The following document has been put together to assist you in the scheduling of your Med 4 DOC and elective rotation selections. If you are thinking about applying for residency in a given specialty, this document is meant to be a guide to help you choose the appropriate Med 4 DOCs and electives which would best prepare you for that specialty. Suggested "model curricula" are listed below by specialty. The suggestions are very general, and open to interpretation and variation based upon your personal preferences and any advice you may receive from your faculty advisor. In addition, away electives are not listed below, and should be considered in consultation with your faculty advisor.

Also listed below are suggested departmental faculty advisors who are willing and able to assist you with your career planning, Med 4 scheduling, residency applications, and interviewing. These faculty members have been chosen based on their knowledge and experience with the Med 4 curriculum as well as their familiarity with the residency application and interviewing process. Feel free to call them and make an appointment if you want advice on career planning or Med 4 scheduling. Laura Volk (292-1494), Med III/IV Program Manager can assist you at any time regarding these issues as well.

1. Anesthesia  (Revised 02/11/2013)

**DOC-1**: Adult or Pediatric Emergency Medicine.

**DOC-3**: Palliative Medicine/Hospice Care, Pain & Palliative Medicine, Pain Medicine & Therapy, or any others.

**DOC-4**: SICU.

*Electives*: Anatomy, Anesthesia, SICU, Palliative Medicine/Hospice Care if not done as DOC 3, Internal Medicine specialties - consider cardiology, pulmonary, renal, GI. Take courses for breadth, topics you won't have opportunities to study in residency - radiology, radiation oncology, dermatology.

*Special Requirements*: complete a general anesthesia rotation by October.

**Faculty Advisors**: Lori Meyers, Andy Roth, Ron Harter

2. Emergency Medicine  (Revised 12/28/2012)

**DOC-1**: Emergency Med at OSU.

**DOC-3**: Geriatrics, Complicated Diabetes Mellitus Comprehensive Care, HIV Patient Care, Congestive Heart Failure, Adult Kidney Disease, Child Abuse/Child Advocacy, Alcohol and other Drug Abuse.

**DOC-4**: MICU, SICU, Cardiology, Pulmonary.

*Electives*: Advanced Topics in Emergency Medicine (ATEM: Honors Longitudinal EM Elective), Honors Ultrasound longitudinal elective, Radiology, Anesthesia, Sports Medicine, Dermatology, Surgical specialties in general, including Plastics, ENT/Ophtho (two 2-week electives if possible), Hand Surgery, Orthopedics.

*Special Requirements*: Away Electives in EM only at places where you may want to match. Students interested in Emergency Medicine should schedule their DOC-1 at OSU in July, August or September. Please contact Sharon Pfeil, (Sharon.pfeil@osumc.edu), Education Coordinator, for an application form. Students will be notified of acceptance prior to the initial scheduling window. If selected, this will become your automatic first preference.

*Interviews are conducted November through January*

**Residency Directors**: Diana Gorgas (Director), Travis Eastin, Jillian Schwaab, Sarah Greenberger, Dan Bachmann

**Faculty Advisors**: Sorabh Khandelwal, Dan Martin, David Bahner, Nick Kman, Mark DeBard, Aaron Bernard, Mark Moseley, Cynthia Leuno and Laura Thompson.
### 3. Family Medicine  (Revised 01/7/2013)

**DOC-1:** Rural Emergency Medicine.

**DOC-3:** Geriatrics, Developmental Disabilities, Physical Medicine, Complicated Diabetic Patient, Rheumatology, Alcohol and Rehab and Child Abuse, HIV Patient Care, Health Care for the Underserved, Congestive Heart Failure.

**DOC-4:** Family Medicine (OSU, Grant, Riverside, Mt Carmel), Internal Medicine (unspecified).

**Electives:** Anatomy, Dermatology, Rheumatology, Public Health Electives, Radiology, Sports Medicine, Orthopedics, Family Medicine Honors Rotation (if eligible), International rotation, Cardiology.

**Special Requirements:** None

*Interviews are conducted October through January*

**Faculty Advisors:** Allison Macerollo, Leon McDougle, Holly Cronau, Fred Miser, Mary Jo Welker, John McConaghy, and Don Mack.

