu/. All students must submit the bibliographic information, abstract, and full text. The abstract submitted on OhioLINK is limited to 500 words or less. This requirement does not impact the length of the abstract in the actual document. In the section Publication information, master’s students must select the first option in the UMI section – DO NOT UPLOAD MY ETD – before exiting the OhioLink website.

   **NOTE:** After the student has uploaded the document be sure to press the button Submit my ETD before exiting the OhioLINK website. Complete the submission no later than 8 a.m. on the deadline day to allow for technical difficulties and format correction requests. Documents are reviewed in the order in which they are received. The Graduate School cannot guarantee that documents submitted after 8 a.m. will be processed in time to meet the 5 p.m. deadline (4:30 p.m. during the summer).

8. Look for an e-mail from the Graduate School Graduate School about the submission of the document. Within a few hours of the document submission, the Graduate School will either: notify the student that the document has formatting problems that need to be corrected. If so, the student must make the corrections and upload the revised version to the OhioLINK site or notify the student that the document has been accepted. If so, the student should proceed to step 9.

9. Complete the following items:
   a. Report on Final Document completed by all members of the committee  
   b. Commencement Absence form (if applicable). If not attending commencement, indicate how diploma should be issued on the Application to Graduate on GRADFORMS.OSU.EDU.  
   c. Delay of Final Document (if applicable). Complete this form on GRADFORMS.OSU.EDU.

   **NOTE:** It is possible to request a delay of the publication of the thesis with OhioLINK. This should be done when the electronic accessibility of the thesis would hinder the student in publishing his or her work with a journal or if the student is waiting on a patent. Students must talk to their advisor about this option. If a student wants to request a delay, a Delay of Final Document form must be completed and submitted on GRADFORMS.OSU.EDU. Theses are not sent to UMI/ProQuest for archiving purposes.

**RESEARCH COLLOQUIUM**

The Genetic Counseling Graduate Program will have a Research Colloquium one day prior to the Genetic Counseling Graduate Program Commencement Ceremony. **Students will be required to present brief synopsis of their thesis projects as part of the completion of their Master’s degree.** Parents, friends, and relatives are invited to attend.

**PRE-COMMENCEMENT CEREMONY**
The Genetic Counseling Graduate Program will hold an annual private graduation ceremony for the graduating class. This pre-commencement ceremony will occur the day prior to the University Graduation Ceremony, barring unforeseen circumstances, so that the graduates can attend both ceremonies.

</table>
For the purposes of questions 6 - 9, the "ability to practice as a Genetic Counselor" is to be construed to include all of the following:

1. The cognitive capacity to make appropriate clinical assessments and exercise reasoned judgments and to learn and keep abreast of developments in the field of Genetic Counseling; and
2. The ability to communicate those judgments and information to patients and other health care providers, with or without the use of aids or devices, such as voice amplifiers; and
3. The physical capability to perform tasks such as the performance of Genetic Counseling, with or without the use of aids or devices, such as corrective lenses or hearing aids.

"Medical condition" includes physiological, mental, or psychological conditions or disorders, such as but not limited to orthopedic, visual, speech, and hearing impairments, cerebral palsy, epilepsy, muscular dystrophy, multiple sclerosis, cancer, heart disease, diabetes, mental retardation, emotional or mental illness, specific learning disabilities, HIV disease, tuberculosis, drug addiction, and alcoholism.

</tbody>
</table>
APPENDIX B:

CONSCIENTIOUS OBJECTION POLICY

The Genetic Counseling Graduate Program recognizes that for reasons of commonly-held ethical and religious beliefs, some students may wish not to involve themselves with certain medical procedures or services. Out of respect for such beliefs, the Genetic Counseling Graduate Program will respect conscientious objection by students if all of the following criteria are met:

1. A conscientious objection does not relieve a genetic counseling student from a duty to meet the current standard of timely and acceptable medical care, to engage in full and nonselective disclosure for Informed Consent, to inform patients of their conditions, and referral prognoses, and risks of receiving care services for their illness, condition or health-related request.
2. Patients cannot be abandoned. Any student who wishes to excuse him or herself must find another qualified individual to provide service to patients.
3. A genetic counseling student cannot object to provide a service if the patient’s condition, in the judgment of an attending physician, requires immediate action and that student’s assistance is required to provide that service.
4. A genetic counseling student shall not object to participate in the care of a specified classification or group of people, or on the basis of particular diseases or states of health or illness.
5. A genetic counseling student shall not object to provide or participate in a health care service if this objection amounts to discrimination.
6. A conscientious objection must not be so broad as to limit a student’s general medical education. If a conscientious objection constrains a student’s ability to provide the current standard of medical care, the Genetic Counseling Graduate Program may require that student to withdraw from graduate school.
7. An objection to participate in any service or delivery of care does not exempt the student from the responsibility to learn about its indications, contraindications, benefits, and risks. A student will not be exempted to demonstrate this knowledge on any examination.
8. All curricular or clinical time missed through an excused exemption must be made up otherwise.
9. When a conscientious objection might compromise completion of the curriculum, this matter will be discussed by the appropriate evaluation committees, and if necessary, by the appropriate Executive Leadership Committee. Students can represent themselves at these meetings in accordance with College of Medicine policies.
10. If, in the course of a conscientious objection, a student engages in behavior which the Genetic Counseling Graduate Program considers unacceptable for a genetic counselor, the Genetic Counseling Graduate Program may require that student to withdraw from graduate school on the basis of improper professionalism.
11. A student wishing to make a Conscientious Objection Declaration should complete the Conscientious Objection request and declaration form (available in the Genetic Counseling Graduate Program Office at 2001 Polaris Parkway). Any appeals to the decision of the Genetic Counseling Graduate Program Executive Leadership Team will be submitted to the College of Medicine Vice Dean for Education.
Conscientious Objection Request and Declaration

Student Name: ______________________________________________________________

Activity/Service Objected: _______________________________________________________

Date of Activity/Service: _______________________________________________________

Student’s Declaration of Objection:

In assertion and practice of this Conscientious Objection:

- I will meet the current standard of medical care, including full and nonselective informed consent and referral.
- I will not abandon any patient, especially in a life threatening situation.
- I will not refuse to assist during a public health emergency.
- I will not discriminate against any selected group(s) of people/patients.
- I will not contravene any code that governs my behavior as a genetic counseling student.
- I remain responsible for cognitive knowledge about the indications, contraindications, benefits and risks of the activity/service to which I object.
- Any curricular time missed due to this objection will be otherwise made up.

APPENDIX C:

Teaching and Learning Environment Incident Report Form

Please complete and forward this form marked CONFIDENTIAL to:

Chair, Academic & Behavioral Review Committee
Genetic Counseling Graduate Program
2001 Polaris Parkway, Ste. 1000
Columbus, OH 43240

1. When and where did the incident occur?
   - Date:
   - Location:

2. Who was involved in the incident? Please provide names and positions.

   Does the complainant wish to remain anonymous? ___ Yes ___ No

Action cannot be taken on individual anonymous complaints. Anonymous complaints will be filed and reviewed to monitor for patterns of mistreatment.

3. Who witnessed the incident?

4. What occurred in the incident?

Continued on next page
5. What was done to resolve the incident?

6. Was the incident resolved to all parties’ satisfaction? ___ Yes ___ No

7. If No, what further action do you recommend?
Appendix D: Request for Scheduled Absence Form

Please complete and forward this form to:
Genetic Counseling Graduate Program
2001 Polaris Parkway, Ste. 1000
Columbus, OH 43240

Name: ___________________________________

1. What dates are you requesting an excused scheduled absence?

2. What event is prompting your requested scheduled absence?
   a. Event:
   
   b. Location of event:

3. Which classes are you missing due to this scheduled absence? Please provide name of course(s), time(s) of course, and name of course director(s).

4. Are you requesting a WebEx Meeting be scheduled so you can participate in the class via distance?
   Yes  No

To be completed by Genetic Counseling Graduate Program Director(s):

Scheduled Absence Approved: Yes  No
If No: Why?