### 4. Internal Medicine  (Revised 02/11/2013)

**Med 4 Prototype Schedules for Internal Medicine**

**Background:** Internal Medicine physicians provide almost half of all the medical care in the country and represent a diverse range of focused areas of practice. Twenty-five to fifty percent of medical students in a class will select this career pathway, either as part of a combined residency program or in a categorical IM program. In order to best advise students as to how to structure their fourth year, we have defined several “Clinical Tracks” to allow students to explore different foci of clinical IM. We have tried to help you use your required clerkship selections optimally to prepare for your future pathway.

**Advanced Clinical Track in Critical Care & Hospital Medicine** (recommended for those considering acute care IM or EM/IM combined)

**DOC-1** Undifferentiated Patient. Adult Emergency Medicine (or Peds EM if combined Med/Peds).

**DOC 2**—Ambulatory Care of Differentiated Patient/IM. This can be scheduled later in the year. Both primary care IM and ambulatory general cardiology or pulmonary are good experiences that will help you improve your transition of care plans after ED or hospitalized acute care.

**DOC-3:** Chronic Care with Interdisciplinary Approach. — This can be scheduled later in the year; options that are particularly helpful for the physician interested in Acute Care IM include Adult Kidney Disease, Heart Failure, Geriatrics, Palliative Medicine/Hospice Care. Other DOC-3 rotations of interest include HIV, Diabetes, Rheumatology, or consider specialties outside IM like Physical Medicine and Rehab PM&R, Alcohol and Drug Dependency, and Chronic Pain.

**DOC-4:** Acute Hospital Care. This is your key experience for residency applications. Any DOC 4 in the Department of Medicine, preferably on a service not previously assigned. We have several Critical Care and Hospital Medicine options. Select OSU if you are interested in an academically competitive program. Both Riverside and Mount Carmel offer excellent experiences, if you are interested in community programs and eventual community based clinical practice. The DOC-4 should be scheduled early summer for your application.

**Electives:** Use electives to broaden your experiences. We have a new elective Advanced Topics in Critical Care Medicine that provides detailed classroom work in critical care topics and hands on simulated procedures workshops. Also consider electives in Toxicology, Anesthesiology, Medical Therapeutics, or Radiology. Additional Subinternships in critical care and
other hospital based experiences are available for elective credit. If interested in a highly competitive academic residency program, consider an away rotation at the site.

**Advanced Clinical Track in Cardiology** (recommended for students considering cardiology or one of its subspecialties)

DOC-1 Undifferentiated Patient. Adult Emergency Medicine with high patient volume (OSU or urban options)

DOC 2-Ambulatory Care of Differentiated Patient/IM. This can be scheduled later in the year. Do primary care IM. You will benefit from the broader perspective of caring for multisystem chronic disease management. Alternatively, there are general cardiology options in community settings and other specialty options.

DOC-3: Chronic Care with Interdisciplinary Approach. – This can be scheduled later in the year; options that are particularly helpful for the physician interested in Cardiology include Adult Kidney Disease, Geriatrics, and Heart Failure. The key learning opportunities here focus on learning to manage chronic issues in complex adult patients using multidisciplinary and community resources.

DOC-4: Acute Hospital Care. This is your key experience for residency applications. Select from one of the many Cardiology experiences or an ICU experience. Select OSU if you are interested in an academically competitive program. The DOC-4 should be scheduled early summer for your application.

**Electives**: For cardiology- interested students, some experience in research can be very helpful to expose you to evidence-based and emerging clinical and translational research. We have a number of excellent academic cardiologists with whom you might work. In addition, we have a new elective Advanced Topics in Critical Care Medicine that provides detailed classroom work in critical care topics and hands on simulated procedures workshops. Also consider electives in Anesthesiology or Radiology or Medical Therapeutics. Additional Subinternships in critical care and other hospital based experiences are available for elective credit. If interested in a highly competitive academic residency program, consider OSU for the required Subinternship and an away rotation at the site. Consider using the Advanced Clinical Medicine elective to tailor a procedurally related experience for yourself.

**Advanced Ambulatory Medicine Track**- (for students interested in general or specialty medicine with a longitudinal and ambulatory focus like Primary Care, Endocrinology, Rheumatology, Infectious diseases, Nephrology, Allergy/Immunology, Hematology/Oncology, Geriatric Care, Palliative Medicine, Pulmonary medicine.

DOC-1 Undifferentiated Patient. Adult Emergency Medicine (or Peds EM if combined Med/Peds).

DOC 2-Ambulatory Care of Differentiated Patient/IM. This or the DOC 3 should be scheduled during the summer. Primary care IM or any of the specialty IM options are good experiences. Use the specialty options to broaden your exposure to different specialties like Hematology or Oncology.

DOC-3: Chronic Care with Interdisciplinary Approach. – This or the DOC 2 should be scheduled during the summer. Excellent choices include Geriatrics, Diabetes, HIV, Adult Kidney Disease, Rheumatology, Heart Failure or Palliative Medicine. Consider specialties outside IM like Alcohol and Drug Dependency, Care of the Underserved, Chronic Pain, Physical Medicine and Rehab.

DOC-4: Acute Hospital Care. This can be scheduled later in the year, perhaps spring or after interviews to gear up for residency. Any DOC 4 in the Department of Medicine, preferably on a general service or in a specialty to which you have not previously been exposed. Select a site similar to the type of residency program to which you hope to match.

**Electives**: Use electives to broaden your experiences. We have many different options. Allergy/Immunology or Human Genetics are unique options. Consider electives outside IM that will complement your future training, like Sports Medicine, Radiology, etc.

**Advanced Procedural Medicine Track**- (for students interested in specialty medicine with significant procedural opportunities like gastroenterology, vascular medicine, nephrology, pulmonary/critical care, cardiology, sleep medicine, rheumatology etc.)
**Advanced Primary Care Medicine Track** - (for student interested in Primary Care Medicine)

**DOC-1 Undifferentiated Patient.** Adult Emergency Medicine (or Peds EM if combined Med/Peds).

**DOC 2-Ambulatory Care of Differentiated Patient/IM.** Use the specialty options to broaden your exposure to different specialties like Hematology or Oncology, community nephrology or cardiology. Rural practice opportunities with affiliated hospitals can be unique experiences.

**DOC-3: Chronic Care with Interdisciplinary Approach.** – Rheumatology, Adult Kidney Disease, Heart Failure, Pediatric and Congenital Lung Disease are good options.

**DOC-4: Acute Hospital Care.** Schedule this rotation in the summer; consider a service with a procedural specialist like MICU, cardiology, nephrology, gastroenterology.

**Electives:** Use electives to broaden your experiences. We have many different options. Consider the Advanced Topics Elective in critical care or an Advanced Clinical Medicine elective that you can tailor to expose you to various procedures. Consider electives outside IM that will complement your future training, like Radiology or Anesthesiology.

**Advanced Academic Medicine Track** - (for students interested in practicing medicine in academic medical centers)

Consider taking advantage of the opportunities at OSUWMC, specifically the James Comprehensive Cancer Center, MICU, and Ross. Consider an elective in Medical Education or Research.

**Internal Medicine – Pediatrics Track**

**DOC-3: Chronic Care with Interdisciplinary Approach.** – Pediatric and Congenital Lung Disease and Care of the HIV patient are particularly good for students considering IM-Peds as these two rotations were designed to include IM-Peds clinical experiences. This requirement can also be completed in any of the adult specialty options, like Adult Kidney Disease, Heart Failure, Diabetes, Palliative Medicine, Rheumatology; or pediatric specialty options like Pediatric Healthy Weight and Nutrition, Developmental Disabilities, End Stage Renal Disease in Children, Pediatric Hospice.

**Special Requirements for All:** Schedule to meet with a clerkship director for IM letter of recommendation in August or September.

*Interviews are conducted October through January*

**Faculty Advisors:** Beth Liston (Hospitalist), Michael Langan (GIM/Comprehensive Care), Cynthia Ledford (Gen Med or Med/Peds), Don Benson (Heme/Onc), Madhu Mehta (Rheum), Kathleen Dungan (Endo), Mike Para (ID), Veronica Franco (Cardio), Ganesh Shidham or Rose Shim (Renal), Matt Zirwas (Derm), Sheryl Pfeil (GI), Troy Schaffernocker (IM,
Pulmonary/CC/SLEEP), Mike Ezzie (Pulmonary/CC), David Hauswirth (Allergy/Immunology), Pat Ecklar or John Weis (Gen Med Mt. Carmel), Tom Boes (Pulmonary, RMH), Karen Glasgow (Gen Med, RMH).

5. Neurology  (Revised 01/08/2013)

**DOC-1**: Adult Emergency Medicine.

**DOC-3**: Physical Medicine & Rehab, Developmental Disabilities, Geriatrics, Rheumatology.

**DOC-4**: Neurology, Cardiology, General Medicine.

**Electives**: Anatomy, Neurology Clinics, PMR, Rheumatology, Psychiatry, Neurology Research (by special arrangement), Neurosurgery, Ophthalmology, ENT, Orthopedics.