____________________________  _______________________
Signature of Director(s)  Date

Student is responsible for notifying Course Directors and Clinical Placement Supervisors of the Scheduled Absence, once approved by the Director(s). Student is also responsible for determine how the class material they miss will be made up.
**Appendix E: Emergent Absence Form**

Please complete and forward this form within one week of return from emergence absence to:

Genetic Counseling Graduate Program  
2001 Polaris Parkway, Ste. 1000  
Columbus, OH 43240

Name: ___________________________________

5. Please provide a summary of the emergency that lead to your absence from classes/clinical placement?

6. On what date(s) did this emergence absence occur?

7. Which classes did you miss due to this unscheduled emergency absence? Please provide name of course(s), time(s) of course, and name of course director(s).

Student Evaluation

<table>
<thead>
<tr>
<th>Student Name:</th>
<th>Rotation Site:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Supervisor:</td>
<td>Rotation Date:</td>
</tr>
</tbody>
</table>

Please use a 1-5 scale to evaluate students. For instance a beginning student who meets expectations but does not exceed expectations might receive a “3” on this scale. Please use this grading scale and your additional comments to help students identify areas for improvement.

### Communication Skills

<table>
<thead>
<tr>
<th>Task</th>
<th>Rating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Can contract with the client and establish a mutually agreed on genetic counseling agenda</td>
<td>1 2 3 4 5 N/A</td>
</tr>
<tr>
<td>Can elicit an appropriate and inclusive family history</td>
<td>1 2 3 4 5 N/A</td>
</tr>
<tr>
<td>Can elicit pertinent medical information including pregnancy, development and medical histories</td>
<td>1 2 3 4 5 N/A</td>
</tr>
<tr>
<td>Can elicit a social and psychosocial history</td>
<td>1 2 3 4 5 N/A</td>
</tr>
<tr>
<td>Can explain genetic, medical and technical information including but not limited to diagnosis, etiology, natural history and prognosis and treatment and management of genetic conditions and/or birth defects.</td>
<td>1 2 3 4 5 N/A</td>
</tr>
<tr>
<td>Can explain the technical and medial aspects of diagnostic and screening methods and reproductive options including associated risk, benefits and limitations.</td>
<td>1 2 3 4 5 N/A</td>
</tr>
<tr>
<td>Can communicate with clients with a variety of socioeconomic and educational backgrounds.</td>
<td>1 2 3 4 5 N/A</td>
</tr>
<tr>
<td>Can understand, listen, communicate and manage a genetic counseling case in a culturally sensitive manner.</td>
<td>1 2 3 4 5 N/A</td>
</tr>
<tr>
<td>Can document and present case information clearly and concisely (please consider oral and written skills) as appropriate to the audience</td>
<td>1 2 3 4 5 N/A</td>
</tr>
<tr>
<td>In total, the communication skills of this student are:</td>
<td>1 2 3 4 5 N/A</td>
</tr>

<tbody>
<tr>
<td>Please evaluate your student in this set of skills using E-Excellent, G-Good, A-Average, M-Marginal, UA-Unacceptable</td>
</tr>
</tbody>
</table>

| Can establish and maintain inter- and interdisciplinary professional relationships and function as part of a health care delivery team. | |
| Acceptance by patients | |
| Ability to problem solve | |
| Demonstrates independence in learning | |
| Dependability | |

What are the major strengths of this student?

How could this student improve and in what areas?

What is your final assessment of this student?
Appendix H: Tentative Thesis Timeline

**Autumn Semester First Year**

### December:
- Develop Thesis Idea
- Identify Academic Advisor (Thesis Chair)
- Identify Thesis Committee Members

**Spring Semester First Year**

### February:
- Protocol Written
- Protocol Approved by Thesis Committee

### April/May:
- Protocol Approved by IRB

**Summer Semester First Year**

### May-August:
- Data Collection

### July-August:
- Data Analysis
- Begin drafting background and methodology sections of thesis

**Autumn Semester Second Year**

### August – October:
- Final Data Analysis

### October- November:
- Draft thesis

### December
- Apply to graduate

**Spring Semester Second Year**

### End of January:
- Thesis drafted and submitted to Thesis Committee
- Date for defense scheduled

### February – 3rd week of April:
- Defense completed AND approved by committee

### 3rd-4th week of April:
- Approved thesis and documents submitted to OhioLink