**Special Requirements**: Chairman letters of recommendation are not universally required but desirable. Electives including clinic time spent with Dr. Racke or research are recommended. Neurology is no longer an early match.

*Interviews are conducted November and December*

**Faculty Advisors**: Chad Hoyle (Clerkship Director), Adam Quick (Assistant Clerkship Director), Sheri Hart (Residency Director), Michael Racke (Chairman), Jacquelyne Cios, Miriam Freimer, John Kissel, Steve Kolb, J. Layne Moore, Bassel Shnuker.

6. Neurosurgery  (Revised 02/11/2013)

**DOC-1**: Adult or Pediatric Emergency Medicine.

**DOC-4**: Any medical specialties that relate to the care of surgical patients, including SICU, MICU, Cardiology, Renal, Pulmonary, ID.

**Electives**: Radiology, Anatomy, Anesthesia, any medical specialties that relate to the care of surgical patients.

**Special Requirements**: Department head letter required. Away electives in Neurosurgery at hospitals that you may be interested in applying for residency are encouraged by some programs.

*Interviews are conducted November and December*

**Pediatric Neurosurgeons**: Eric Jackson, Ronald Grondin, and Lance Governale.

7. Ob/Gyn  (Revised 01/16/2013)

**DOC-1**: Adult Emergency Medicine.

**DOC-3**: Gynecologic Oncology.

**DOC-4**: General Medicine, Infectious Disease, Pulmonary, Cardiology.

**Electives**: Anatomy, Anesthesia, Endocrinology, High Risk OB, NICU, SICU, Dermatology, Radiology, and any of above not taken as a DOC.

**Special Requirements**: Any student interested in Ob/Gyn can go to the following web site for additional information: [http://www.apgo.org](http://www.apgo.org) select Medical Student & Resident Resources.  Students going into Ob/Gyn should meet with the Chair, Mark Landon, MD, the Clerkship Director Wanjiku Musindi, MD, or the Residency Director, Philip Samuels, MD in the spring prior to Med 4 year. Additionally the department holds an annual meeting for those students who are interests in
pursing an Ob/Gyn residency. This meeting is usually held in July. All fourth year medical students will receive information about the meeting via email.

Interviews are conducted November and December

Faculty Advisors: Wanjiku Musindi, Philip Samuels Garth Essig, Katherine Strafford, Valerie Waddell, Melissa Goist, Lisa Keder, Mark Landon, Ritu Salani, and Jonathan Schaffir.

8. Ophthalmology (Revised 2/11/2013)

DOC-1: Adult Emergency Medicine.

DOC-3: Complicated Diabetes Patient, Geriatrics, Rheumatology.

Electives: Radiology, Neuroradiology, any Surgical Elective, Radiology, Anesthesia.

Special Requirements: Ophthalmology research by special arrangement. Elective in Ophthalmology early in Med 4 or during the Med 3 selective. Ophthalmology is an early match.

Interviews are conducted October through December

Faculty Advisors: Paul Weber, Tom Mauger, Alan Letson.

9. Orthopedics (Revised 02/14/2013)

DOC-4: Any medical specialties that relate to the care of surgical patients, including, SICU, MICU, MICU, Cardiology, Pulmonary, Renal, ID.

Electives: Anatomy, Sports Medicine, Pediatric Orthopedics, Anesthesia, Radiology, Mt. Carmel Orthopedics, or any of the above not taken as a DOC. – These electives are helpful but are not required electives for residency and should not be considered as such.

Special Requirements: Orthopaedic Selective can be taken as Med3. Very competitive match. Students interested in orthopaedics are encouraged to contact Med 3/4 director, Thomas Scharschmidt as soon as possible during Med3 year. Students should schedule an orthopaedic sub-I at OSU in the months of July, August, or September. Students will meet with clerkship director during the sub-I. A Program Director letter is usually required for residency applications. Chairman letter required for some programs. Away electives encouraged.

Interviews are conducted December through January

Faculty Advisors: Thomas Scharschmidt, MD, Michael Quackenbush, DO, Laura Phieffer, MD, Robert Najarian, MD, Joel Mayerson, MD, David Flanigan, MD.

10. Otolaryngology (Revised 01/4/2013)

DOC-1: Adult Emergency Medicine.

DOC-3: Contemporary Comprehensive Care of the Cancer Patient.

Elective (Department permission required): Comprehensive Otolaryngology-Head & Neck Surgery.
Electives: Choose one or more from the following list - Ophthalmology, Radiology, Anatomy, Anesthesia, Plastics Surgery, Trauma, Otolaryngology Research.

Special Requirements: Discuss your schedule with Dr. Brad deSilva (brad.desilva@osumc.edu), Medical Student Education Coordinator.

Interviews are conducted December through January

Faculty Advisors: Brad deSilva, Ed Dodson, Arick Forrest, Amit Agrawal, and Charles Elmaraghy.

11. Pathology (Revised 01/25/2012)

DOC-1: Any

DOC-3: Any

DOC-4: Any

Electives: Surgical Pathology, Hematopathology, Transfusion Medicine/Blood Bank, Autopsy and Forensic Pathology, Pediatric Pathology, Neuropathology, Uro-oncologic Research, Urologic Pathology.

Special Requirements: None

Faculty Advisors: Arwa Shana'ah, Adrian Suarez, Charles Hitchcock.

12. Pediatrics (Revised 01/22/2013)

DOC-1: Pediatric Emergency Medicine or Adult Emergency Medicine.

DOC-3: Pediatric Palliative Medicine, Developmental Disabilities, Healthy Weight and Nutrition, Pediatric End Stage Renal Disease, Care of Pediatric and Congenital Lung Disease, Rheumatology, PM&R (you can preference pediatric PM&R).

Pediatric DOC 4 Courses: NICU (Nationwide Children's Hospital or OSU), PICU, Hematology/Oncology, Hospital Medicine, Infectious Disease, and Pulmonology.

Electives: All students pursuing a residency in pediatrics should enroll in the Advanced Topics in Pediatrics course. Recommended elective choices include any of the pediatric specialty medical or surgical services, either inpatient consultation or outpatient-based services, of which there are many listed in MedSTAR, or adult medical services of interest to you. Adolescent medicine, allergy, blood diseases of infants and children, child abuse/child advocacy (by permission), genetics, radiology, rheumatology, sports medicine, toxicology, and surgical specialties such as orthopedics or maternal-fetal medicine are nice choices to round out your preparation.

Special Requirements: Students going into pediatrics should meet with the clerkship director, Dr. Mary McIlroy, in the late spring of Med 3 or early summer of the Med 4 year. A meeting with Dr. Michael Brady, Chairman of the Department of Pediatrics, is also recommended. Students are asked to attend the annual Pediatric Residency Program meeting, which is held at Nationwide Children's Hospital for those students who are interested in pursuing a Pediatric or Combined Internal Medicine/ Pediatrics Residency. This meeting is usually held in mid-July or early August. All fourth year medical students will receive information about the meeting via e-mail.

Interviews are conducted October through January

Faculty Advisors: Drs. Mary McIlroy, John Mahan, Leslie Mihalov, Mary Kay Kuzma, Beth Allen, Dan Cohen, Suzanne Reed, Rebecca Scherzer, Richard Shell, Rebecca Wallihan, Michael Brady (Chairman).
### 13. Physical Medicine and Rehabilitation  (Revised 02/01/2012)

**DOC-1:** Adult or Pediatric Emergency Medicine.

**DOC-3:** Physical Medicine & Rehabilitation – Adult or Pediatric Physical Medicine & Rehabilitation, Geriatrics, Developmental Disabilities, Rheumatology.

**DOC-4:** General Medicine, Pulmonary, Neurology.

*Special Requirements:* Research experience in PM&R or related field is important for the more competitive residencies.

*Interviews are conducted November through January*

**Faculty Advisors:** Ellen Kaitz, MD (Program Director), W. Jerry Mysiw, MD (Chair), and Courtney Thomas (Medical Student Coordinator) all can be reached by calling the Department of Physical Medicine & Rehabilitation.

### 14. Plastic Surgery  (Revised 02/03/2012)

**DOC-1:** Adult Emergency Medicine.

**DOC-3:** Contemporary Comprehensive Care of Cancer Patient, ENT Care of Patients with Cancer, Transplant End Stage Renal Disease, Complicated Diabetes Mellitus Comprehensive Care, General Medicine - Palliative Med Hospice Care, Kidney Disease in Adults, Surgery - Care of Patients with Cancer, Surgery - Patient Care End Stage Renal Disease.

**DOC-4:** General Medicine/Hospitalist – Sub-I, Surgery - Gastrointestinal Surgery, Surgery – Acute Care Surgery, Surgery-Colorectal Surgery, Urology Sub-I, DOC-4 Sub-Internship Combined, Infectious Diseases Sub-I.

*Electives:* Plastic Surgery Sub-I in Med 4 preferable, or a Sub-I in Orthopaedics, Ophthalmology, or Oral Surgery.

*Special Requirements:* Very competitive specialty. Students who are applying to plastic surgery residency are encouraged to schedule an appointment in early June/July with Dr. Gregory Pearson or Dr. Robert Ruberg, 293-9030. Students should schedule a Plastic Surgery or General Surgery Sub-internship in the month of July, August, or September. Chairman or Program Director’s letter is required as part of the general surgery residency application.

**Faculty Advisors:** Gregory Pearson, Robert Ruberg, Michael Miller.

### 15. Psychiatry  (Revised 01/4/2013)

**DOC-1:** Any

**DOC-3:** Alcohol and Rehab, Developmental Disabilities, Geriatrics, Physical Medicine and Rehabilitation, Child Abuse.

**DOC-4:** General or Subspecialty Internal Medicine.

*Electives:* Psychiatry elective opportunities include Adult, Child/Adolescent, Consultation, Emergency, Partial Hospitalization, Research, and other areas with prior approval. Students are also encouraged to obtain considerable experience in medical settings, such as by fulfilling rotations in General and/or subspecialty Internal Medicine (cardiology, endocrine, pulmonary, renal, rheumatology or other fields); Family Medicine; Emergency Medicine; and Pediatrics (if interested in Child/Adolescent Psychiatry).

*Special requirements:* None, but you are encouraged to meet with Dr. Niedermier early during the PGY 4 year to discuss career options in psychiatry.

*Interviews are conducted November through January*
Faculty Advisors:  David Kasick, Julie Niedermier.

DOC-1: Any

DOC-3: Any

DOC-4: SICU, MICU, and any other medical specialty

Electives: Radiology, done early in Med 4, but other electives should be non-radiology training, if possible.

Special Requirements: Independent studies or research in radiology is encouraged, by prior arrangement.  Chair letters are often required, from Dr. Michael Knopp, Ph.D. M.D.

Interviews are conducted October through December

Faculty Advisors: Claudia Kirsch, Eric Bourekas, Joe Yu.

17. General Surgery  (Revised 01/4/2013)

DOC-1: Adult Emergency Medicine.

DOC-3: Surgery-Care of Patients with Cancer, Surgery-Patient Care End Stage Renal Disease, Complicated Diabetes Mellitus Comprehensive Care, Cardiology, Gyn. Oncology, Palliative Med (Pain or Hospice).

DOC-4: Digestive Diseases, Gastroenterology, Infectious Disease, Surgery (some available in July, August, or September).

Electives: Anatomy, Digestive Diseases, Gastroenterology, Radiation Oncology, and General Surgery sub-internships or electives, particularly the General Surgery SICU elective.

Special Requirements: Competitive match. Chairman or Program Director’s letter is required as part of the general surgery residency application. Students should schedule a General Surgery sub-internship elective in the month of July, August or September. Students who are pursuing general surgery residency training are encouraged to schedule an appointment in late July/August with Alan Harzman, MD, Clerkship Director, or Mark Arnold, MD, Program Director-General Surgery.

Faculty Advisors: Mark Arnold MD (Program Director – General Surgery), Mark Bloomston (Director- Surgical Oncology Fellowship Program), Ginny Bumgardner MD PhD (Director–Master of Medical Science Program), Chris Ellison MD (Chair), Scott Melvin MD (Director- Minimally Invasive Surgery), Pete Muscarella MD (Assistant Program Director -General Surgery), Alan Harzman, MD (Clerkship Director-General Surgery), and Steven Steinberg MD (Division Chief – Critical Care, Trauma & Burn).

18. Urology  (Revised 02/11/2013)

DOC-1: Adult Emergency Medicine.

DOC-4: Any medical specialty that relates to the medical care of the surgical patient, including Cardiology, Pulmonary, ID, Renal, GI, etc.

Electives: Elective in Urology, preferably taken in July, August or September.

Special Requirements: Away electives limited to places where you may want to apply for residency. Urology is a
competitive early match. All students should meet with Dr. Bahnson early, prior to Med 4. Department head letters are required.

*Interviews are conducted end of October through mid-December*

**Faculty Advisors:** Robert Bahnson, Frank Begun, Geoffrey Box, Bodo Knudsen, Ahmad Shabsigh.
